Educating a Billion Arjun Mohan,2023-09-25 Educating a Billion is an insider's take on how edtech companies in India are trying to solve the issues plaguing our education system and trying to

deliver quality at scale. It covers the formative days of India's well-known edtech start-ups-BYJU'S, Unacademy, upGrad and Whitehat Jr, among others, and how these companies created products with a promise that made a difference. The growth of these start-ups is synonymous with the growth of venture capitalist led capital deployment in privately held Indian companies (private markets). The book covers Covid-19-induced changes in our educational system which led to the hypergrowth of the edtech ecosystem, a watershed event for digital start-ups globally. With a unique ringside perspective, Arjun Mohan weighs in on the future of edtech and how technologies like artificial intelligence (AI) and virtual reality (VR) are going to play an important role in the next phase. Above everything else, this book is the story of India's new generation of entrepreneurs and founders-their hopes, their unwavering faith in the face of ambiguity and their rejection of fear. The book is about vision, audacity and optimism that's changing the education system after 200-plus years of slumber.

The Mobile Photographer Robert Fisher, 2014-11-17 It's been said that, with smartphones, everyone is a photographer. There is a snide implication with that statement—that camera phones aren't "real" cameras and that the people who use them aren't "real" photographers. In this book, Robert Fisher proves that today's Android devices offer cameras that are remarkably powerful and more than capable of producing images that rival those made with more "serious" equipment. In this book, Fisher guides readers through the menus of the Android operating system, helping them to understand how to choose and use out-of-the-box controls for better images. Next, he covers add-on accessories and applications designed to enhance the devices' capabilities. While the photographic capabilities of the "base" camera are pretty terrific and will meet with rave reviews from many users, the camera really produces images that sing when suited up with DSLR functions, filters, and postproduction effects—all of which Fisher covers with prowess and technical skill.

Flash Video Creativity Murat Bodur, Hoss Gifford, Diana Johnson, Leonhard Lass, Anthony Onumonu, Kristian Besley, Neal Boyd, Jerome Turner, Ken Jokol, Tim Hawkins, 2013-11-21 by Bruce Herbert and Diana Johnson of Sorenson Media Creative boundaries are being blown apart as Macromedia Flash MX ushers in a new era of moving images on the Internet. At its launch, analysts predicted that the Flash Player would transform itself from being a lightweight animation tool to the

de facto technology for simple web interactivity^{5*} (Randy Souza, Forrester). Since then though, Flash developers combining vector animation and video have proven that it's capable of much, much more than simple web interactivity. We're still just beginning to scratch the surface of the possibilities it opens up to us, but already it looks like Flash MX is becoming the key technology for pushing video creativity on the Web to a new whole level. Understandably, many people look at Flash as just another way to deliver video on the Web, one more program for showing movies on your desktop. Well, it can certainly do that - but there's a whole lot more it can do besides! You can use ActionScript to add custom controls, determine a video playback sequence, or mask your video with a custom shape. You can use layering to create special effects, design custom templates for e-learning applications, and use lightweight video streams along with Flash animation in rich media e-mail campaigns.

Reality Macromedia ColdFusion MX Ben Forta, 2002 In Reality ColdFusion, readers will participate in the process of designing a Web application, discussing development problems, brainstorming to find solutions, and final implementation. The end result is a real, usable product.
