Documenting the Beijing Olympics D.P. Martinez, Kevin Latham,2013-10-18 This book focuses on the processes of documenting the Beijing Olympics – ranging from the visual (television and film) to radio and the written word – and the meanings generated by such representations. What were the 'key' stories and how were they chosen? What was dramatised? Who were the heroes? Which 'clashes' were highlighted and how? What sorts of stories did the notion of 'human interest' generate? Did politics take a backseat or was the topic highlighted repeatedly? Thus, the focus was not on the success or failure of this event, but on the ways in which the Olympics Games, as international and historic events, are memorialised by observers. The key question that this book addresses is: How far would the Olympic coverage fall into the patterns of representation that have come to dominate Olympic reporting and what would China, as a discursive subject, bring to these patterns? This book was previously published as a special issue of Sport in Society.

Materializing Europe A. Badenoch, A. Fickers,2010-10-27 This book explores the relationships between European integration and material infrastructures. Fiber Optics Illustrated Dictionary J.K. Petersen, 2002-12-26 Within a few short years, fiber optics has skyrocketed from an interesting laboratory experiment to a billion-dollar industry. But with such meteoric growth and recent, exciting advances, even references published less than five years ago are already out of date. The Fiber Optics Illustrated Dictionary fills a gap in the literature by providing instructors, hobbyists, and top-level engineers with an accessible, current reference. From the author of the best-selling Telecommunications Illustrated Dictionary, this comprehensive reference includes fundamental physics, basic technical information for fiber splicing, installation, maintenance, and repair, and follow-up information for communications and other professionals using fiber optic components.
