The Routledge Companion to Mobile Media Art Larissa Hjorth, Adriana de Souza e Silva, Klare Lanson, 2020-07-28 In this companion, a diverse, international and interdisciplinary group of contributors and editors examine the rapidly expanding, far-reaching field of mobile media as it intersects with art across a range of spaces—theoretical, practical and conceptual. As a vehicle for—and of—the everyday, mobile media is recalibrating the relationship between art and digital networked media, and reshaping how creative practices such as writing, photography, video art and filmmaking are being conceptualized and practised. In exploring these innovations, *The Routledge Companion to Mobile Media Art* pulls together comprehensive, culturally nuanced and interdisciplinary approaches; considerations of broader media ecologies and histories and political, social and cultural dynamics; and critical and considered perspectives on the intersections between mobile media and art. This book is the definitive publication for researchers, artists and students interested in comprehending all the various aspects of mobile media art, covering digital media and culture, internet studies, games studies, anthropology, sociology, geography, media and communication, cultural studies and design.

Gaming in Social, Locative and Mobile Media L. Hjorth, I. Richardson, 2014-05-29 Drawing on case studies across the Asia-Pacific region, *Gaming in Social, Locative and Mobile Media* explores the 'playful turn' in contemporary everyday life, and the role of mobile devices, games and social media in this transformation.

The Media and Communications in Australia Stuart Cunningham, Sue

Turnbull,2020-07-16 Traditional media are being reshaped by digital technologies. The funding model for quality journalism has been undermined by the drift of advertising online, demarcations between different forms of media are rapidly fading, and audiences have fragmented. We can catch up with our favourite TV show on a tablet, social media can be more important than mainstream radio in a crisis, and organisations large and small have become publishers in their own right on apps. Nevertheless mainstream media remain powerful. The Media and Communications in Australia offers a systematic introduction to this dynamic field. Fully updated and revised to take account of recent developments, this fourth edition outlines the key media industries and explains how communications technologies are impacting on them. It provides a thorough overview of the main approaches taken in studying the media, and includes an expanded 'issues' section with new chapters on social media, gaming, apps, the environment, media regulation, ethics and privacy. With contributions from some of Australia's best researchers and teachers in the field, The Media and Communications in Australia remains the most comprehensive and reliable introduction to media and communications available. It is an ideal student text, and a reference for teachers of media and anyone interested in this influential industry.

Social, Casual and Mobile Games Michele Willson,Tama Leaver,2017-08-24 The first collection dedicated to analysing the casual, social, and mobile gaming movements that are changing games the world over.

Digital Games and Mathematics Learning Tom Lowrie,Robyn Jorgensen (Zevenbergen),2015-10-05 Digital games offer enormous potential for learning and engagement in mathematics ideas and processes. This volume offers multidisciplinary

perspectives—of educators, cognitive scientists, psychologists and sociologists—on how digital games influence the social activities and mathematical ideas of learners/gamers. Contributing authors identify opportunities for broadening current understandings of how mathematical ideas are fostered (and embedded) within digital game environments. In particular, the volume advocates for new and different ways of thinking about mathematics in our digital age—proposing that these mathematical ideas and numeracy practices are distinct from new literacies or multiliteracies. The authors acknowledge that the promise of digital games has not always been realised/fulfilled. There is emerging, and considerable, evidence to suggest that traditional discipline boundaries restrict opportunities for mathematical learning. Throughout the book, what constitutes mathematics learnings and pedagogy is contested. Multidisciplinary viewpoints are used to describe and understand the potential of digital games for learning mathematics and identify current tensions within the field. Mathematics learning is defined as being about problem solving; engagement in mathematical ideas and processes; and social engagement. The artefact, which is the game, shapes the ways in which the gamers engage with the social activity of gaming. In parallel, the book (as a textual artefact) will be supported by Springer's online platform—allowing for video and digital communication (including links to relevant websites) to be used as supplementary material and establish a dynamic communication space.

Mobile Computing: Concepts, Methodologies, Tools, and Applications Taniar, David, 2008-11-30 This multiple-volume publication advances the emergent field of mobile computing offering research on approaches, observations and models pertaining to mobile

devices and wireless communications from over 400 leading researchers--Provided by publisher.

HWM, 2003-03 Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews.

The Routledge Companion to Media and Class Erika Polson, Lynn Schofield Clark, Radhika Gajjala, 2019-11-27 This companion brings together scholars working at the intersection of media and class, with a focus on how understandings of class are changing in contemporary global media contexts. From the memes of and about working-class supporters of billionaire populists, to well-publicized and critiqued philanthropic efforts to bring communication technologies into developing country contexts, to the behind-the-scenes work of migrant tech workers, class is undergoing change both in and through media. Diverse and thoughtfully curated contributions unpack how media industries, digital technologies, everyday media practices—and media studies itself—feed into and comment upon broader, interdisciplinary discussions. They cover a wide range of topics, such as economic inequality, workplace stratification, the sharing economy, democracy and journalism, globalization, and mobility/migration. Outward-looking, intersectional, and highly contemporary, The Routledge Companion to Media and Class is a must-read for students and researchers interested in the intersections between media, class, sociology, technology, and a changing world.

Creativity and Creative Industries in Regional Australia Phillip McIntyre, Susan Kerrigan, Janet Fulton, Evelyn King, Claire Williams, 2023-12-26 This book explores the relationship between creativity, creative people, and creative industries in regional

Australia through examining lived experience. The authors draw on more than 100 qualitative interviews with creative workers, and contextualise this creative work within the broader social and cultural structures of Australia's Hunter region (located north of Sydney, in New South Wales). An invaluable resource for anyone interested in creative ecosystems as well as creativity and innovation, this book is an ethnographic study using the Hunter region as a case connected to the national and global networks that typify the creative industry. This timely addition to the Palgrave Studies in Creativity and Culture series gives a unique insight into creativity and cultural production.

Ambient Play Larissa Hjorth, Ingrid Richardson, 2020-09-15 How mobile games are part of our day-to-day lives and the ways we interact across digital, material, and social landscapes. We often play games on our mobile devices when we have some time to kill—waiting in line, pausing between tasks, stuck on a bus. We play in solitude or in company, alone in a bedroom or with others in the family room. In *Ambient Play*, Larissa Hjorth and Ingrid Richardson examine how mobile gameplay fits into our day-to-day lives. They show that as mobile games spread across different genres, platforms, practices, and contexts, they become an important way of experiencing and navigating a digitally saturated world. Mobile games become conduits for what the authors call ambient play, pervading much of our social and communicative terrain. We become digital wayfarers, moving constantly among digital, social, and social worlds. Hjorth and Richardson explore how households are transformed by media—how idiosyncratic media use can alter the spatial composition and emotional cadence of the home. They show how mobile games connect domestic forms of play with more public forms of playfulness in urban spaces, how

collaborative play (both networked and face-to-face) is incorporated into private and public play, and how touchscreens and haptic play emphasize the perception of the moving body. Hjorth and Richardson invite us to think of mobile gaming as more than a “casual” distraction but as a complex cultural practice embedded into our contemporary ways of being, knowing, and communicating.

World Entertainment Media Paolo Sigismondi, 2019-07-25 This new book offers an insightful guide into the complex tapestry of global entertainment media markets. It features analyses and case studies from leading international media scholars, who explore the causes and effects of globalization upon this ever-evolving industry. There are still opposing and restraining forces to globalization processes taking place in media, and the global mediascape comprises international, regional and local markets, and global and local players, which in recent years have evolved at an uneven pace. By analyzing similarities and differences in a landscape where driving forces of globalization meet locally situated audiences and institutions, this volume unveils a complex, contested space comprising global and local players, whose success is determined by both their national and international dimensions. It guides its readers to the geographical and intellectual exploration of the international media landscape, analyzing the global and local media players and their *modus operandi*. Editor Paolo Sigismondi’s insightful, engaging collection presents a compelling and novel approach to the analysis of global entertainment media. *World Entertainment Media: Global, Regional and Local Perspectives* is an ideal starting point for students and practitioners alike looking to build a solid understanding of the global mediascape, and a great resource for instructors and scholars in global media

entertainment.

Location-Based Mobile Games L. A. Lehmann, 2012-02 Seminar paper from the year 2012 in the subject Computer Science - Internet, New Technologies, grade: 1.3, Technical University of Berlin, course: Service-centric Networking, language: English, abstract: In the recent years location-based services have become more and more popular due to advanced mobile devices that make the use of these services very convenient. With the rise of location-based services location-based games will also gain popularity and become more wide spread. This seminar paper describes game patterns and new game types that are possible with location based games. It also examines different techniques to determine the geolocation of players, and it analyses the changes to the game experiences known from traditional video games. Ultimately this paper gives an overview of the current state of the art concerning location-based games and discusses several issues and possibilities concerning the implementation of one.

Games and Gaming Larissa Hjorth, 2011-01-01 The computer games industry has

rapidly matured. Once a preoccupation only of young technophiles, games are now one of the dominant forms of global popular culture. From consoles such as Nintendo Wii and Microsoft Xbox to platforms such as iPhones and online gaming worlds, the realm of games and their scope has become all-pervasive. The study of games is no longer a niche interest but rather an integral part of cultural and media studies. The analysis of games reveals much about contemporary social relations, online communities and media engagement. Presenting a range of approaches and analytical tools through which to explore the role of games in everyday life, and packed with case material, Games and Gaming provides a comprehensive overview of this new media and how it permeates global culture in the twenty-first century.

Mobile Technologies Gerard Goggin, Larissa Hjorth, 2009-01-13 In light of emerging forms of software, interfaces, cultures of uses, and media practices associated with mobile media, this collection investigates the various ways in which mobile media is developing in different cultural, linguistic, social, and national settings. Specifically, contributors consider the promises and politics of mobile media and its role in the dynamic social and gender relations configured in the boundaries between public and private spheres. The collection is genuinely interdisciplinary, as well as international in its range, with contributors and studies from China, Japan, Korea, Italy, Norway, France, Belgium, Britain, and Australia.

How to implement sprite animation and control interactions among moving sprites. How to play sound effects and music in mobile games. How to take advantage of wireless networks to build mobile multiplayer games. How to design and develop a variety of different games spanning several video games genres.

Samsung Electronics and the Struggle for Leadership of the Electronics Industry

Anthony Michell, 2011-09-29 This book views Samsung Electronics in terms of corporate life cycle as well as product portfolio and strategy. It also examines the issues Samsung faces as it proceeds further into the 21st century. Written from the perspective of an experienced commentator on Korean and global business, this book presents not simply a narrative or an adulatory and uncritical account of Samsung's rise, but a considered analysis of the secrets of success that both business students and CEOs will want to read and consider applying to their own companies.
