**Digital Contact Tracing for Pandemic Response** Jeffrey P. Kahn, Johns Hopkins Project on Ethics and Governance of Digital Contact Tracing Technologies, 2020-05-29 As nations race to hone contact-tracing efforts, the world's experts consider strategies for maximum transparency and impact. As public health professionals around the world work tirelessly to respond to the COVID-19 pandemic, it is clear that traditional methods of contact tracing need to be augmented in order to help address a public health crisis of unprecedented scope. Innovators worldwide are racing to develop and implement novel public-facing technology solutions, including digital contact tracing technology. These technological products may aid public health surveillance and containment strategies for this pandemic and become part of the larger toolbox for future infectious outbreak prevention and control. As technology evolves in an effort to meet our current moment, Johns Hopkins Project on Ethics and Governance of Digital Contact Tracing Technologies—a rapid research and expert consensus group effort led by Dr. Jeffrey P. Kahn of the Johns Hopkins Berman Institute of Bioethics in collaboration with the university's Center for Health Security—carried out an in-depth analysis of the technology and the issues it raises. Drawing on this analysis, they produced a report that includes detailed recommendations for technology companies, policymakers, institutions, employers, and the public. The project brings together perspectives from bioethics, health security, public health, technology development, engineering, public policy, and law to wrestle with the complex interactions of the many facets of the technology and its applications. This team of experts from Johns Hopkins University and other world-renowned institutions has crafted clear and detailed guidelines to help manage the creation, implementation, and application of digital contact tracing. Digital Contact Tracing for Pandemic Response is the essential resource for this fast-moving crisis. **Privacy Concerns Surrounding Personal Information Sharing on Health and Fitness Mobile Apps** Sen, Devjani, Ahmed, Rukhsana, 2020-08-07 Health and fitness apps collect various personal information including name, email address, age, height, weight, and in some cases, detailed health information. When using these apps, many users trustfully log everything from diet to sleep patterns. However, by sharing such personal information, end-users may make themselves targets to misuse of this information by unknown third parties, such as insurance companies. Despite the important role of informed consent in the creation of health and fitness applications, the intersection of ethics and information sharing is understudied and is an often-ignored topic during the creation of mobile applications. Privacy Concerns Surrounding Personal Information Sharing on Health and Fitness Mobile Apps is a key reference source that provides research on the dangers of sharing personal information on health and wellness apps, as well as how such information can be used by employers, insurance companies, advertisers, and other third parties. While highlighting topics such as data ethics, privacy management, and information sharing, this publication explores the intersection of ethics and privacy using various quantitative, qualitative, and critical analytic approaches. It is ideally designed for policymakers, software developers, mobile app designers, legal specialists, privacy analysts, data scientists, researchers, academicians, and upper-level students.

**Software Telemetry** Jamie Riedesel, 2021-08-31 Software Telemetry is a guide to operating the telemetry systems that monitor and maintain your applications. It takes a big picture view of telemetry, teaching you to manage your logging, metrics, and events as a complete end-to-end ecosystem. You'll learn the base architecture that underpins any software telemetry system, allowing you to easily integrate new systems into your existing infrastructure, and how these systems work under the hood. Throughout, you'll follow three very different companies to see how telemetry techniques impact a greenfield startup, a large legacy enterprise, and a non-technical organization without any in-house development. You'll even cover how software telemetry is used by court processes--ensuring that when your first telemetry subpoena arrives, there's no reason to panic!

Find cell phones' area online by cell tower triangulation utilizing LAC (Location Area Code) and Celled from PC, iPhone or Android phone. Cell tower triangulation utilizes the LAC and Cellid to focus the position of a cellular smartphone. With information from no less than three cell towers, this strategy can ascertain a handset's area exactly. Each one base station covers a certain region, the more cell towers in your general vicinity, the more precise result it delivers. So the thickness of cell towers decides the precision. For the most part, the thickness is higher in the urban zones particularly at downtown. While in country territories, where there are less cell towers, the result is less precise. **8 Track** R. J. King,2015-03-23 An argument between two strong-willed inventors - Bill Lear and Earl Madman Muntz - sparked the world's first mobile app. Here, for the first time, is the story behind the development of the 8 Track tape player. In late 1965, consumers had two ready options for listening to recorded music - a radio or a record player. But with baby boomers just coming of age in the 1960s, along with new advances in magnetic tape and an explosion of music, Lear and his team ignored the naysayers and developed the 8 Track tape player and tape cartridges. Through a friendship with Henry Ford II, chairman and CEO of Ford Motor Co., Lear lined up his first customer. Lear also convinced David Sarnoff, chairman of RCA Victor, to dedicate 175 albums to the new medium. But Ford's powerful product planners were not convinced Lear could develop a combined AM radio and 8 Track tape player from scratch (hence the first mobile app). Enter Motorola, which was desperate to keep its share of Ford work by bringing forward a novel music playback system. As Ford, Motorola, RCA, and Lear worked through their separate interests, they launched the 8 Track against stiff resistance. Many of the major record labels were reluctant to support the new medium given the associated costs of design, copyrights, materials, production, distribution, and marketing. But for consumers, artists, musicians, and engineers, the 8 Track represented the Holy Grail of a mobile music experience, and millions of dollars in sales. Here, for the first time, is the inside story.

**Privacy-Enhancing Fog Computing and Its Applications** Xiaodong Lin,Jianbing Ni,Xuemin (Sherman) Shen,2018-11-12 This SpringerBrief covers the security and privacy challenges in fog computing, and proposes a new secure and privacy-preserving mechanisms to resolve these challenges for securing fog-assisted IoT applications. Chapter 1 introduces the architecture of fog-assisted IoT applications and the security and privacy challenges in fog computing. Chapter 2 reviews several promising privacy-enhancing techniques and illustrates examples on how to leverage these techniques to enhance the privacy of users in fog computing. Specifically, the authors divide the existing privacy-enhancing techniques into three categories: identity-hidden techniques, location privacy protection and data privacy enhancing techniques. The research is of great importance since security and privacy problems faced by fog computing impede the healthy development of its enabled IoT applications. With the advanced privacy-enhancing techniques, the authors propose three secure and privacy-preserving protocols for fog computing applications, including smart parking navigation, mobile crowdsensing and smart grid. Chapter 3 introduces identity privacy leakage in smart parking navigation systems, and proposes a privacy-preserving smart parking navigation system to prevent identity privacy exposure and support efficient parking guidance retrieval through road-side units (fogs) with high retrieving probability and security guarantees. Chapter 4 presents the location privacy leakage, during task allocation in mobile crowdsensing, and propose a strong privacy-preserving task allocation scheme that enables location-based task allocation and reputation-based report selection without exposing knowledge about the location and reputation for participators in mobile crowdsensing. Chapter 5 introduces the data privacy leakage in smart grid, and proposes an efficient and privacy-preserving smart metering protocol to allow collectors (fogs) to achieve real-time measurement collection with privacy-enhanced data aggregation. Finally, conclusions and future research directions are given in Chapter 6. This brief validates the significant feature extension and efficiency improvement of IoT devices without sacrificing the security and privacy of users against dishonest fog nodes. It also provides valuable insights on the security and privacy protection for fog-enabled IoT applications. Researchers and professionals who carry out research on security and privacy in wireless communication will want to purchase this SpringerBrief. Also, advanced level students, whose main research area is mobile network security will also be interested in this SpringerBrief.

**Radical Embodied Cognitive Science** Anthony Chemero,2011-08-19 A proposal for a new way to do cognitive science argues that cognition should be described in terms of agent-environment dynamics rather than computation and representation. While philosophers of mind have been arguing over the status of mental representations in cognitive science, cognitive scientists have been quietly engaged in studying perception, action, and cognition without explaining them in terms of mental representation. In this book, Anthony Chemero describes this nonrepresentational approach (which he terms radical embodied cognitive science), puts it in historical and conceptual context, and applies it to traditional problems in the philosophy of mind. Radical embodied cognitive science is a direct descendant of the American naturalist psychology of William James and John Dewey, and follows them in viewing perception and cognition to be understandable only in terms of action in the environment. Chemero argues that cognition should be described in terms of agent-environment dynamics rather than in terms of computation and representation. After outlining this orientation to cognition, Chemero proposes a methodology: dynamical systems theory, which would explain things dynamically and without reference to representation. He also advances a background theory: Gibsonian ecological psychology, "shored up" and clarified. Chemero then looks at some traditional philosophical problems (reductionism, epistemological skepticism, metaphysical realism, consciousness) through the lens of radical embodied cognitive science and concludes that the comparative ease with which it resolves these problems, combined with its empirical promise, makes this approach to cognitive science a rewarding one. "Jerry Fodor is my favorite philosopher," Chemero writes in his preface, adding, "I think that Jerry Fodor is wrong about nearly everything." With this book, Chemero explains

nonrepresentational, dynamical, ecological cognitive science as clearly and as rigorously as Jerry Fodor explained computational cognitive science in his classic work *The Language of Thought*.

Data Privacy During Pandemics Benjamin Boudreaux,Matthew A. DeNardo,Sarah W. Denton,Ricardo Sanchez,Katie Feistel,Hardika Dayalani,2020-07-30 As part of the response to the COVID-19 pandemic, governments worldwide have deployed mobile phone surveillance programs to augment public health interventions. However, these programs raise privacy concerns. The authors of this report examine whether two goals can be achieved concurrently: the use of mobile phones as public health surveillance tools to help manage COVID-19 and future crises, and the protection of privacy and civil liberties.

*Transportation Amid Pandemics* Junyi Zhang,Yoshitsugu Hayashi,2022-09-18 *Transportation Amid Pandemics: Practices and Policies* is the first reference on pandemics (especially COVID-19) in the context of transport, logistics, and supply chains. This book investigates the relationships between pandemics and transport and evaluates impacts of COVID-19 and effects of policy responses to address them. It explores how to recover from pandemics, reveals governance for immediate policy responses and future innovations, suggests strategies for post-pandemic sustainable and resilient development, shares lessons of COVID-19 policymaking across countries, and discusses how to transform transport systems for a better future. *Transportation Amid Pandemics* offers transport researchers and policymakers the scientific evidence they need to support their decisions and solutions against pandemics. Curiosity and research brought me to discover an excellent handbook covering the relations between COVID 19 and the transport reality. It is called *Transportation amid Pandemics –Lessons Learned from COVID-19* and has been published this year. 2022 happens to be the year of the 50th anniversary of the first report to The Club of Rome *The Limits to Growth*. The new book covers evidences from all over the world, and offers policy recommendations from a great variety of perspectives. Ernst Ulrich von Weizsaecker Represents the collective efforts of the World Conference on Transport Research Society (WCTRS) Uniquely deals with intertwined issues of pandemics and transport Investigates both successful and problematic policy measures Emphasizes evidence-based policymaking from cross-sectoral and transdisciplinary perspectives Transfers lessons from the COVID-19 pandemic to future generations

Business for Sustainability, Volume II Demetris Vrontis,Alkis Thrassou,Leonidas Efthymiou,Yaakov Weber,S. M. Riad Shams,Evangelos Tsoukatos,2023-11-25 This two-volume edited work explores how businesses shape, and are shaped by, sustainability forces and phenomena. Major global developments are inexorably being led by a sustainability agenda, which, in itself constitutes an integral part of business evolution. And as context shapes content, shifts in society have gradually given rise to new regulations, new types of markets, environmental-excellence criteria for businesses, new economic standards, and a wide range of green technologies. Reflecting the purpose of the series, both volumes offer a cross-section of multi-disciplinary perspectives within business studies. Volume 1 focuses on strategic and managerial approaches to sustainability in business, including accounts on the historic origins of sustainability and its contemporary corporate sustainable models. Volume 2 explores, more contextually, how business and social sustainability constitute indivisible and inextricable components of the same nexus. Taken together, they offer an original perspective on how businesses can help achieve the SDG goals and targets.

**Computational Modeling and Data Analysis in COVID-19 Research** Chhabi Rani Panigrahi,Bibudhendu Pati,Mamata Rath,Rajkumar Buyya,2021-05-10 This book covers recent research on the COVID-19 pandemic. It includes the analysis, implementation, usage, and proposed ideas and models with architecture to handle the COVID-19 outbreak. Using advanced technologies such as artificial intelligence (AI) and machine learning (ML), techniques for data analysis, this book will be helpful to mitigate exposure and ensure public health. We know prevention is better than cure, so by using several ML techniques, researchers can try to predict the disease in its early stage and develop more effective medications and treatments. Computational technologies in areas like AI, ML, Internet of Things (IoT), and drone technologies underlie a range of applications that can be developed and utilized for this purpose. Because in most cases there is no one solution to stop the spreading of pandemic diseases, and the integration of several tools and tactics are needed. Many successful applications of AI, ML, IoT, and drone technologies already exist, including systems that analyze past data to predict and conclude some useful information for controlling the spread of COVID-19 infections using minimum resources. The AI and ML approach can be helpful to design different models to give a predictive solution for mitigating infection and preventing larger outbreaks. This book: Examines the use of artificial intelligence (AI), machine learning (ML), Internet of Things (IoT), and drone technologies as a helpful predictive solution for controlling infection of COVID-19 Covers recent research related to the COVID-19 pandemic and includes the analysis, implementation, usage, and proposed ideas and models with architecture to handle a pandemic outbreak Examines the performance, implementation, architecture, and techniques of different analytical and statistical models related to COVID-19 Includes different case studies on COVID-19 Dr. Chhabi Rani Panigrahi is Assistant Professor in the Department of Computer Science at Rama Devi Women's University, Bhubaneswar, India.
