Joe Brusha

Monster Planet David Wellington, 2014-04-01 Surviving the end of the world was the easy part? It's twelve years since the dead came back. Ravening, mindless zombies have devoured almost every living thing on the planet. The few, scattered survivors are surviving on canned goods and a refusal to give in and die. They are lead by Ayaan, a former child soldier turned brilliant strategist. She's twenty-eight years old, in a world where the average life expectancy is twenty-five. Together with her adopted ward Sarah, who has the psychic ability to see the life-force of the undead, she's gathered a few hundred survivors in Africa and given them safety, something to eat, and the possibility of a future. It would be a lot easier if the zombies weren't so well organized. Out of the east a dead prince has risen. The Tsarevich, the most powerful lich the world has yet seen, is able to command his fellow zombies and has crafted them into an unstoppable army. He has swept across Russia and eastern Europe, hunting down every survivor he can find. He's about to come down on Ayaan and her desert oasis like a tidal wave of death and horror. Yet quickly enough Ayaan realizes he's not just out for her destruction. He has something else in mind, a goal that will take him--and her--across oceans, all the way back to Colorado where the first zombies rose from the grave. He's going back to the Source and when he reaches it, no one will ever be safe again. The fate of all life on the planet is up for grabs, and if Ayaan and Sarah can't stop him there will be no more second chances?

Arts of Living on a Damaged Planet Anna Lowenhaupt Tsing, Nils Bubandt, Elaine Gan, Heather Anne Swanson, 2017-05-30 Living on a damaged planet challenges who we are and where we live. This timely anthology calls on twenty eminent humanists and scientists to revitalize curiosity, observation, and transdisciplinary conversation about life on earth. As human-induced environmental change threatens multispecies livability, *Arts of Living on a Damaged Planet* puts forward a bold proposal: entangled histories, situated narratives, and thick descriptions offer urgent “arts of living.” Included are essays by scholars in anthropology, ecology, science studies, art, literature, and bioinformatics who posit critical and creative tools for collaborative survival in a more-than-human Anthropocene. The essays are organized around two key figures that also serve as the publication’s two openings: Ghosts, or landscapes haunted by the violences of modernity; and Monsters, or interspecies and intraspecies sociality. Ghosts and Monsters are tentacular, windy, and arboreal arts that invite readers to encounter ants, lichen, rocks, electrons, flying foxes, salmon, chestnut trees, mud volcanoes, border zones, graves, radioactive waste—in short, the wonders and terrors of an unintended epoch. Day of the Monster Planet Ann Hodgman, 1991-01-01 CHILDREN'S BOOKS/AGES 9-12

Monster Island David Wellington, 2014-04-01 First in the cult classic trilogy: "A fantastic

zombie novel . . . There are many layers to this zombie apocalypse, and this book just gets things rolling” (Booklist). Welcome to New York City, Population Zero? The power grid has collapsed. There is no running water, no light, no heat. The massive neon signs of Times Square are dark now, and the subway trains crouch silent in their tunnels, waiting for commuters who will never return. An epidemic of staggering lethality has passed over the city and left nothing living in its wake. And yet the city is not deserted. The dead have returned to life, and they're hungry. The millions of people who once worked and lived in New York have been turned into cannibalistic monsters whose only function is to consume. No living person would dare enter the city--it would be suicide. Dekalb doesn't have a choice. He must protect his daughter's future, and that means retrieving vital medical supplies from the UN building in Midtown. A cadre of teenage girl soldiers have been recruited to help him find what he needs, and get back alive. They're well armed. They're devoted to their mission and willing to sacrifice anything to pull it off. But the odds against them are staggering. Especially when it turns out that not all zombies are created equal. Deep inside the city a medical student named Gary comes back from the dead different--his mind is intact. He can still think and feel. He's hungry, just like the rest, but unlike them he can plan, plot, and scheme. He can even lead the others, bending them to his will. Soon he has a small army at his command, a growing mob of rotting corpses all devoted to one cause: to find meat for their master. When Dekalb and Gary cross paths sparks will fly, destinies will clash--and the future of humanity will be decided, one head shot at a time.
