First Marathons Gail Waesche Kislevitz,2014-04-28 "Inspiring reading." —The Wall Street Journal "One of the scariest things about running a marathon for the first time isn't the distance, the muscle pain, the chafing, or the blisters. It's not knowing what's going to happen. That's why this disarmingly honest collection of first-time accounts is so refreshing." —Runner's World UK First Marathons is the collected stories of 37 runners, told in their own words, describing the experience of running their first marathon. Everything is covered, from the early flickerings of desire, all the way to full-blown obsession—the training, the food, the emotions, every mile of this incredible journey. First Marathons is the best instruction book you will ever find, because you learn from the heartfelt life experience of others. Illumination and inspiration are on every page. These runners are old and young, fat and thin, men and women. Some are famous (like Grete Waitz, Ted Corbitt, and Bill Rodgers), and others are just ordinary people—all of whom have achieved something truly extraordinary. Their collective message: anyone can run a marathon; everyone should. It will change your life forever.

The Born Again Runner Pete Magill,2016-10-09 From the lead author of Build Your Running Body ("the best running book ever"—Runner's World founder Bob Anderson), a one-of-a-kind guide for everyone who wants to run but feels they can't As a drug-addled young man, Pete Magill once found himself in the ER, with his body telling him to give up. Taking up running seemed impossible—but he willed himself to do it anyway. Magill went on to become one of the fastest masters runners ever, and a sought-after coach. Over a glowing (albeit hard-won) career, he has heard every excuse people use to stop running or never start—from achy knees and sore ankles, to advanced age and arthritis, to too many cigarettes or years on the couch. In every case, Magill's best advice is to do what he did: Run anyway—at a pace and mileage that work. Through inspiration, science, and anecdote, Magill gets runners out the door; through personal action plans, he sets them on the right path; and through the best exercises to protect and rehabilitate the body, he keeps them going—showing a way forward for new and sidelined runners who haven't before realized how close they are to fun and pain-free running!

Retrofitting Blade Runner Judith Kerman,1991 This book of essays looks at the multitude of texts and influences which converge in Ridley Scott's film Blade Runner, especially the film's relationship to its source novel, Philip K. Dick's Do Androids Dream of Electric Sheep? The film's implications as a thought experiment provide a starting point for important thinking about the moral issues implicit in a hypertechnological society. Yet its importance in the history of science fiction and science fiction film rests equally on its mythically and psychologically resonant creation of compelling characters and an exciting story within a credible science fiction setting. These essays consider political, moral and technological issues raised by the film, as well as literary, filmic, technical and aesthetic questions. Contributors discuss the film's psychological and mythic patterns, important political issues and the roots of the film in Paradise Lost, Frankenstein, detective fiction, and previous science fiction cinema.

The Ghost Runner Blair Richmond,2012-11-01 Vegan vampires, Shakespearean actors, food-co-op aficionados and serious runners face off against old-school bloodsuckers and rapacious, forest-devouring builders in this follow-up to Out of Breath (2011) set in—where else?—Lithia...Spunky Kat is good company; Alex and Roman are better defined this time around, but most vivid character honors go to the setting, whose tall evergreens and babbling brooks, shadowed by brooding mountains, enhance the sturdy plot. Thoroughly entertaining. —Kirkus Reviews [A] fast-paced trilogy...The Ghost Runner perfectly captures its setting while adding in engaging characters and a dose of the supernatural. —Ashland Daily Tidings Introducing Book Two in the Lithia Trilogy... In The Ghost Runner, Kat is still in Lithia, trying not to see Roman's face everywhere she looks. It's not easy, but she tries to move on: She starts taking classes at the local college, keeps up with her job at the running store, and is beginning a relationship with Alex. Yet Kat's past is never far behind, and as old ghosts begin to catch up with her, she finds herself fighting to defend the things she believes in, from the hope of a new family to the deeply wooded forests that she has begun to call home. As her relationship with Alex begins to crumble, a new secret from her past emerges, and she is once again torn between those she loves as she struggles to reconcile her dark past with her hopes for a brighter future. The Ghost Runner, continuing Kat's adventures in Out of Breath, brings us further into the mysterious town of Lithia, where the old traditions of logging and gold mining—and the new traditions of development—collide with conservation. Meanwhile, the spirits of the town keep watch over everything—and occasionally find it necessary to intervene... The Lithia Trilogy, which blends adventure and the paranormal with environmental awareness and Shakespeare, offers an exciting new series in young adult fiction.

Madness Peter Morrall,2017-03-31 This book is an introduction to the uncertainties and incongruities about madness. It is aimed at all of those who are curious about this subject whether out of general inquisitiveness or because it is part of a formal course of study. Using case studies of real people in order to explain, humanise, and bring to life the subject, Peter Morrall critically analyses how madness has been and is understood, or perhaps misunderstood. By contrasting past and present people who have been perceived as mad and/or perceive themselves as mad, Morrall presents core ideas about madness and critiques their would-be robustness in explaining the specific madness of the person in question, as well as their general relevance to madness overall. Unlike many of its contemporaries, the book does not adhere to a perspective, but rather remains skeptical about the ideas of all who profess to understand madness, whether these emanate from sociology, psychology, psychotherapy, anthropology, ‘anti’ psychiatry, or the biological sciences of contemporary ‘scientific-psychiatry’. This book will inform and stimulate the thinking of the reader, and challenge those with preconceived ideas about madness.

The Culture and Philosophy of Ridley Scott Adam Barkman,Ashley Barkman,Nancy Kang,2013-03-08 The Culture and Philosophy of Ridley Scott, edited by Adam Barkman, Ashley Barkman, and Nancy Kang, brings together eighteen critical essays that illuminate a nearly comprehensive selection of the director’s feature films from cutting-edge multidisciplinary and comparative perspectives. Chapters examine such signature works as Alien (1979), Blade Runner (1982), Thelma and Louise (1991), Gladiator (2000), Hannibal (2001), Black Hawk Down (2001), and American Gangster (2007). This volume divides the chapters into three major thematic groups: responsibility, remembering, and revision; real, alienated, and ideal lives; and gender, identity, and selfhood. Each section features six discrete essays, each of which forwards an original thesis about the film or films chosen for analysis. Each chapter features close readings of scenes as well as broader discussions that will interest academics, non-specialists, as well as educated readers with an interest in films as visual texts. While recognizing Scott’s undeniable contributions to contemporary popular cinema, the volume does not shy away from honest and well-evidenced critique. Each chapter’s approach correlates with philosophical, literary, or cultural studies perspectives. Using both combined and single-film discussions, the contributors examine such topics as gender roles and feminist theory; philosophical abstractions like ethics, honor, and personal responsibility; historical memory and the challenges of accurately rendering historical events on screen; literary archetypes and generic conventions; race relations and the effect of class difference on character construction; how religion shapes personal and collective values; the role of a constantly changing technological universe; and the schism between individual and group-based power structures. The Culture and Philosophy of Ridley Scott assembles the critical essays of scholars working in the fields of philosophy, literary studies, and cultural studies. An international group, they are based in the United States, Canada, Argentina, Italy, Greece, Korea, the United Kingdom, and New Zealand. The guiding assumption on the part of all the writers is that the filmmaker is the leading determiner of a motion picture’s ethos, artistic vision, and potential for audience engagement. While not discounting the production team (including screenwriters, actors, and cinematographers, among others), auteur theory recognizes the seminal role of the director as the nucleus of the meaning-making process. With Scott an active and prolific presence in the entertainment industry today, the timeliness of this volume is optimal.

Fossil Legends of the First Americans Adrienne Mayor,2023-04-11 The burnt-red badlands of Montana's Hell Creek are a vast graveyard of the Cretaceous dinosaurs that lived 68 million years ago. Those hills were, much later, also home to the Sioux, the Crows, and the Blackfeet, the first people to encounter the dinosaur fossils exposed by the elements. What did Native Americans make of these stone skeletons, and how did they explain the teeth and claws of gargantuan animals no one had seen alive? Did they speculate about their deaths? Did they collect fossils? Beginning in the East, with its Ice Age monsters, and ending in the West, where dinosaurs lived and died, this richly illustrated and elegantly written book examines the discoveries of enormous bones and uses of fossils for medicine, hunting magic, and spells. Well before Columbus, Native Americans observed the mysterious petrified remains of extinct creatures and sought to understand their transformation to stone. In perceptive creation stories, they visualized the remains of extinct mammoths, dinosaurs, pterosaurs, and marine creatures as Monster Bears, Giant Lizards, Thunder Birds, and Water Monsters. Their insights, some so sophisticated that they anticipate modern scientific theories, were passed down in oral histories over many centuries. Drawing on historical sources, archaeology, traditional accounts, and extensive personal interviews, Adrienne Mayor takes us from Aztec and Inca fossil tales to the traditions of the Iroquois, Navajos, Apaches, Cheyennes, and Pawnees. Fossil Legends of the First Americans represents a major step forward in our understanding of how humans made sense of fossils before evolutionary theory developed.
