Screen Saver: Private Stories of Public Hollywood Nat Segaloff, Hollywood's most glamorous people are far from glitzy when far from home. Nat Segaloff knows. During the1970s, he was a young Boston movie publicist at a time when old-line studios were dying or merging. While an exciting new generation of film school graduates were bringing fresh energy and different sensibilities to American cinema, Nat moved from film publicist to film critic. With his contacts and insider knowledge, he intimately interviewed celebrities who thought they were safe in Boston, 3,000 miles away from the Hollywood's protective bubble. They weren't. Nat finally opens his private files for public scrutiny. Learn the workings of backstage Hollywood. Peer beneath the tinsel of Tinseltown. Some of the stories are moving and some are scandalous, but all are larger-than-life. Discover the preeminent talents and provocative egos of such stars as Michael Caine, Paul Newman, Otto Preminger, Sean Connery, Leonard Nimoy, and Dom DeLuise.

Screen Saver Noel McKeehan,2009-11 Some fairly serious shit has happened in the last sixty years. As fate would have it, I was fairly close to the central point of a lot of that shit - albeit in some cases only briefly; shit it seems, has a fairly long half life. As time has passed I have found it increasingly difficult -impossible really - to turn off a continued remembrance of the events and places and people that inhabited the story boards of all of that shit. They just won't leave me alone. So I have written it, and them, all down.One bookend of the story was my involvement in the war effort, as we called the Vietnam debacle. The other was the near demise of IBM. Between those bookends there lurk a wide variety of people, experiences and events that always seemed, as they occurred, to be coherently additive to the total story.

The use of images and video, when accompanies by appropriate statistical analyses of the inferred data, is of increasing importance for estimating the abundance of species and their age distributions. Robust Methods for the Analysis of Images and Videos for Fisheries Stock Assessment is the summary of a workshop convened by the National Research Council Committee on Applied and Theoretical Statistics to discuss analysis techniques for images and videos for fisheries stock assessment. Experts from diverse communities shared perspective about the most efficient path toward improved automation of visual information and discussed both near-term and long-term goals that can be achieved through research and development efforts.
