The Complete Works of Gabrio Piola: Volume II

Francesco dell'Isola, Ugo Andreaus, Antonio Cazzani, Raffaele Esposito, Luca Placidi, Umberto Perego, Giulio Maier, Pierre Seppecher, 2018-10-06 This book presents the second volume of Piola's original Italian text together with the English-language translation and comments, showing convincingly that Gabrio Piola's work must still be regarded as a modern theory. Gabrio Piola's work has had an enormous impact on the development of applied mathematics and continuum mechanics. As such, a committee of scientific experts took it upon themselves to translate his complete works. In a second step, they commented on Piola's work and compared it to modern theories in mechanics in order to stress Piola's impact on modern science and prove and confirm that he achieved significant milestones in applied mathematics.

Motorbike People Will Rollason, 2019-12-31 In *Motorbike People: Power and Politics on Rwandan Streets*, Will Rollason examines the relationship between power and culture. Rollason looks at what social scientists gain—and lose—by abandoning the assumption that power is a universal feature of human social life. Through an ethnographic account of the lives and livelihoods of motorcycle taxi drivers in Kigali, Rwanda, Rollason depicts how forms of personhood can sit uneasily with conventional accounts of power relationships. From the motorcyclists' everyday dealings with the police and each another to the regulation of their businesses at large and the Rwandan constitution, Rollason depicts the need for varied concepts of power. By allowing concepts of power to proliferate, the social sciences lose the political capacity to engage in questions of justice and make common cause with the oppressed, but gain the ability to rethink what it means to act politically and meet the challenges of a swiftly changing world. This work is recommended for students

and scholars of the social sciences.
