Movies and Mental Illness Danny Wedding, 2023-11-06 The popular, critically acclaimed text on psychopathology in movies – now including the latest movies and more Explores films according to the diagnostic criteria of DSM-5 and ICD-11 Provides psychological ratings of nearly 1,500 films Includes downloadable teaching materials Films can be a powerful aid to learning about mental illness and psychopathology – for practitioners and students in fields as diverse as psychology, psychiatry, social work, medicine, nursing, counseling, literature, or media studies, and for anyone interested in mental health. Watching films relevant to mental health can actually help you become a more productive therapist and a more astute diagnostician. *Movies and Mental Illness*, written by an eminent clinical psychologist (who is also a movie aficionado), has established a reputation as a uniquely enjoyable and highly memorable text for learning about psychopathology. This new edition has been completely revised to explore current issues, such as children's screentime and celebrities with mental illness, and to include the numerous films that have been released since the last edition. The core clinical chapters raise provocative questions about differential diagnosis (according to the DSM-5 and ICD-11) for the primary characters portrayed in the films. Included are also a full index of films; sample course syllabus; ratings of close to 1,500 films; fascinating appendices, such as Top 50 Heroes and Villains, psychotherapists in movies, and misconceptions about mental illness in movies. Accompanying the new edition are downloadable resources for teachers that include critical questions and topics for discussion, as well as fabricated case histories based on movie characters with Mini-Mental State Examinations that help explain, teach, and encourage discussion about important mental health disorders. In addition, the author plans a regular series of online Spotlights articles that will critically examine the psychological content of new movies as they are released.

Politics Go to the Movies Joel R. Campbell, 2022-03-14 This examination of film genres discusses how various films in five genres reflect or comment on political themes and ideas. The author uses constructivist and feminist political theory to examine the development of the political discourse in these films, and considers new ways to conceptualize the relationship between film or television and politics.

American International Pictures Rob Craig, 2019-02-15 American International Pictures was in many ways the missing link between big-budget Hollywood studios, poverty-row B-movie factories and low-rent exploitation movie distributors. AIP first targeted teen audiences with science fiction, horror and fantasy, but soon grew to encompass many genres and demographics--at times, it was indistinguishable from many of the major studios. From *Abby Cadabby* to *Zontar*, this filmography lists more than 800 feature films, television series and TV specials by AIP and its partners and subsidiaries. Special attention is given to American International Television (the TV arm of AIP) and an appendix lists the complete AITV catalog. The author also discusses films produced by founders James H. Nicholson and Samuel Z. Arkoff after they left the company.

100 Great War Movies Robert J. Niemi, 2018-04-04 This book serves as a fascinating guide to 100 war films from 1930 to the present. Readers interested in war movies will learn surprising anecdotes about these films and will have all their questions about the films' historical accuracy answered. This cinematic guide to war movies spans 800 years in its analysis of films from those set in the 13th century Scottish Wars of Independence (*Braveheart*) to those taking place during the 21st-century war in Afghanistan (*Lone Survivor*). World War II has produced the largest number of war movies and continues to spawn recently released films such as *Dunkirk*. This book explores those, but also examines films set during such conflicts as the Napoleonic Wars, the American Civil War, World War I, the Vietnam War, and the wars in Afghanistan and Iraq. The book is organized alphabetically by film title, making it easy to navigate. Each entry is divided into five sections: Background (a brief discussion of the film's genesis and financing); Production (information about how, where, and when the film was shot); Synopsis (a detailed plot summary); Reception (how the film did in terms of box office, awards, and reviews) and Reel History vs. Real History (a brief analysis of the film's historical accuracy). This book is ideal for readers looking to get a vivid behind-the-scenes look at the greatest war movies ever made.

Film, a Modern Art Aaron Sultanik, 1986

Film, Folklore, and Urban Legends Mikel J. Koven, 2008 From *Alien* to *When a Stranger Calls*, many films are based on folklore or employ an urban legend element to propel the narrative. *Film, Folklore and Urban Legends* explores the convergence of folklore with popular cinema studies and focuses on the study of urban legends and how these narratives are used as inspiration for a number of films. Beginning with a general survey of the existing literature on folklore/film, this book addresses discourses of belief, how urban legends provide the organizing principle of some films, and how certain films act out or perform a legend.

Predicting Movie Success at the Box Office Barrie Gunter, 2018-02-20 This book explores the different factors

that can influence a new movie’s prospects at the box office. Looking at factors such as the production budget, distribution model, genre, stars and audience reactions of films, Gunter asks how such aspects may reduce the uncertainties of success so common in the movie industry. The reader is taken on a journey through filmmaking factors that, research suggests, impact box office performance. While box office revenues represent only part of a movie’s earning potential, Gunter highlights how theatrical performances remain central to what the movie business is about. The chapters illustrate how ticket sales are largely influenced by the production budget but also cultural differences and new movie platforms.

Splendors of Latin Cinema R. Hernandez-Rodriguez,2009-11-19 This insightful account analyzes and provides context for the films and careers of directors who have made Latin American film an important force in Hollywood and in world cinema. In this insightful account, R. Hernandez-Rodriguez analyzes some of the most important, fascinating, and popular films to come out of Latin America in the last three decades, connecting them to a long tradition of filmmaking that goes back to the beginning of the 20th century. Directors Alejandro Inarritu, Guillermo del Toro, Alfonso Cuaron, and Lucretia Martel and director/screenwriter Guillermo Arriaga have given cause for critics and public alike to praise a new golden age of Latin American cinema. Splendors of Latin Cinema probes deeply into their films, but also looks back at the two most important previous moments of this cinema: the experimental films of the 1960s and 1970s, as well as the stage-setting movies from the 1940s and 1950s. It discusses films, directors, and stars from Spain (as a continuing influence), Mexico, Cuba, Brazil, Argentina, Peru, and Chile that have contributed to one of the most interesting aspects of world cinema.

Cinema and the Festivalization of Capitalism Ann Vogel,2023-01-09 Film festivals around the world are in the business of making experiences for audiences, elites, industry, professionals, and even future cultural workers. Cinema and the Festivalization of Capitalism explains why these non-profit organizations work as they do: by attracting people who work for free, while appealing to businesses and policymakers as a cheap means to illuminate the creative city and draw attention to film art. Ann Vogel’s unprecedented systematic sociological analysis thus provides firm evidence for the ‘festival effect’, which situates the festival as a key intermediary in cinema value chains, yet also demonstrates the impact of such event culture on cultural workers’ lives. By probing the various resources and institutional pillars ensuring that the festivalization of capitalism is here to stay, Vogel urges us to think critically about publicly displayed benevolence in the context of cinema—and beyond.
