Advances in Multimedia Information Processing - PCM

2005 Yo-Sung Ho, 2005-10-31 The two volume set LNCS 3767 and LNCS 3768 constitutes the refereed proceedings of the 6th Pacific Rim Conference on Multimedia, PCM 2005, held in Jeju Island, Korea in November 2005. The 181 revised papers presented were carefully reviewed and selected from a total of 570 submissions. The papers cover a wide range of topics, including all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues. Besides papers that focus on traditional topics, such as multimedia communications, audio-visual compressions, multimedia security, image and signal processing techniques, and multimedia data processing, there are also artistic papers which need not to be strictly technical.

Digital Video: An Introduction to MPEG-2 Barry G.

Haskell, Atul Puri, Arun N. Netravali, 2007-05-08 Digital Video offers comprehensive coverage of the MPEG-2 audio/visual digital compression standard. The treatment includes the specifics needed to implement an MPEG-2 Decoder, including the syntax and semantics of the coded bitstreams. Since the MPEG-2 Encoders are not specified by the standard, and are actually closely held secrets of many vendors, the book only outlines the fundamentals of encoder design and algorithm optimization.

A Practical Guide to Video and Audio Compression Cliff

Wootton, 2005-04-28 Learn all about Codecs--how they work, as well as design and implementation with this comprehensive, easy-to-use guide to compression. After reading this book, you will be able to prepare and distribute professional audio and video on any platform including streamed to the web, broadcast on-air, stored in PVRs, Burned onto CD-ROMs or DVDs, delivered by broadband, or viewed in Kiosk applications, PDA devices, and mobile phones.

The MPEG-4 Book Fernando C. N. Pereira, Touradj

Ebrahimi, 2002 In this book, two leaders of the MPEG-4 standards community offer an in-depth, targeted guide to the MPEG-4

standard and its use in real, cutting-edge applications. The authors demonstrate how MPEG-4 addresses the rapidly evolving needs of telecommunications, broadcast, interactive, and converged applications more successfully than any previous standard.

Interactive Distributed Multimedia Systems and Telecommunication Services Michel Diaz,Philippe

Owezarski,Patrick Senac,2007-07-23 The 1999 International Workshop on Interactive Distributed Multimedia Systems and Telecommunication Services (IDMS) in Toulouse is the sixth in a series that started in 1992. The previous workshops were held in Stuttgart in 1992, Hamburg in 1994, Berlin in 1996, Darmstadt in 1997, and Oslo in 1998. The area of interest of IDMS ranges from basic system technologies, such as networking and operating system support, to all kinds of teleservices and distributed multimedia applications. Technical solutions for telecommunications and distributed multimedia systems are merging and quality-of-service (QoS) will play a key role in both areas. However, the range from basic system technologies to distributed multimedia applications and teleservices is still very broad and we have to understand the implications of multimedia applications and their requirements for middleware and networks. We are challenged to develop new and more fitting solutions for all distributed multimedia systems and telecommunication services to meet the requirements of the future information society.

MosaicTM for Windows® Richard Raucci,2012-12-06 Mosaic for Windows is an informative book on how to use the most popular Internet navigation tool ever developed. By focussing on the PC Windows version of Mosaic (NCSA, AIR Mosaic, and Spyglass), including Web browsers like NetScape, WinWeb and WebSurfer, this book will provide an easy-to-follow guide to using a PC and Mosaic to browse, collect, and discover information and resources across the entire electronic world.

The Business of Streaming and Digital Media Dan Rayburn,Michael Hoch,2012-08-06 This book answers the

question, What is the value of using streaming and digital media for my business and what can I expect in return? The Business of Steaming and Digital Media gives you a concise and direct analysis of how to implement a scalable, profitable venture, as well as the common and hidden pitfalls to avoid in your business. By focusing on both the business implications and technical differences between rich media and traditional broadcast distribution, you will learn how to gain significant time-to-market and cost-saving advantages by effectively using streaming and digital media technologies.

Security and Privacy in Digital Rights Management Tomas Sander, 2003-08-01 The ACM Workshop on Security and Privacy in Digital Rights Management is the first scientific workshop with refereed proceedings devoted solely to this topic. The workshop was held in conjunction with the Eighth ACM Conference on Computer and Communications Security (CCS-8) in Philadelphia, USA on November 5, 2001. Digital Rights Management technology is meant to provide end-to-end solutions for the digital distribution of electronic goods. Sound security and privacy features are among the key requirements for such systems. Fifty papers were submitted to the workshop, quite a success for a first-time workshop. From these 50 submissions, the program committee selected 15 papers for presentation at the workshop. They cover a broad area of relevant techniques, including cryptography, system

architecture, and cryptanalysis of existing DRM systems. Three accepted papers are about software tamper resistance, an area about which few scientific articles have been published before. Another paper addresses renewability of security measures. Renewability is another important security technique for DRM systems, and I hope we will see more publications about this in the future. I am particularly glad that three papers cover economic and legal aspects of digital distribution of electronic goods. Technical security measures do not exist in a vacuum and their effectiveness interacts in a number of ways with the environment for legal enforcement. Deploying security and anti-piracy measures adequately requires furthermore a good understanding of the business models that they are designed to support.

Interactive TV Standards Steven Morris, Anthony Smith-Chaigneau, 2012-08-06 For any digital TV developer or manager, the maze of standards and specifications related to MHP and OCAP is daunting—you have to patch together pieces from several standards to gather all the necessary knowledge you need to compete worldwide. The standards themselves can be confusing, and contain many inconsistencies and missing pieces. Interactive TV Standards provides a guide for actually deploying these technologies for a broadcaster or product and application developer. Understanding what the APIs do is essential for your job, but understanding how the APIs work and how they relate to each other at a deeper level helps you do it better, faster and easier. Learn how to spot when something that looks like a good solution to a problem really isn't. Understand how the many standards that make up MHP fit together, and implement them effectively and quickly. Two DVB insiders teach you which elements of the standards that are needed for digital TV, highlight those elements that are not needed, and explain the special requirements that MHP places on implementations of these standards. Once you've mastered the basics, you will learn how to develop products for US, European, and Asian markets—saving

time and money. By detailing how a team can develop products for both the OCAP and MHP markets, Interactive TV Standards teaches you how to leverage your experience with one of these standards into the skills and knowledge needed to work with the critical, related standards. Does the team developing a receiver have all the knowledge they need to succeed, or have they missed important information in an apparently unrelated standard? Does an application developer really know how to write a reliable piece of software that runs on any MHP or OCAP receiver? Does the broadcaster understand the business and technical issues well enough to deploy MHP successfully, or will their project fail? Increase your chances of success the first time with Interactive TV Standards.

Field-Programmable Logic and Applications Gordon Brebner, 2001-08-15 This book constitutes the refereed proceedings of the 11th International Conference on Field-Programmable Logic and Application, FPL 2001, held in Belfast, Northern Ireland, UK, in August 2001. The 56 revised full papers and 15 short papers presented were carefully reviewed and selected from a total of 117 submissions. The book offers topical sections on architectural framework, place and route, architecture, DSP, synthesis, encryption, runtime reconfiguration, graphics and vision, networking, processor interaction, applications, methodology, loops and systolic, image processing, faults, and arithmetic.

Mathematics in Berlin Heinrich Begehr, Helmut Koch, Jürg Kramer, Norbert Schappacher, Ernst-Jochen Thiele, 1998-07-21 This little book is conceived as a service to mathematicians attending the 1998 International Congress of Mathematicians in Berlin. It presents a comprehensive, condensed overview of mathematical activity in Berlin, from Leibniz almost to the present day (without, however, including biographies of living mathematicians). Since many towering figures in mathematical history worked in Berlin, most of the chapters of this book are concise biographies. These

are held together by a few survey articles presenting the overall development of entire periods of scientific life at Berlin. Overlaps between various chapters and differences in style between the chapters were inevitable, but sometimes this provided opportunities to show different aspects of a single historical event - for instance, the Kronecker-Weierstrass controversy. The book aims at readability rather than scholarly completeness. There are no footnotes, only references to the individual bibliographies of each chapter. Still, we do hope that the texts brought together here, and written by the various authors for this volume, constitute a solid introduction to the history of Berlin mathematics.

Digital Video Essentials Erica Sadun, 2006-12-26 The Perfect Companion for Your Digital Video Camera Digital video brings the power of studio production to the personal computer. Hands-on Guide to Webcasting Steve Mack, Dan Rayburn, 2006

In *The Hands on Guide to Live Webcasting*, industry experts address the fastest-growing application for streaming media in all environments from corporations to educational applications--and teach you how to effectively reach your audience. By providing an end-to-end technical overview of the webcasting process, this guide provides both the depth and breadth necessary for mastery of the subject. Webcasting can save valuable resources but many consumers would rather suffer the consequences than attempt to decipher the little information heretofore available on the subject. Now, in one authoritative guide, lies all the answers to saving money, time, and space for your enterprise through webcasting. * Helps you to reach more people, more effectively * This book features the triple threat--breadth, depth, and authority * Step-by-step instructions and advice unique to the technical and business challenges of webcasting * Case studies explore webcasting in corporate, educational, institutional, and consumer environments

Recent Advances in Multimedia Signal Processing and Communications Mislav Grgic, Kresimir Delac, Mohammed Ghanbari, 2009-10-14 The rapid increase in computing power and communication speed, coupled with computer storage facilities availability, has led to a new age of multimedia applications. This book presents recent advances in Multimedia Signal Processing and Communications.

Multimedia Applications, Services and Techniques - ECMAST'98

David Hutchinson, Ralf Schäfer, 1998-05-18 This book constitutes the refereed proceedings of the Third European Conference on Multimedia Applications, Services and Techniques, ECMAST '98, held in Berlin, Germany, in May 1998. The 40 revised full papers presented were carefully selected for inclusion in the book by the program committee. The topics covered include multimedia networks and protocols; coded representation of images, sound,

and data; multimedia delivery on broadcast and telecom networks; servers and storage architectures; advanced multimedia terminals and in house networks; multimedia services; Internet and multimedia scenario; and multimedia trials.

Value-Based Software Engineering Stefan Biffl, Aybuke Aurum, Barry Boehm, Hakan Erdogmus, Paul Grünbacher, 2006-02-23 The IT community has always struggled with questions concerning the value of an organization's investment in software and hardware. It is the goal of value-based software engineering (VBSE) to develop models and measures of value which are of use for managers, developers and users as they make tradeoff decisions between, for example, quality and cost or functionality and schedule – such decisions must be economically feasible and comprehensible to the stakeholders with differing value perspectives. VBSE has its roots in work on software engineering economics, pioneered by Barry Boehm in the early 1980s. However, the emergence of a wider scope that defines VBSE is more recent. VBSE extends the merely technical ISO software engineering definition with elements not only from economics, but also from cognitive science, finance, management science, behavioral sciences, and decision sciences, giving rise to a truly multi-disciplinary framework. Biffl and his co-editors invited leading researchers and structured their contributions into three parts, following an introduction into the area by Boehm himself. They first detail the foundations of VBSE, followed by a presentation of state-of-the-art methods and techniques. The third part demonstrates the benefits of VBSE through concrete examples and case studies. This book deviates from the more anecdotal style of many management-oriented software engineering books and so appeals particularly to all readers who are interested in solid foundations for high-level aspects of software engineering decision making, i.e., to product or project managers driven by economics and to software engineering researchers and students.
