**Programming Windows 10 Via UWP** Roger Deutsch,2017-12 Part 1: The first book in the Program Win10 Series contains Chapters 1 - 8.All source code is available from GitHub at <https://github.com/raddevus/Win10UWPI> have written this book to lead readers into the story of creating apps for the Windows 10 Desktop.This book contains a complete flow so that you can pick it up, read through it and see all the screenshots that you will experience when you begin developing your own Windows 10 app. This book brings the reader into the story of developing Win10 apps and allows the reader to peek inside the head of a developer as he creates complete Win10 apps.How will this book work?Programming Windows 10 For Beginners (and Advanced devs)There are two ways you can learn to program computers: Read a long book that tells you all about the history of programming and lists all the things you can do.Start building projects. Begin at the beginning and go on from there. Programming Windows 10 (PW10) will use the second method to teach. This method makes learning faster and here's why. Read Entire Fish Encyclopedia The first method is similar to reading the entire Fish Encyclopedia so you can know how to catch a fish. Sure, there's a lot of information in the encyclopedia that may be helpful, but perhaps you first want to decide if you even like fishing. Start Fishing The second method gets you fishing so you can feel what it's like to collect bait, put the bait on a hook, cast your line, wait, not catch a fish, and finally (hopefully) catch a fish. There Are Things You Won't Know Using the second method, there are a lot of things that you won't know as you fish. But, those things only matter if you decide to continue fishing. So, as long as you feel comfortable not knowing some things at first, you will like the way this book teaches Windows programming. Try It, Learn It In this book we try it and then we learn it. We build it first and see it work and then we figure out how it works and why it behaves the way it does. Which Is More Memorable? The try it learn it method is more fun and ends up being more memorable too. Which do you think you would remember more? Reading the Encyclopedia of Fish Going on a fishing trip. Right. Going on the fishing trip is a whole lot more fun, a better way to learn and more memorable.What Is the Focus of Programming Windows 10?My focus here is on creating UWAs (Universal Windows Apps) with a focus on creating apps for the Windows 10 desktop. Yes, the dream is to develop an app and deploy it to any type of device (PC, laptop, pad (Surface), phone or whatever). However, the focus here in this book is creating desktop apps that will keep those other platforms in mind but not focus directly on them.

**App Blanks** Mirko L. Cukich,2010-09-09 In the modern technology driven society we live in, the Apple iPad, iPhone and iPod touch have taken it by storm. Every day the desire to own one of these devices grows. Currently, there are over 250,000 different apps available in the App store and growing. Everyday new ideas and apps are submitted. Many will make it but a lot won't. One of the reasons why some make it and others don't is because they took the time to plan out their app, see how it works & looks before even writing down one piece of code. This simple process of spending time in concept and design changes everything. It's a critical part of the app evolution process to have a good, successful and well thought out app. This book gives you a tool to do just that. It is setup to give you a place to put down your initial app scope, and then go more into detail on what your screen will do. Followed by the chance to sketch it out and see your app come to life before going into the X-code to create it. By having a place where you can create all your screens with the details it saves you time and money by allowing you to change and create new options that might be a bit more complicated to do if you just started coding from the beginning. It also has a place for you to put down your notes, create a description for the app store to put up once your app has been approved and even a place to create your apps icon too. This portable canvas allows you to create

designs for the Apple iPad and iPhone / iPod Touch environment. It gives you an easy to carry portable lab to experiment and allow your ideas to flourish right before your eyes.
