*Making Music on Your PC* Victoria Camp,1997 *Making Music On Your PC* is written for beginners who want to learn how to make and play music on their PC, with or without a boost from the Internet. It's for those who want to play as well as for those who need to know about business applications for sound, such as embedding music in presentation documents. The CD-ROM contains a one-minute sound track for sampling, plus shareware music utilities.

I Believe in Music Ikutar\_ Kakehashi,2002 (Book). Published to coincide with the 30th anniversary of the Roland Corporation, this is the inspiring and heartfelt memoir of Ikutaro Kakehashi, a pioneering figure in electronic music instruments and the company's visionary founder. From war-torn Japan to his first watch repair business to the dawn of and subsequent enormous leaps of electronic musical instruments, Kakehashi's story is sometimes wry, sometimes touching, always wise. Through it all, Kakehashi has believed in music above else: his first priority has always been an unwavering passion for expanding the potential for artistic expression. Everyone from music aficionados to those looking for time-tested business savvy will enjoy his unique story. The book features fantastic photos throughout, including an 8-page full-color section. Ikutaro Kakehashi founded the Roland Corporation in 1972. He lives in Hosoe-cho, Hamamatsu City, Japan. Robert Olsen worked for 25 years in the international music trade before switching careers to become a college instructor and free-lance author. He lives in Northbrook, IL.

*Absolute Radio* Phillip Nyakpo,2022-09-06 From the heart of Africa, a spellbinding true story of entrepreneurship, media, culture, and tradition, all tastefully rolled into one! *Absolute Radio* is an authentic story of girls and boys who became women and men - and heroes - on the wings of a radio station. Running the course of 25 years, the story comes from the culturally stylish twin city of Sekondi-Takoradi in Ghana, with global footprints. It is the

most tantalising and ground-breaking body of work about Ghana's private broadcasting industry. The author, former journalist Phillip Nyakpo, is himself an eye-witness and a participant in these true events. From his base in Perth, Australia, Phillip interviewed women and men across four continents who made it happen over a quarter of a century. The result is that he opened up to the world, a character and spirit of Africa that is all too often missing. In telling the story, he writes a compelling narrative that is delicate, witty, eye-opening, and wonderfully inspiring.

*Composing Music with Computers* Eduardo Miranda, 2001-04-27 Focuses on the role of the computer as a generative tool for music composition. Miranda introduces a number of computer music composition techniques ranging from probabilities, formal grammars and fractals, to genetic algorithms, cellular automata and neural computation. Anyone wishing to use the computer as a companion to create music will find this book a valuable resource. As a comprehensive guide with full explanations of technical terms, it is suitable for students, professionals and enthusiasts alike. The accompanying CD-ROM contains examples, complementary tutorials and a number of composition systems for PC and Macintosh platforms, from demonstration versions of commercial programs to exciting, fully working packages developed by research centres world-wide, including Nyquist, Bol Processor, Music Sketcher, SSEYO Koan, Open Music and the IBVA brainwaves control system, among others. This book will be interesting to anyone wishing to use the computer as a companion to create music. It is a comprehensive guide, but the technical terms are explained so it is suitable for students, professionals and enthusiasts alike.

*Making Music with Computers* Bill Manaris, Andrew R. Brown, 2015-09-15 Teach Your Students How to Use Computing to Explore Powerful and Creative Ideas In the twenty-first century, computers have become indispensable in music making, distribution, performance, and consumption. *Making Music with Computers: Creative Programming in Python* introduces important concepts and skills necessary to generate music with computers. It interweaves computing pedagogy with musical concepts and creative activities, showing students how to integrate the creativity and design of the arts with the mathematical rigor and formality of computer science. The book provides an introduction to creative software development in the Python programming language. It uses innovative music-creation activities to illustrate introductory computer programming concepts, including data types, algorithms, operators, iteration, lists, functions, and classes. The authors also cover GUIs, event-driven programming, big data, sonification, MIDI programming, client-server programming, recursion, fractals, and complex system dynamics. Requiring minimal musical or programming experience, the text is designed for courses in introductory computer science and computing in the arts. It helps students learn computer programming in a creative context and understand how to build computer music applications. Also suitable for self-study, the book shows musicians and digital music enthusiasts how to write music software and create algorithmic music compositions. Web Resource A supplementary website (<http://jythonMusic.org>) provides a music library and other software resources used in the text. The music library is an extension of the jMusic library and incorporates other cross-platform programming tools. The website also offers example course and associated media resources.
