These products of The Neptune Project will be able to build a better future under the sea, safe from the barren country's famine, wars, and harsh laws. But there are some very big problems: no one asked Nere if she wanted to be a science experiment, the other Neptune kids aren't exactly the friendliest bunch, and in order to reach the safe haven of the Neptune colony, Nere and her fellow mutants must swim through hundreds of miles of dangerous waters, relying only on their wits, dolphins, and each other to evade terrifying undersea creatures and a government that will stop at nothing to capture the Neptune kids . . . dead or alive. Fierce battles and daring escapes abound as Nere and her friends race to safety in this action-packed aquatic adventure.

Young Adult Resources Today Don Latham, Melissa Gross, 2014-05-21 *Young Adult Resources Today: Connecting Teens with Books, Music, Games, Movies, and More* is the first comprehensive young adult library services textbook specifically written for today's multidimensional information landscape. The authors integrate a research-focused information behavior approach with a literature-focused resources approach, and bring together in one volume key issues related to research, theory, and practice in the provision of information services to young adults. Currently, no single book addresses both YA information behaviors and information resources in any detail; instead, books tend to focus on one and give only cursory attention to the other. Key features of this revolutionary book include its success in: Integrating theory, research, and practice Integrating implications for practice throughout the book Integrating knowledge of resources with professional practice as informed by research Integrating both print and electronic formats throughout—within the resource chapters (including websites and social media) Latham and Gross accomplish all this while, paying particular attention to the socially constructed nature of young adulthood, diversity, YA development, and multiple literacies. Their coverage of information landscapes covers literature (with detailed coverage of both genres and subgenres), movies, magazines, web sites, social media, and gaming. The final chapter covers navigating information landscapes, focusing on real and virtual YA spaces, readers' advisory, programming, and collaboration. Special attention is paid to program planning and evaluation.

The Wisdom of Insecurity Alan Watts, 2011-11-16 An acclaimed philosopher shows us how—in an age of unprecedented anxiety—we can find fulfillment by embracing the present and living more fully in the now. He is the perfect guide for a course correction in life (from the Introduction by Deepak Chopra). The brain can only assume its proper behavior when consciousness is doing what it is designed for: not writhing and whirling to get out of present experience, but being effortlessly aware of it. Alan Watts draws on the wisdom of Eastern philosophy and religion in this timeless and classic guide to living a more fulfilling life. His central insight is more relevant now than ever: when we spend all of our time worrying about the future and lamenting the past, we are unable to enjoy the present moment—the only one we are actually able to inhabit. Watts offers the liberating message that true certitude and security come only from understanding that impermanence and insecurity are the essence of our existence. He highlights the futility of endlessly chasing moving goalposts, whether they consist of financial success, stability, or escape from pain, and shows that it is only by acknowledging what we do not know that we can learn anything truly worth knowing. In *The Wisdom of Insecurity*, Watts explains complex concepts in beautifully simple terms, making this the kind of book you can return to again and again for comfort and insight in challenging times. “Perhaps the foremost interpreter of Eastern disciplines for the contemporary West, Watts had the rare gift of ‘writing beautifully the unwritable.’” —Los Angeles Times

Learning Science Through Computer Games and Simulations National Research Council,Division of Behavioral and Social Sciences and Education,Board on Science Education,Committee on Science Learning: Computer Games, Simulations, and Education,2011-04-12 At a time when scientific and technological competence is vital to the nation's future, the weak performance of U.S. students in science reflects the uneven quality of current science education. Although young children come to school with innate curiosity and intuitive ideas about the world around them, science

classes rarely tap this potential. Many experts have called for a new approach to science education, based on recent and ongoing research on teaching and learning. In this approach, simulations and games could play a significant role by addressing many goals and mechanisms for learning science: the motivation to learn science, conceptual understanding, science process skills, understanding of the nature of science, scientific discourse and argumentation, and identification with science and science learning. To explore this potential, *Learning Science: Computer Games, Simulations, and Education*, reviews the available research on learning science through interaction with digital simulations and games. It considers the potential of digital games and simulations to contribute to learning science in schools, in informal out-of-school settings, and everyday life. The book also identifies the areas in which more research and research-based development is needed to fully capitalize on this potential. *Learning Science* will guide academic researchers; developers, publishers, and entrepreneurs from the digital simulation and gaming community; and education practitioners and policy makers toward the formation of research and development partnerships that will facilitate rich intellectual collaboration. Industry, government agencies and foundations will play a significant role through start-up and ongoing support to ensure that digital games and simulations will not only excite and entertain, but also motivate and educate.
