*Command & Conquer (tm)* Keith R.A. DeCandido,2009-07-22 The official novel of the bestselling real-time strategy franchise • In the twenty-first century, Earth is infested with Tiberium, an alien substance that could be humanity's salvation . . . or its downfall.

Though Tiberium is a resource that could solve the world's energy crisis, it is also incredibly destructive, spreading disease, death, and devastation. Tiberium has divided the planet into two factions: the Global Defense Initiative (GDI), which tries to maintain order at any cost, and the Brotherhood of Nod, a terrorist organization turned superpower that believes with religious fervor in the potential of Tiberium. The groups have already fought two world wars, killing millions. Now, in the year 2047, a vicious Nod attack compels GDI to mobilize. Another epic global war is being waged, with humanity's fate in the balance. One of GDI's top units, the 22nd Infantry Division, must halt Nod's agenda and keep the world from devolving into further chaos and loss of life. But in the midst of heavy fighting all over the world, mysterious visitors arrive . . . who may spell doom for the human race.

*Programming Erlang* Joe Armstrong, 2013-09-23 A multi-user game, web site, cloud application, or networked database can have thousands of users all interacting at the same time. You need a powerful, industrial-strength tool to handle the really hard problems inherent in parallel, concurrent environments. You need Erlang. In this second edition of the bestselling *Programming Erlang*, you'll learn how to write parallel programs that scale effortlessly on

multicore systems. Using Erlang, you'll be surprised at how easy it becomes to deal with parallel problems, and how much faster and more efficiently your programs run. That's because Erlang uses sets of parallel processes-not a single sequential process, as found in most programming languages. Joe Armstrong, creator of Erlang, introduces this powerful language in small steps, giving you a complete overview of Erlang and how to use it in common scenarios. You'll start with sequential programming, move to parallel programming and handling errors in parallel programs, and learn to work confidently with distributed programming and the standard Erlang/Open Telecom Platform (OTP) frameworks. You need no previous knowledge of functional or parallel programming. The chapters are packed with hands-on, real-world tutorial examples and insider tips and advice, and finish with exercises for both beginning and advanced users. The second edition has been extensively rewritten. New to this edition are seven chapters covering the latest Erlang features: maps, the type system and the Dialyzer, WebSockets, programming idioms, and a new stand-alone execution environment. You'll write programs that dynamically detect and correct errors, and that can be upgraded without stopping the system. There's also coverage of rebar (the

de facto Erlang build system), and information on how to share and use Erlang projects on github, illustrated with examples from cowboy and bitcask. Erlang will change your view of the world, and of how you program. What You Need The Erlang/OTP system. Download it from [erlang.org](http://erlang.org).

**Overcoming School Refusal** Joanne Garfi, 2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. **Overcoming School Refusal** helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term

consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Fortificaciones de Matanzas, 1693-1876 Odlanyer Hernandez de Lara, Johanset Orihuela, 2019-09-26 La defensa de la bahía de Matanzas, en el occidente de Cuba, constituyó uno de los proyectos fundamentales para proteger las cercanías de La Habana y la nueva población fundada en 1693. Para ello se iniciaron las obras del Castillo de San Severino, inmueble que inauguró los disímiles proyectos para la fortificación de la rada. Para ello se construyeron las baterías de La Vigía, El Morrillo, Peñas Altas y Los Prácticos, además de un torreón. A partir de la planimetría y otros documentos históricos procedentes de archivos cubanos y españoles, se construye una nueva narrativa que contribuye a conocer la historia de estos baluartes que jugaron un rol significativo en el desarrollo regional. Su conocimiento aporta a la necesaria conservación de las fortificaciones matanceras como patrimonio de todos.

*Creativity and Learning* Beth A. Hennessey, Teresa Amabile, 1987 The pamphlet reviews research on creativity and

applies it to the learning process. After discussing the definition and measurement of creativity, the components of creative performance are outlined, including domain-relevant skills, creativity-relevant skills, and intrinsic task motivation. Factors which destroy students' creativity are noted, such as having children work for an expected reward, setting up competitive situations, having children focus on expected evaluation, using plenty of surveillance, and setting up restricted-choice situations. Strategies for nurturing and encouraging intrinsic motivation and creativity in classroom settings are explored. A bibliography and a list of resources on thinking skills conclude the pamphlet. (PB)
