Become an Accelerator Leader Alvin Rohrs, 2019-06-12 Fighter pilots experience the fastest acceleration on earth. However, during training, the expression, “that pilot is all thrust and no vector,” can be heard. It describes a pilot who is going nowhere fast. That concept holds true in our lives and especially in business. We live in an age of instant information, where everything moves at the speed of light. Do you ever feel that you are going fast but getting nowhere? Accelerator Leaders learn how to focus and act so that their acceleration results in real impact. Discover how to be an Accelerator Leader to accelerate yourself, those around you and your organization. Book Review 1: Alvin Rohrs is a remarkable leader. He Accelerated the growth of a small regional non-profit organization dedicated to inspiring students to improve the world through entrepreneurial action, Students In Free Enterprise (SIFE), to a place where it has become the largest organization of its kind in the world, now known as Enactus, leveraging the resources of over 500 corporate partners, in 36 countries, engaged with over 1,700 colleges and universities, nearly 70,000 students, and impacting over a million people a year. Without Alvin at the helm of the ship, this extraordinary story of growth and contribution is impossible to imagine. Leveraging his extraordinary knowledge and experiences, Alvin is a gifted and inspiring speaker about everything from leadership, to accelerating organization and personal growth, to leading a meaningful and fulfilling everyday life. His wit, wisdom, and storytelling are second to none. I highly recommend him as a speaker extraordinaire. -- Douglas R. Conant, Former Chairman SIFE/Enactus Founder and CEO Conant Leadership; Retired CEO Campbell Soup Company; Former Chairman Avon Products Book Review 2: Not only is Alvin Rohrs one of the most moving and powerful speakers I know he is also a great coach on what it means to be a leader and really move an organization towards success. He quickly grasps challenges and he understands people. He is perceptive and knows how to organize and motivate people to solve problems. -- Matt Blunt, 54th Governor of Missouri Book Review 3: [His] stories themselves and [his] story telling style make this [book] a joy to read. -- Doug McMillon, CEO of Walmart

The Safety Promise and Challenge of Automotive Electronics National Research Council (U.S.). Committee on Electronic Vehicle Controls and Unintended Acceleration, 2012 TRB has released the final version of TRB Special Report 308: The Safety Promise and Challenge of Automotive Electronics: Insights from Unintended Acceleration, which examines how the National Highway Traffic Safety Administration (NHTSA) regulatory, research, and defect investigation programs can be strengthened to meet the safety assurance and oversight challenges arising from the expanding functionality and use of automotive electronics. The report gives particular attention to the NHTSA response to consumer complaints of vehicles accelerating unintentionally and to concerns that faulty electronic systems may have been to blame. The committee that produced the report found that the increasingly capable and complex electronics systems being added to automobiles present many opportunities for making driving safer but also present new demands for ensuring their safe performance. These safety assurance demands pertain both to the automotive industry development and deployment of electronics systems and to the safety oversight role of NHTSA. With regard to the latter, the committee recommends that NHTSA give explicit consideration to the oversight challenges arising from automotive electronics and that the agency develop and articulate a long term strategy for meeting these challenges.--Provided by publisher.

Social Acceleration Hartmut Rosa,2013-06-11 Hartmut Rosa advances an account of the temporal structure of society from the perspective of critical theory. He identifies three categories of change in the tempo of modern social life: technological acceleration, evident in transportation, communication, and production; the acceleration of social change, reflected in cultural knowledge, social institutions, and personal relationships; and acceleration in the pace of life, which happens despite the expectation that technological change should increase an individual's free time. According to Rosa, both the structural and cultural aspects of our institutions and practices are marked by the shrinking of the present, a decreasing time period during which expectations based on past experience reliably match the future. When this phenomenon combines with technological acceleration and the increasing pace of life, time seems to flow ever faster, making our relationships to each other and the world fluid and problematic. It is as if we are standing on slipping slopes, a steep social terrain that is itself in motion and in turn demands faster lives and technology. As Rosa deftly shows, this self-reinforcing feedback loop fundamentally determines the character of modern life.

Environmental Restoration Acceleration Report Barry Leonard,1999-06 The Dept. of Energy (DOE) has made great progress in accelerating the pace of cleanup over the past few years, and current estimates show that 80% of the Environmental Management site cleanups will be completed by the year 2021. These changes reflect a more focused technical baseline -- oriented towards results and fueled by performance-based contracts -- and a fundamental change in strategy, which involves: addressing urgent risks first; stabilizing sites; investing in technology development and basic science; reducing mortgage costs; and basing decisions on future land use considerations.
