Negative Sentences in the Languages of Europe Giuliano Bernini, Paolo Ramat, 2012-10-25 The series is a platform for contributions of all kinds to this rapidly developing field. General problems are studied from the perspective of individual languages, language families, language groups, or language samples. Conclusions are the result of a deepened study of empirical data. Special emphasis is given to little-known languages, whose analysis may shed new light on long-standing problems in general linguistics.

Negative Actions Jonathan D. Payton, 2021-02-25 Negative actions (intentional omissions, refrainments, etc.) seem to be genuine actions. The standard metaphysical theories of action are event-based: they treat actions as events of a special kind. But it seems that many (and perhaps all) negative actions are, not events, but absences thereof. In this book, I provide a comprehensive treatment of this problem and its solution. I trace the appearance that negative actions are mere absences to the widely-assumed view that negative action sentences (sentences which describe an

agent as omitting, refraining, etc.) are negative existentials, reporting the non-occurrence of an event of a certain kind. I argue, on the contrary, that such sentences report the occurrence of an event, not the absence of one. Moreover, I show how these events can be identified with ordinary, positive events of the sort we should already have in our ontology. In developing these views, I provide a comprehensive picture of the metaphysics of negative actions, the nature of our thought and talk about them, and their place in a theory of action and agency--

Negation and Negative Dependencies Hedde Zeijlstra, 2022-10 This book presents a novel overarching account of negation and negative dependencies, based on novel data from language variation, language acquisition, and language change. Negation is a universal property of natural language, but languages can significantly differ in how they express it: there is variation in the form and position of negative elements, the number of manifestations of negative morphemes, and in the

restrictions on the use of Negative and Positive Polarity Items. In this volume, Hedde Zeijlstra explores the hypothesis that all known syntactic, semantic, pragmatic, and lexical ways of encoding dependencies should also be attested in the domain of negation, unless they are independently ruled out. He shows that the pluriform landscape of negative dependencies and markers of negation that emerges has broader implications for theories of syntax and semantics and their interface.

The Mystery Method Mystery, Chris Odom, 2007-02-06 One of the most admired men in the world of seduction (The New York Times) teaches average guys how to approach, attract and begin intimate relationships with beautiful women For every man who always wondered why some guys have all the

luck, Mystery, considered by many to be the world's greatest pickup artist, finally reveals his secrets for finding and forming relationships with some of the world's most beautiful women. Mystery gained mainstream attention for his role in Neil Strauss's New York Times bestselling exposé, *The Game*. Now he has written the definitive handbook on the art of the pickup. He developed his unique method over years of observing social dynamics and interacting with women in clubs to learn how to overcome the guard shield that many women use to deflect come-ons from average frustrated chumps. The *Mystery Method: How to Get Beautiful Women Into Bed* shares tips such as: *Give more attention to her less attractive friend at first, so your target will get jealous and try to win your attention. *Always approach a target within 3 seconds of noticing her. If a woman senses your hesitation, her perception of your value will be lower. *Don't be picky. Approach as many groups of people in a bar as you can and entertain them with fun conversation. As you move about the room, positive perception of you will grow. Now it's easy to meet anyone you want. *Smile. Guys who don't get laid, don't smile.

Modality, Aspect and Negation in Persian Azita H. Taleghani,2008-06-26 This monograph presents a morpho-syntactic investigation on modality, aspect, and negation by concentrating on Persian, and is designed to contribute to theoretical linguistics and the study of Iranian languages. The analysis is based on the Minimalist program. This research challenges the idea that the syntactic structure maps on the semantic interpretation or vice versa. The discussion presented in this monograph shows that the syntactic structure of Persian modals is uniform no matter if the modals are

interpreted as having root or epistemic readings. Although it is claimed that modals are raising constructions in different languages, modals in Persian, which does not have subject-raising constructions, show a different syntactic behavior. Furthermore, the structural analysis of the interaction of Persian modals and negation shows that because of the scope interaction of negation and modals, the syntactic structure of modals with respect to negation mostly corresponds to the semantic interpretation of modals.
