Gender Equality and Social Inclusion Assessment of the Energy Sector Asian Development Bank,2018-02-01 In Nepal, deeply embedded structural conditions determined by gender, caste or ethnicity, religion, language, and even geography have made access to and benefits from energy resources highly uneven. Women, the poor, and excluded groups experience energy poverty more severely. To address this imbalance, the government and other stakeholders have introduced measures to achieve greater gender equality and social inclusion. This study is an attempt to understand the factors affecting the outcomes and extent to which the initiatives have fostered gender equality and social inclusion. The study recommends measures to facilitate the distributive impact of energy sector development if Nepal is to meet its target of ensuring energy access to all.

*Historical Dictionary of Nepal* Nanda R. Shrestha,2017-02-10 Nepal is a living example of contrasts and contradictions.It is a country that was born in medieval times, grew up in the 16th century, and now finds itself engulfed in the high-tech gadgets and material marvels of the 21st century. Nepal has its share of problem which include inadequate economic development and social infrastructure, poverty and corruption, plus worsening pollution, but now it finally has relative peace and quiet after a hasty Maoist uprising. Indeed, it has passed through several democratic elections, and finally seems to be getting on the right track. This second edition of Historical Dictionary of Nepal contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about Nepal.

*Mountains Painted with Turmeric* Lila Bahādura Kshatrī,2008 Since its publication in the late 1950s, *Mountains Painted with Turmeric* has struck a chord in the hearts of hundreds of thousands of Nepali readers. Set in the hills of far eastern Nepal, the novel offers readers a window into the lives of the people by depicting in subtle detail the stark realities of village life. Carefully translated from the original text, *Mountains Painted with Turmeric* tells the story of a peasant farmer named Dhané (which means, ironically, wealthy one) who is struggling to provide for his wife and son and arrange the marriage of his beautiful younger sister. Unable to keep up with the financial demands of the big men who control his village, Dhané and his family suffer one calamity after another, and a series of quarrels with fellow villagers forces them into exile. In haunting prose, Lil Bahadur Chettri portrays the dukha, or suffering and sorrow, endured by ordinary peasants; the exploitation of the poor by the rich and powerful; and the social conservatism that twists a community into punishing a woman for being the victim of a crime. Chettri describes the impoverishment, dispossession, and banishment of Dhané's family to expose profound divisions between those who prosper and those who are slowly stripped of their meager possessions. Yet he also conveys the warmth and intimacy of village society, from which Dhané and his family are ultimately excluded.

*Palpasa Café* Narayan Wagle,2018-07-06 *Palpasa Café* tells the story of an artist, Drishya, during the height of the Nepalese Civil War. The novel is partly a love story of Drishya and the first generation American Nepali, Palpasa, who has returned to the land of her parents after 9/11. It is often called an anti-war novel, and describes the effects of the civil war on the Nepali countryside that Drishya travels to.

*Hindu Kush-Himalaya Watersheds Downhill: Landscape Ecology and Conservation Perspectives* Ganga Ram Regmi,Falk Huettmann,2020-05-04 This book describes the myriad components of the Hindu Kush-Himalaya (HKH) region. The contributors elaborate on challenges, failures, and successes in efforts to conserve the HKH, its indigenous plants and animals, and the watershed that runs from the very roof of the planet via world-rivers to marine estuaries, supporting a human population of some two billion people. Readers will learn how the landforms, animal species and humans of this globally fascinating region are connected, and understand why runoff from snow and ice in the world's tallest mountains is vital to inhabitants far downstream. The book comprises forty-five chapters organized in five parts. The first section, Landscapes, introduces the mountainous watersheds of the HKH, its weather systems, forests, and the 18 major rivers whose headwaters are here. The second part explores concepts, cultures, and religions, including ethnobiology and indigenous regimes, two thousand years of religious tradition, and the history of scientific and research expeditions. Part Three discusses policy, wildlife conservation management, habitat and biodiversity data, as well as the interaction of animals and humans. The fourth part examines the consequences of development and globalization, from hydrodams, to roads and railroads, to poaching and illegal wildlife trade. This section includes studies of animal species including river dolphins, woodpeckers and hornbills, langurs, snow leopards and more. The concluding section offers perspectives and templates for conservation, sustainability and stability in the HKH, including citizen-science projects and a future challenged by climate change, growing human population, and global conservation decay. A large assemblage of field and landscape photos, combined with eye-witness accounts, presents a 50-year local and wider perspective on the HKH. Also included are advanced digital topics: data sharing, open access, metadata, web portal databases, geographic information systems (GIS) software and machine learning, and data mining concepts all relevant to a modern scientific understanding and sustainable management of the Hindu Kush-Himalaya region. This work is written for scholars, landscape ecologists, naturalists and researchers alike, and it can be especially well-suited for those readers who want to learn in a more holistic fashion about the latest conservation issues.

**Natural Resource Tenure** Nighisty Ghezze,2009 This study is broad in scope: it covers agricultural land as well as urban. It covers water, wetlands, coastal areas, forests, rangelands, protected areas, genetic resources and petroleum and minerals. It shows how strongly development priorities such as pro-poor growth and the fulfilment of human rights apply to natural resource tenure. Environmental sustainability and climate change, gender equality, peace, security and democratic governance are all closely related issues. Experiences and cases from different parts of the world illustrate key messages; supported by a selection of photos. The overview and the recommendations may provide guidance for the development and implementation of policies and programmes that are urgently needed.

*Karnali Blues* Buddhisagar,2022-02-15 *Karnali Blues*, by Buddhisagar, is the most widely read Nepali novel to have appeared in the

last twenty years. As it recounts the evolution of a father-son relationship-a son's search for approval, a father's small acts of kindness and forgiveness, a son's fears for his father's dignity as his fortunes and faculties begin to fail-the reader is deeply drawn into young Brisha Bahadur's world. His father is kind and idealistic; his mother, though she is kind too, is often frustrated and irascible. The characters in this book are some of the most carefully drawn and authentic in all of Nepali literature. In a backwater district of a country about to undergo radical social, political and cultural change, Brisha's dreams, his games and his mischief, his loves, his hopes and his fears come alive. Translated from the Nepali by Michael Hutt, this highly original piece of work, with the simplicity of its language and its emotional range, holds the power to take your breath away. Its principal themes-the love between a son and his father, the joys and sorrows of childhood, the daily struggle for survival-are universal, and will resonate with readers the world over.

**Classification by Broad Economic Categories** United Nations,2018-07-15 Broad Economic Categories (BEC) aims to analyse international trade statistics by large economic classes of goods and services, based on the main outputs of corresponding industries, to facilitate broad analyses of trade and production. It can also be used to identify end-use dimensions (intermediate consumption, gross fixed capital formation, final consumption). It provides a new top level of broad economic categories, based on the main outputs of corresponding industries, to facilitate broad analyses of trade and production and It adds services and therefore refers to products rather than goods. It also identifies end-use as a separate dimension.
