Neuroscience in Science Fiction Films Sharon Packer, M.D., 2014-11-19 As the gap between science fiction and science fact has narrowed, films that were intended as pure fantasy at the time of their premier have taken on deeper meaning. This volume explores neuroscience in science fiction films, focusing on neuroscience and psychiatry as running themes in SF and finding correlations between turning points in “neuroscience fiction” and advances in the scientific field. The films covered include *The Strange Case of Dr. Jekyll and Mr. Hyde*, *The Island of Dr. Moreau*, *Robocop*, *The Stepford Wives*, *The Mind Snatchers* and iconic franchises like *Terminator*, *Ironman* and *Planet of the Apes*. Examining the parallel histories of psychiatry, neuroscience and cinema, this book shows how science fiction films offer insightful commentary on the scientific and philosophical developments of their times.

Rosebud Sleds and Horses' Heads Scott Jordan Harris, 2013-01-01 Dorothy's ruby slippers. Michael Myers's mask. Marilyn Monroe's billowy white dress. Indiana Jones's trusty hat. These objects are icons of popular culture synonymous with the films they appear in, and, at long last, a book has come along that sorts and chronicles fifty of them. *Rosebud Sleds and Horses' Heads* presents incisive discussion of fifty of the most significant objects in cinema history and explores their importance within their films and within the popular imagination. With original full color illustrations, this book surveys objects from a range of genres, from the birth of cinema to the present day. Curated and written by a prominent film critic who routinely writes for some of the leading publications in the English language, as well as broadcasts for the BBC, *Rosebud Sleds and Horses' Heads* is the only book of its kind. With a fascinating, original, and instantly understandable concept, it will find grateful

audiences in film buffs around the world.

Shakespeare and Forgetting Peter Holland, 2021-06-03 What does it signify when a Shakespearean character forgets something or when Hamlet determines to 'wipe away all trivial fond records'? How might forgetting be an act to be performed, or be linked to forgiveness, such as when in *The Winter's Tale* Cleomenes encourages Leontes to 'forget your evil. / With them, forgive yourself'? And what do we as readers and audiences forget of Shakespeare's works and of the performances we watch? This is the first book devoted to a broad consideration of how Shakespeare explores the concept of forgetting and how forgetting functions in performance. A wide-ranging study of how Shakespeare dramatizes forgetting, it offers close readings of Shakespeare's plays, considering what Shakespeare forgot and what we forget about Shakespeare. The book touches on an equally broad range of forgetting theory from antiquity through to the present day, of forgetting in recent novels and films, and of creative ways of making sense of how our world constructs the cultural meaning of and anxiety about forgetting. Drawing on dozens of productions across the history of Shakespeare on stage and film, the book explores Shakespeare's dramaturgy, from characters who forget what they were about to say, to characters who leave the stage never to return, from real forgetting to performed forgetting, from the mad to the powerful, from playgoers to Shakespeare himself.

Visions of Invasion Michael Lechuga, 2023-03-02 *Visions of Invasion: Alien Affects, Cinema, and Citizenship in Settler Colonies* explores how the US government mobilizes media and surveillance technologies to operate a highly networked, multidimensional system for controlling migrants. Author Michael Lechuga focuses on three arenas where a

citizenship control assemblage manufactures alienhood: Hollywood extraterrestrial invasion film, federal antimigration and border security legislation, and various immigration enforcement protocols implemented along the Mexico–United States border. Building on rhetorical studies, settler colonial studies, and media studies, *Visions of Invasion* offers a glimpse at how the processes of alien-making contribute to an ongoing settler colonial project in the US. Lechuga demonstrates that popular films—*The War of the Worlds*, *Predator*, *Men in Black*, and more—participate in the production of migrants as subjective terrorists, felons, and other noncitizen personae vilified in public discourse. Beyond just tracing how alien invasion narratives circulate in popular media, Lechuga describes how the logics motivating early US colonists materialize in both the US’s citizenship control policy and in some of the country’s most popular texts. Beneath each of the film franchises and antimigrant political expressions described in *Visions of Invasion* lies an anxious colonial logic in which the settler way of life is seemingly threatened by false narratives of imminent invasion from abroad. The volume offers a deep dive into how the rhetorical figure of the alien has been manufactured as a political subjectivity, one that plays out the anxieties, guilts, and fears of colonialism in today’s science fiction landscape.

Men in Black Steve Perry,1997 Two elite cops, members of a secret organization monitoring alien activity on Earth, set out to stop Edgar, a deadly intergalactic terrorist out to assassinate two ambassadors from opposing galaxies, before he can destroy the planet.

Time Travel Nikk Effingham,2020-02-20 There are various arguments for the metaphysical impossibility of time travel. Is it impossible because objects could then be in two places at once? Or is it impossible because some objects could bring about their own existence? In this book, Nikk Effingham contends that no such argument is sound and that time travel is metaphysically possible. His main focus is on the Grandfather Paradox: the position that time travel is impossible because someone could not go back in time and kill their own grandfather before he met their grandmother. In such a case, Effingham argues that the time traveller would have the ability to do the impossible (so they could kill their grandfather) even though those impossibilities will never come about (so they won't kill their grandfather). He then explores the ramifications of this view, discussing issues in probability and decision theory. The book ends by laying out the dangers of time travel and why, even though no time machines currently exist, we should pay extra special care ensuring that nothing, no matter how small or microscopic, ever travels in time.

Men in Black II: The Movie Novel Michael Teitelbaum,2009-10-13 The men in the crisp black suits and the really cool shades are back to keep the aliens from overrunning planet Earth. It's been five years since Agents Jay and Kay saved the world from a very big bug. Now a new alien menace is threatening to destroy the Earth -- unless it's given the Light of

Zartha. There's one problem: Only one person on Earth knows where the Light has been hidden -- that person is Agent Kay.

As It Is in Heaven Greg Laurie, 2014-01-01 Our lives here are so often cluttered with the “cares of this world” that we fail to consider heavenly priorities and how they should be reflected in our earthly ones. At the beginning of Jesus’ most famous prayer, He teaches us to pray that God’s will “be done on earth as it is in heaven”. What heaven is up to is critical for us to understand if we’re going to live biblically. Pastor Greg Laurie explains that heaven is anything but a long, boring church service. People in heaven know about the time and place of ongoing events on earth. They are rational and recall everything from their earthly days, but most importantly for us, they have a unique perspective from which we can learn a great deal. In this rich and relevant study, Greg sheds scriptural light on the sensational books and stories about people going to heaven and coming back, answers the nagging questions we are all dying to ask, and guides us to focus—right now—on what really matters.

Between Science and Literature Ira Livingston, 2010-10-01 Between Literature and Science follows through to its emerging 21st-century future the central insight of 20th-century literary and cultural theory: that language and culture, along with their subsystems and artifacts, are self-referential systems. The book explores the workings of self-reference (and the related performativity) in linguistic utterances and assorted texts, through examples of the more open social-discursive systems of post-structuralism and cultural studies, and into the sciences, where complex systems organized by recursive self-reference are now being embraced as an emergent paradigm. This paradigmatic

convergence between the humanities and sciences is autopoetics (adapting biologist Hubert Maturana's term for "self-making" systems), and it signals a long-term epistemological shift across the nature/culture divide so definitive for modernity. If cultural theory has taught us that language, because of its self-referential nature, cannot bear simple witness to the world, the new paradigmatic status of self-referential systems in the natural sciences points toward a revived kinship of language and culture with the world: language bears "witness" to the world. The main movement of the book is through a series of model explications and analyses, operational definitions of concepts and terms, more extended case studies, vignettes and thought experiments designed to give the reader a feel for the concepts and how to use them, while working to expand the autopoetic internee by putting cultural self-reference in dialogue with the self-organizing systems of the sciences. Along the way the reader is introduced to self-reference in epistemology (Foucault), sociology (Luhmann), biology (Maturana/Varela/Kauffman), and physics and cosmology (Smolin). Livingston works through the fundamentals of cultural, literary, and science studies and makes them comprehensible to a non-specialist audience.

Fantastic Planets, Forbidden Zones, and Lost Continents Douglas

Brode, 2015-10-30 Whether you judge by box office receipts, industry awards, or critical accolades, science fiction films are the most popular movies now being produced and distributed around the world. Nor is this phenomenon new. Sci-fi filmmakers and audiences have been exploring fantastic planets, forbidden zones, and lost continents ever since George Méliès' 1902 film *A Trip to the Moon*. In this highly entertaining and knowledgeable book, film historian and pop culture expert Douglas Brode picks the one hundred greatest

sci-fi films of all time. Brode's list ranges from today's blockbusters to forgotten gems, with surprises for even the most informed fans and scholars. He presents the movies in chronological order, which effectively makes this book a concise history of the sci-fi film genre. A striking (and in many cases rare) photograph accompanies each entry, for which Brode provides a numerical rating, key credits and cast members, brief plot summary, background on the film's creation, elements of the moviemaking process, analysis of the major theme(s), and trivia. He also includes fun outtakes, including his top ten lists of Fifties sci-fi movies, cult sci-fi, least necessary movie remakes, and "so bad they're great" classics—as well as the ten worst sci-fi movies ("those highly ambitious films that promised much and delivered nil"). So climb aboard spaceship Brode and journey to strange new worlds from Metropolis (1927) to Guardians of the Galaxy (2014).

Immigration and American Popular Culture Rachel Lee Rubin, Jeffrey Melnick, 2007
Immigration and American Popular Culture looks at the relationship between American immigrants and the popular culture industry in the twentieth century. Through a series of case studies, Rachel Rubin and Jeffrey Melnick uncover how particular trends in popular culture—such as portrayals of European immigrants as gangsters in 1930s cinema, the zoot suits of the 1940s, the influence of Jamaican Americans on rap in the 1970s, and cyberpunk and Asian American zines in the 1990s—have their roots in the complex socio-political nature of immigration in America. Supplemented by a timeline of key events, Immigration and American Popular Culture offers a unique history of twentieth-century U.S. immigration and an essential introduction to the study of popular culture.

Conscious Leadership Rod A. Macpherson, 2015-08-18 We are all leaders. We all have

the ability to influence others and create change. We are truly powerful beyond measure. But why is that message so hard to truly comprehend? Rod A. Macpherson explores why we're stuck in a spiral of fear driven behaviour that results in the exploitation of our natural resources, and each other, with little consideration for the impact on our precious world. He argues that we create our own reality, and therefore, we can create the life and world we want. Learn how to: • explore your personal power and take responsibility for your life; • take personal responsibility in order to save the environment; • find new ways for economies, environments, businesses, and individuals to co-exist in sustainable ways; • apply discoveries in quantum connectedness to promote education and leadership models. It is no longer acceptable for us to stand by and wait for someone else to save our world. Being an observer is in effect giving permission for the insanity to continue. It is time for a new leadership paradigm. That greedy behavior is responsible for the ongoing destruction of our fragile environment. The time for change is upon us. The next phase of our evolution into higher consciousness is here right now.

MIIB Men in Black II Michael Teitelbaum, 2002 Read the novelization of *Men in Black II*, the sequel to the blockbuster movie, *Men in Black*, starring Will Smith and Tommy Lee Jones.

Narrative, 1999

Deconstructing Will Smith Willie Tolliver, 2022-01-06 Acclaimed actor and rap artist Will Smith has achieved a level of Hollywood fame rarely attained by a Black celebrity. Early in his career, Smith aspired to be the world's most famous movie star and being named the

world's top film attraction in 2008, fulfilled his goal. While his rise to a place of worldwide prominence and cultural relevance has made him iconic, his accomplishments have not received the full and thorough acknowledgement and analysis they merit. This is the first full-length critical look at the significance of Will Smith's achievements over a more than 30-year career. Many of his films have broken cultural norms by depicting Black men in groundbreaking social settings, like the role of the world-saving hero in his most popular films. In addition to analyzing Smith's filmography, this work contextualizes other popular and common portrayals of Black men in media and society. Finally, this book examines Smith's work in his middle age, ruminating on his ability to adapt to the realities of a new Hollywood.
