George R. R. Martin's A Game of Thrones 5-Book Boxed Set (Song of Ice and Fire Series) George R. R. Martin, 2012-09-10 For the first time, all five novels in the epic fantasy series that inspired HBO's Game of Thrones are together in one eBook bundle. An immersive entertainment experience unlike any other, A Song of Ice and Fire has earned George R. R. Martin—dubbed “the American Tolkien” by Time magazine—international acclaim and millions of loyal readers. Now this bundle collects the entire monumental cycle in the most convenient format available: A GAME OF THRONES A CLASH OF KINGS A STORM OF SWORDS A FEAST FOR CROWS A DANCE WITH DRAGONS “One of the best series in the history of fantasy.”—Los Angeles Times Winter is coming. Such is the stern motto of House Stark, the northernmost of the fiefdoms that owe allegiance to King Robert Baratheon in far-off King's Landing. There Eddard Stark of Winterfell rules in Robert's name. There his family dwells in peace and comfort: his proud wife, Catelyn; his sons Robb, Brandon, and Rickon; his daughters Sansa and Arya; and his bastard son, Jon Snow. Far to the north, behind the towering Wall, lie savage Wildings and worse—unnatural things relegated to myth during the centuries-long summer, but proving all too real and all too deadly in the turning of the season. Yet a more immediate threat lurks to the south, where Jon Arryn, the Hand of the King, has died under mysterious circumstances.

Now Robert is riding north to Winterfell, bringing his queen, the lovely but cold Cersei, his son, the cruel, vainglorious Prince Joffrey, and the queen's brothers Jaime and Tyrion of the powerful and wealthy House Lannister—the first a swordsman without equal, the second a dwarf whose stunted stature belies a brilliant mind. All are heading for Winterfell and a fateful encounter that will change the course of kingdoms. Meanwhile, across the Narrow Sea, Prince Viserys, heir of the fallen House Targaryen, which once ruled all of Westeros, schemes to reclaim the throne with an army of barbarian Dothraki—whose loyalty he will purchase in the only coin left to him: his beautiful yet innocent sister, Daenerys. “Long live George Martin . . . a literary dervish, enthralled by complicated characters and vivid language, and bursting with the wild vision of the very best tale tellers.”—The New York Times

Games vs. Hardware. The History of PC video games Bogdan Ion Purcaru, 2014-03-13 My two biggest passions concerning computers are hardware and gaming. I wrote this book because I don't want that important pieces of history regarding computer hardware, games and, in a smaller amount the 80's operating systems to be forgotten and lost. I want everyone to appreciate the hardware and software industry and especially the people behind them as they worked many days and nights to deliver us fast and advanced computers and entertaining and complex games.

Game Addiction Neils Clark, P. Shavaun Scott, 2009-06-08 An eleven-year-old boy strangled an

elderly woman for the equivalent of five dollars in 2007, then buried her body under a thin layer of sand. He told the police that he needed the money to play online videogames. Just a month later, an eight-year-old Norwegian boy saved his younger sister's life by threatening an attacking moose and then feigning death when the moose attacked him—skills he said he learned while playing World of Warcraft. As these two instances show, videogames affect the minds, bodies, and lives of millions of gamers, negatively and positively. This book approaches videogame addiction from a cross-disciplinary perspective, bridging the divide between liberal arts academics and clinical researchers. The topic of addiction is examined neutrally, using accepted research in neuroscience, media studies, and developmental psychology.
