Bones of Empire William C. Dietz,2017-09-20 From the national bestselling author of *Battle Hymn* comes the conclusion to the electrifying sci-fi thriller duology begun with *At Empire's Edge...* On the surface, the Uman Empire seems as glorious as ever, with its citizens reveling in their proud civilization, the Legions defending its borders, and the Emperor ruling benevolently over all. Yet it is a facade. In truth, the alien Vord are pushing deeper into Uman space even as the noble families maneuver for power within a waning Empire. But for Xeno Corps Centurion Jak Cato, all that matters is that he's still alive. After a disastrous mission that almost cost him everything, he's returning to the Imperial capital of Corin with his beloved Alamy for some well-deserved down time—which soon becomes no time. For as Cato watches a grand procession, he catches a glimpse of his mighty Emperor—and in one horrifying instant, Cato's enhanced senses recognize that

while the Emperor looks the same, it is not him. It is Fiss Verafti, the murderous Sagathi shape-changer Cato had just hunted down. The creature he thought was dead! As the Empire strains under attacks from within and without, Cato doggedly investigates the mystery of how Verafti made his way from the grave to the throne and who is behind the astounding plot. And when he does discover the truth, it will change Cato—and the entire galaxy—forever...

U.S. Marines In Vietnam: The Landing And The Buildup, 1965

Dr. Jack Shulimson, Maj. Charles M. Johnson, 2016-08-09 This is the second volume in a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details the Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000-man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam’s northernmost corps area, I Corps, and their mission expanded from defense of the Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed forces but in less detail than its predecessor volume, *U.S. Marines in Vietnam, 1954-1964; The Advisory and Combat Assistance Era*.

Orbital Mechanics for Engineering Students Howard D

Curtis, 2009-10-26 *Orbital Mechanics for Engineering Students*, Second Edition, provides an introduction to the basic concepts of

space mechanics. These include vector kinematics in three dimensions; Newton's laws of motion and gravitation; relative motion; the vector-based solution of the classical two-body problem; derivation of Kepler's equations; orbits in three dimensions; preliminary orbit determination; and orbital maneuvers. The book also covers relative motion and the two-impulse rendezvous problem; interplanetary mission design using patched conics; rigid-body dynamics used to characterize the attitude of a space vehicle; satellite attitude dynamics; and the characteristics and design of multi-stage launch vehicles. Each chapter begins with an outline of key concepts and concludes with problems that are based on the material covered. This text is written for undergraduates who are studying orbital mechanics for the first time and have completed courses in physics, dynamics, and mathematics, including differential equations and applied linear algebra. Graduate students, researchers, and experienced practitioners will also find useful review materials in the book. NEW: Reorganized and improved discussions of coordinate systems, new discussion on perturbations and quaternions NEW: Increased coverage of attitude dynamics, including new Matlab algorithms and examples in chapter 10 New examples and homework problems

U.S. Marines In Vietnam: Fighting The North

Vietnamese, 1967 Maj. Gary L. Telfer, Lt.-Col. Lane Rogers, Dr. V. Keith Fleming Jr., 2016-08-09 This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam's northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF's perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy's

Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.
