Nitration and Aromatic Reactivity J. G. Hoggett, 1971-07-02 First published in 1971 this volume claims that nitration is important because it is the most general process for the preparation of aromatic nitro-compounds.

Nitration of Hydrocarbons and Other Organic Compounds A. V. Topchiev, 2013-10-22 Nitration of Hydrocarbons and Other Organic Compounds tackles various concerns in the process of substituting hydrogen atoms in the aromatic or heterocyclic nucleus, or in saturated hydrocarbon, by nitro groups. The title first covers the nitration of aromatic and heterocyclic compounds with nitric acid and nitrating mixture, and then proceeds to discussing the mechanism of the nitration of aromatic compounds with nitric acid and nitrating mixture. Next, the selection deals with the nitration of saturated, aromatic-aliphatic and unsaturated hydrocarbons with nitric acid. The text also talks about the nitration with nitrogen oxides, along with the nitration of amines. The last chapter details the nitration of organic compounds with organic and inorganic nitrates and nitroxyl. The book will be of great interest to students, researchers, and practitioners of organic chemistry.

Fundamental Aliphatic Chemistry P. W. G. Smith, A. R. Tatchell, 2014-04-24 Organic Chemistry for General Degree Students is written to meet the requirements of the London General Internal examination and degree examinations of a similar standing. It will also provide for the needs of students taking the Part 1 examination for Graduate Membership of the Royal Institute of Chemistry, or the Higher National Certificate, whilst the treatment is such that Ordinary National Certificate courses can be based on the first two volumes. Within the limits broadly defined by the syllabus, the aim of this first volume is to provide a concise summary of the important general methods of preparation and properties of the main classes of aliphatic compounds. Due attention is paid to practical considerations with particular reference to important industrial processes. At the same time, the fundamental theoretical principles of organic chemistry are illustrated by the discussion of a selection of the more important reaction mechanisms. Questions and problems are included, designed to test the student's appreciation of the subject and his ability to apply the principles embodied therein. A selection of questions set in the relevant examinations is also included.

Nitrobenzene Production from Benzene - Cost Analysis - NB E12A Intratec, 2019-09-17 This report presents a cost analysis of Nitrobenzene production from benzene and nitric acid. The process examined is similar to Chematur's adiabatic benzene nitration process. In this process, benzene,

nitric acid, and sulfuric acid are reacted in a tubular nitrator. The product from nitration is washed and purified, producing technical-grade Nitrobenzene. This report was developed based essentially on the following reference(s): Keywords: Chematur, Benzene Nitration
