Samuel R. Delany

**Nova** Samuel R. Delany, 2002-06-11 Given that the suns of Draco stretch almost sixteen light years from end to end, it stands to reason that the cost of transportation is the most important factor of the 32nd century. And since Illyrion is the element most needed for space travel, Lorq von Ray is plenty willing to fly through the core of a recently imploded sun in order to obtain seven tons of it. The potential for profit is so great that Lorq has little difficulty cobbling together an alluring crew that includes a gypsy musician and a moon-obsessed scholar interested in the ancient art of writing a novel. What the crew doesn't know, though, is that Lorq's quest is actually fueled by a private revenge so consuming that he'll stop at nothing to achieve it. In the grandest manner of speculative fiction, Nova is a wise and witty classic that casts a fascinating new light on some of humanity's oldest truths and enduring myths.

**NoVA** James Boice, 2009-04-21 Grayson Donald, seventeen years old, has just hanged himself from a basketball hoop next to a playground in Centreville, North Virginia (NoVA). The question is, Why? In this incisive dissection of the author's hometown, James Boice scratches its shiny suburban surface to reveal a place formed from a cloud that slid west and met with the humidity and spent buckshot cartridges and Civil War bones clad in blue and gray to create concrete and vinyl siding and front yards laid in chunks, child care centers and video rental places. An exciting new voice in fiction, James Boice blends sharp social observations with dark humor and remarkable prose. In both passing glimpses and intimate interior monologues, we come to know Grayson's family, his fellow students, his neighbors, and many who knew him only slightly, if at all. A portrait of a town emerges that renders Grayson's suicide both devastating and inevitable. NoVA is a unique and fascinating depiction of the American suburb.

Now Eye See Maurice P. Fortune, 2018-03-09 Now Eye See is the story of challenge and triumph. It is a tale of fortitude and faith in oneself and in God. It chronicles my life from very humble beginnings in Chester, Pa. to Whaleyville, a tiny town on Maryland's Eastern Shore to an unlikely and fortuitous journey that carries me to the big city of Manhattan, New York. Now Eye See tells my story of going from picking blueberries and wearing a straw hat on a farm in Maryland to a job as personal secretary to a permanent mission to the United Nations. From being monolingual to self-learning and the adoption of French as a second language, purely as a survival necessity. Although completely unaware of my own familial roots in Music and Journalism, this is my story of a search for a career as a songwriter and professional recording artist. And as a private custodial business owner that suffered disastrously during the economic crises of 2008, which resulted in my own displacement as well as the loss of all my possessions including all evidence of my small successes in the music industry. This is the story of my life and how I have been able and fortunate to reinvent myself to become successful in a new career. This is the narrative of unbelievable luck and a chance conversation in the offices of a New York City hospital. A conversation that spurred a listener to google my name and to help begin the process of recovery and rejuvenation. Of a mysteriously placed photograph taken by a world famous photographer. And of my namesake and nephew whom I'd never met: a soldier for the US Army killed in a roadside bombing in Iraq October 2004. This is the story of the rediscovery of all my work and of my vinyl recordings being offered for sale in eight countries around the world. This then is the unaltered story of my rights and my wrongs. **Sterile Neutrino Search with the NOvA Detectors** Harry Refael Hausner,2022

NOvA is a two-detector experiment designed to observe neutrino oscillations from  $\nu_\mu$  to  $\nu_e$  flavor states. Additionally, the location of the NOvA Near Detector is well situated to additionally observe short baseline oscillations to sterile neutrino states. We expand upon previous NOvA sterile neutrino searches by using a covariance matrix fitting technique. This analysis is the first with NOvA to directly include neutrino interactions in the Near Detector while fitting the data. The NOvA Near Detector's greater statistics to better constrain our Far Detector uncertainties in addition to increasing the range of  $\Delta m^2_{41}$  to which we are sensitive.
