Religion Online August E. Grant,Amanda F. C. Sturgill,Chiung Hwang Chen,Daniel A. Stout,2019-03-07 *Religion Online* provides new insights about religiosity in a contemporary context, offering a comprehensive look at the intersection of digital media, faith communities, and practices of all sorts. Recent research on Apple users, video games, virtual worlds, artificial intelligence, digital music, and sports as religion supports the idea that media and religion, once considered separate entities, are in many cases the same thing. New media and religious practice can no longer be detached; this two-volume set discusses how religionists are embracing the Internet amidst cultural shifts of secularization, autonomous religious worship, millennials' affinity for new media, and the rise of fundamentalism in the global south. While other works describe case studies, this book explains how new media are interwoven into the very fabric of religious belief, behavior, and community. Chapters break down the past, present, and projected future of the use of digital media in relation to faith traditions of many varieties, extending from mainline Christianity to new religious movements. The book also examines the impacts of digital media on beliefs and practices around the world. In exploring these subjects, it calls on the study of culture, namely anthropology, to conceptualize a technological period as significant as the industrial revolution.
