Nuclear Desire Shampa Biswas, 2014-09-01 Since its enactment in 1970, the Nuclear Non-Proliferation Treaty (NPT), has become one node of a massive, sprawling, multibillion-dollar regime that is considered essential to slowing the proliferation of nuclear weapons and weapons technology. However, according to Shampa Biswas, these well-intentioned efforts to halt the spread of nuclear weapons deflect attention from a hierarchical global nuclear order dominated by powerful states and capitalist interests that benefit from the status quo. In *Nuclear Desire*, Biswas proposes that pursuit and production of nuclear power is sustained by this unequal global order whose persistent and daily harmful effects are experienced by some of the most vulnerable bodies around the world. Making a compelling case for nuclear abolition, she shows that the path to nuclear zero is more successfully traversed through the perspective of postcolonialism and the political economy of injustice rather than through the prism of "security." In the end, the nonproliferation regime maintains a hierarchy of haves and have-nots, one that reinforces inequalities that run counter to the NPT's broader goal. Innovative, forcefully argued, and long overdue, *Nuclear Desire* moves beyond conventional critiques to give scholars and students of international relations new insights into how a more secure world might simultaneously be more peaceful and just.

Handbook of Peace and Conflict Studies Charles Webel, Johan Galtung, 2007-03-12 This major new Handbook provides a cutting-edge and transdisciplinary overview of the main issues, debates, state-of-the-art methods, and key concepts in peace and conflict studies today. The fields of peace and conflict studies have grown exponentially since being initiated by Professor Johan Galtung half a century ago. They have forged a transdisciplinary and professional identity distinct from security

studies, political science, and international relations. The volume is divided into four sections: understanding and transforming conflict creating peace supporting peace peace across the disciplines. Each section features new essays by distinguished international scholars and professionals working in peace studies and conflict resolution and transformation. Drawing from a wide range of theoretical, methodological, and political positions, the editors and contributors offer topical and enduring approaches to peace and conflict studies. The Handbook of Peace and Conflict Studies will be essential reading for students of peace studies, conflict studies and conflict resolution. It will also be of interest and use to practitioners in conflict resolution and NGOs, as well as policy makers and diplomats.

Future of the Nuclear Security Environment in 2015 Russian Academy of Sciences,National Academy of Sciences,Policy and Global Affairs,Committee on International Security and Arms Control,Joint Committees on the Future of the Nuclear Security Environment in 2015,2009-02-02 The U.S. National Academies (NAS) and the Russian Academy of Sciences (RAS), building on a foundation of years of interacademy cooperation, conducted a joint project to identify U.S. and Russian views on what the international nuclear security environment will be in 2015, what challenges may arise from that environment, and what options the U.S. and Russia have in partnering to address those challenges. The project's discussions were developed and expanded upon during a two-day public workshop held at the International Atomic Energy Agency in November 2007. A key aspect of that partnership may be cooperation in third countries where both the U.S. and Russia can draw on their experiences over the last decade of non-proliferation cooperation. More broadly, the following issues analyzed over the course of this RAS-NAS project included: safety and security culture, materials protection, control and accounting (MPC&A) best practices, sustainability, nuclear forensics, public-

private partnerships, and the expansion of nuclear energy.

The Development of Outer Space Thomas Gangale, 2009-07-23 This account of the evolution of outer space law examines key issues that fuel the debates over sovereignty and property rights designed to govern the future colonization and use of heavenly bodies other than our own. In the United States, lobbies for the commercial development of space have become increasingly antagonistic toward the international legal regime of outer space, condemning the 1967 Outer Space Treaty and the unratified 1979 Moon Agreement as anti-business. *The Development of Outer Space: Sovereignty and Property Rights in International Space Law* argues that the *res communis* principle enshrined in the Outer Space Treaty was misrepresented here, with essential help from corporate

lobbyists whose real object was the defeat of the Law of the Sea Convention. Thomas Gangale builds the legal case for reviving the moribund Moon Agreement as a prelude to negotiating a second Moon treaty to establish a regulatory regime for the exploitation of extraterrestrial resources. The author's account of the inception and evolution of outer space law to date is deeply informed by his appreciation of such terrestrial considerations as the nation-state system, the contending economic theories of capitalism and communism, and the post-colonial struggle between the developed space-faring nations and the developing earthbound nations.

Strategies of Dominance P. Edward Haley, 2006-05-30 In a critical overview of U.S. foreign policy since the end of the Cold War, P. Edward Haley draws surprising connections between key elements of George W. Bush's foreign policy and those of his predecessor, Bill Clinton. This is the only book covering the foreign policies of all three post--Cold War presidents -- George H. W. Bush, William J. Clinton, and George W. Bush.

The Nuclear Enterprise George P. Shultz, Sidney D. Drell, 2013-09-01 A panel of expert contributors offers its views on the risks and rewards of the nuclear enterprise, focusing on issues of safety, regulation, and public perception. Contributors discuss specific experience and issues regarding the technical safety of weapons and power plants, management operations, regulatory measures, and the importance of accurate communication by the media.

The Reporter's Handbook on Nuclear Materials, Energy & Waste Management Michael R. Greenberg, Bernadette M. West, Karen W. Lowrie, Henry J. Mayer, 2009-04-24 An essential reference for journalists, activists, and students, this book presents scientifically accurate and accessible overviews of 24 of the most important issues in the nuclear realm, including: health effects, nuclear safety and

engineering, TMI and Chernobyl, nuclear medicine, food irradiation, transport of nuclear materials, spent fuel, nuclear weapons, global warming. Each brief is based on interviews with named scientists, engineers, or administrators in a nuclear specialty, and each has been reviewed by a team of independent experts. The objective is not to make a case for or against nuclear-related technologies, but rather to provide definitive background information. (The approach is based on that of The Reporter's Environmental Handbook, published in 1988, which won a special award for journalism from the Sigma Delta Chi Society of professional journalists.) Other features of the book include: a glossary of hundreds of terms, an introduction to risk assessment, environmental and economic impacts, and public perceptions, an article by an experienced reporter with recommendations about how to cover nuclear issues, quick guides to the history of nuclear power in the United States, important federal legislation and regulations, nuclear position statements, and key organizations, print and electronic resources.

Lexicography, Terminology, and Translation Ingrid Meyer, 2006 This volume in honour of Ingrid Meyer is a tribute to her work in the interrelated fields of lexicography, terminology and translation. One key thing shared by these fields is that they all deal with text. Accordingly, the essays in this collection are united by the fact that they too are all text-based in some way. In the majority of essays, electronic corpora serve as the textual basis for investigations. Chapters focusing on electronic corpora include a description of a tool that can be used to help build specialized corpora in a semi-automatic fashion; corpus-based investigations of terminological knowledge patterns, terminological implantation, lexicographic information and translation solutions; comparisons of corpora to conventional resources such as dictionaries; and analyses of corpus processing tools such as translation memory systems. In several essays, notably those dealing with historical or literary

documents, the texts in question are specific manuscripts that have been studied with a view to learning more about lexicographic and translation practice. The volume is rounded out with a chapter on audiovisual translation that takes a non-conventional view of text, where text includes film. Book jacket.

India and Global Governance Harsh V Pant, 2022-03-21 This volume explores India's role in the global governance architecture post-Cold War. It shows how, with a rise in India's capabilities, there is an expectation from its external interlocutors that New Delhi ought to play a larger global role. As Indian policymakers redefine their engagements in the global policy matrix, the chapters in the volume analyse India's role as a challenger and a stakeholder in world politics; its uneasy relationship with Western liberal democracies; and its role in shaping new structures of global governance. The volume focuses on a host of critical issues, including nuclear policy, climate action politics, India's bid for a permanent seat at the UN Security Council, humanitarian interventions, trade governance, democracy promotion, India's engagement with other emerging powers in platforms such as the BRICS, the changing dynamics with its neighbours, and maritime governance. A timely reimagining of global politics, this book will be of great interest to scholars and researchers of politics and international relations, climate change, military and strategic studies, economics, and South Asian studies.

Security, Economics and Nuclear Non-Proliferation Morality Liang Tuang Nah, 2017-09-04 This book seeks to elucidate the decisions of states that have chosen to acquire nuclear arms or inherited nuclear arsenals, and have either disarmed or elected to retain their warheads. It examines nuclear arms policy via an interconnected framework involving the eclectic use of national security based realism, economic interdependence liberalism, and nuclear weapons norms or morality based

constructivism. Through the various chapters examining the nuclear munitions decisions of South Africa, Ukraine and North Korea, a case is built that a state's leadership decides whether to keep or give up "the Bomb" based on interlinked security, economic and norms governed motivations. Thereafter, frameworks evaluating the likelihood of nuclear proliferation and accessing the feasibility of disarmament are then applied to North Korea and used to examine recent Iranian nuclear negotiability. This book is an invaluable resource for international relations and security studies scholars, WMD analysts and post graduate or undergraduate candidates focusing on nuclear arms politics related courses

Obama's Nuclear Posture Review Robert M. Gates, 2010-04 The full text of the 2010 Nuclear Posture Review submitted to President Obama by Secretary of Defense Robert M. Gates. This document lays out the nuclear strategy for the United States. The most important provision of the document is a revision of the declared conditions under which the United States would carry out first use of nuclear weapons. Liberals regard this as a no change document, conservatives as a dangerously wimpy concession to political correctness. Own and read the full text and judge for yourself.

The Iranian Nuclear Crisis Seyed Hossein Mousavian, 2012-07-12 The first detailed Iranian

account of the diplomatic struggle between Iran and the international community, *The Iranian Nuclear Crisis: A Memoir* opens in 2002, as news of Iran's clandestine uranium enrichment and plutonium production facilities emerge. Seyed Hossein Mousavian, previously the head of the Foreign Relations Committee of Iran's Supreme National Security Council and spokesman for Tehran's nuclear negotiating team, brings the reader into Tehran's private deliberations as its leaders wrestle with internal and external adversaries. Mousavian provides readers with intimate knowledge of Iran's interactions with the International Atomic Energy Agency and global powers. His personal story comes alive as he vividly recounts his arrest and interrogations on charges of espionage. Dramatic episodes of diplomatic missions tell much about the author and the swirling dynamics of Iranian politics and diplomacy—undercurrents that must be understood now more than ever. As intense debate continues over the direction of Iran's nuclear program, Mousavian weighs the likely effects of military strikes, covert action, sanctions, and diplomatic engagement, considering their potential to resolve the nuclear crisis. Contents 1. The Origin and Development of Iran's Nuclear Program 2. The First Crisis 3. From Tehran to Paris 4. From the Paris Agreement to the 2005 Presidential Election 5. The Larijani Period 6. To the Security Council 7. Back to the Security Council and a New Domestic Situation 8. Iran Alone: The Jalili Period 9. U.S. Engagement 10. The Crisis Worsens 11. Conclusion

U.S.-UK Nuclear Cooperation After 50 Years Jenifer Mackby, Paul Cornish, 2008 As Britain and the United States commemorate five decades of the special nuclear relationship embodied in the 1958 Mutual Defense Agreement (MDA), two leading research institutes—one on either side of the Atlantic—have collaborated to examine that history. The Center for Strategic and International Studies, in Washington, D.C., and the Royal Institute of International Affairs, Chatham House, London, enlisted senior officials, scientists, academics, and members of industry who have been involved in

the implementation of the MDA over the years. The contributors were asked to recount how the U.S.-UK nuclear relationship flourished despite such obstacles as the halt in the scientific cooperation that had spurred the Manhattan Project; the Suez crisis; and sharp disagreements over scientific, political, and technical issues. They were also asked to look to the future of this unparalleled transatlantic relationship. Abstracts from 36 oral histories (taken with, among others, Des Browne, UK secretary of state for defence; James Schlesinger, former U.S. secretary of energy; and Harold Brown, former U.S. secretary of defense) add to the historical dimension of this work. The resulting collection of histories, analyses, and anecdotes provides valuable reading for an understanding of how the two nations were drawn together by a common threat during a turbulent era, as well as how they will face future challenges in a radically changed security environment. -- Amazon.com.

Routledge Handbook of Nuclear Proliferation and Policy Joseph F. Pilat, Nathan E. Busch, 2015-05-15 This new Handbook is a comprehensive examination of the rich and complex issues of nuclear proliferation in the early 21st century. The future of the decades-long effort to prevent the further spread of weapons of mass destruction is at a crossroads today. If international nonproliferation efforts are to be successful, an integrated, multi-tiered response will almost certainly be necessary. A serious, thorough, and clear-eyed examination of the range of threats, challenges, and opportunities facing the international community is a necessary first step. This Handbook, which presents the most up-to-date analysis and policy recommendations on these critical issues by recognized, leading scholars in the field, intends to provide such an examination. The volume is divided into three major parts: Part I presents detailed threat assessments of proliferation risks across the globe, including specific regions and countries. Part II explains the various tools developed by the international community to address these proliferation threats. Part III addresses the proliferation

risks and political challenges arising from nuclear energy production, including potential proliferation by aspiring states and nonstate groups. This Handbook will be of great interest to students and practitioners of nuclear proliferation, arms control, global governance, diplomacy, and global security and IR general.

Neural Information Processing Biao Luo, Long Cheng, Zheng-Guang Wu, Hongyi Li, Chaojie Li, 2023-11-14 The six-volume set LNCS 14447 until 14452 constitutes the refereed proceedings of the 30th International Conference on Neural Information Processing, ICONIP 2023, held in Changsha, China, in November 2023. The 652 papers presented in the proceedings set were carefully reviewed and selected from 1274 submissions. They focus on theory and algorithms, cognitive neurosciences; human centred computing; applications in neuroscience, neural networks, deep learning, and related fields.

The future of U.S.-India security cooperation Sumit Ganguly, M. Chris Mason, 2021-03-30 This book deals with the evolution, current status and potential of U.S.-India strategic cooperation. From very modest beginnings, the U.S.-India strategic partnership has developed significantly over the last decade. In considerable part, this growth has stemmed from overlapping concerns about the rise and assertiveness of the People's Republic of China, as well as the instability of Pakistan. Despite the emergence of this partnership, significant differences remain, some of which stem from Cold War legacies, others from divergent global strategic interests and institutional design. In spite of these areas of discord, the overall trajectory of the relationship appears promising. Increased cooperation and closer policy coordination underscore a deepening of the relationship, while fundamental differences in national approaches to strategic challenges demand flexibility and compromise in the future.
