The Skin Between Us: A Memoir of Race, Beauty, and Belonging Kym Ragusa, 2006-05-17 A memoir of astonishing delicacy and strength about race and physical beauty. Kym Ragusa's stunningly beautiful, brilliant black mother constantly turned heads as she strolled the streets of West Harlem. Ragusa's working-class white father, who grew up only a few streets (and an entire world) away in Italian East Harlem, had never seen anyone like her. At home their families despaired at the match, while in the streets the couple faced taunting threats from a city still racially divided—but they were mesmerized by the differences between them. From their volatile, short-lived pairing came a sensitive child with a filmmaker's observant eye. Her two powerful grandmothers gave her the love and stability to grow into her own skin. Eventually, their shared care for their granddaughter forced them to overcome their prejudices. Rent parties and religious feste, baked yams and baked ziti—Ragusa's sensuous memories are a reader's delight, as they bring to life the joy, pain, and inexhaustible richness of a racially and culturally mixed heritage. A Finalist for the Hurston-Wright Legacy Award for Nonfiction.

Anxious People Fredrik Backman, 2020-09-08 Instant #1 New York Times Bestseller A People Book of the Week, Book of the Month Club selection, and Best of Fall in Good Housekeeping, PopSugar, The Washington Post, New York Post, Shondaland, CNN, and more! “[A] quirky, big-hearted novel...Wry, wise, and often laugh-out-loud funny, it’s a wholly original story that delivers pure pleasure.” —People From the #1 New York Times bestselling author of *A Man Called Ove* comes a charming, poignant novel about a crime that never took place, a would-be bank robber who disappears into thin air, and eight extremely anxious strangers who find they have more in common than they ever imagined. Looking at real estate isn’t usually a life-or-death situation, but an apartment open house becomes just that when a failed bank robber bursts in and takes a group of strangers hostage. The captives include a recently retired couple who relentlessly hunt down fixer-uppers to avoid the painful truth that they can’t fix their own marriage. There’s a wealthy bank director who has been too busy to care about anyone else and a young couple who are about to have their first child but can’t seem to agree on anything, from where they want to live to how they met in the first place. Add to the mix an eighty-seven-year-old woman who has lived long enough not to be afraid of someone waving a gun in her face, a flustered but still-ready-to-make-a-deal real estate agent, and a mystery man who has locked himself in the apartment’s only bathroom, and you’ve got the worst group of hostages in the world. Each of them carries a lifetime of grievances, hurts, secrets, and passions that are ready to boil over. None of them is entirely who they appear to be. And all of them—the bank robber included—desperately crave some sort of rescue. As the authorities and the media surround the premises these reluctant allies will reveal surprising truths about themselves and set in motion a chain of events so unexpected that even they can hardly explain what happens next. Rich with Fredrik Backman’s “pitch-perfect dialogue and an unparalleled understanding of human nature” (Shelf Awareness), *Anxious People* is an ingeniously constructed story about the enduring power of friendship, forgiveness, and hope—the things that save us, even in the most anxious times.

The Gist of Reading Andrew Elfenbein, 2018-01-16 What happens to books as they live in our long-term memory? Why do we find some books entertaining and others not? And how does literary influence work on writers in different ways? Grounded in the findings of empirical psychology, this book amends classic reader-response theory and attends to neglected aspects of reading that cannot be explained by traditional literary criticism. Reading arises from a combination of two kinds of mental work: automatic and controlled processes. Automatic processes, such as the ability to see visual symbols as words, are the result of constant practice; controlled processes, such as predicting what might occur next in a story, arise from readers' conscious use of skills and background knowledge. When we read, automatic and controlled processes work together to create the gist of reading, the constant interplay between these two kinds of processes. Andrew Elfenbein not only explains how we read today, but also

uses current knowledge about reading to consider readers of past centuries, arguing that understanding gist is central to interpreting the social, psychological, and political impact of literary works. The result is the first major revisionary account of reading practices in literary criticism since the 1970s.

Theoretical Models and Processes of Literacy Donna E. Alvermann, Norman J. Unrau, Misty Sailors, Robert B. Ruddell, 2018-10-03 The Seventh Edition of this foundational text represents the most comprehensive source available for connecting multiple and diverse theories to literacy research, broadly defined, and features both cutting-edge and classic contributions from top scholars. Two decades into the 21st century, the Seventh Edition finds itself at a crossroads and differs from its predecessors in three major ways: the more encompassing term literacy replaces reading in the title to reflect sweeping changes in how readers and writers communicate in a digital era; the focus is on conceptual essays rather than a mix of essays and research reports in earlier volumes; and most notably, contemporary literacy models and processes enhance and extend earlier theories of reading and writing. Providing a tapestry of models and theories that have informed literacy research and instruction over the years, this volume's strong historical grounding serves as a springboard from which new perspectives are presented. The chapters in this volume have been selected to inspire the interrogation of literacy theory and to foster its further evolution. This edition is a landmark volume in which dynamic, dialogic, and generative relations of power speak directly to the present generation of literacy theorists and researchers without losing the historical contexts that preceded them. Some additional archival essays from previous editions are available on the book's eResource. New to the Seventh Edition: Features chapters on emerging and contemporary theories that connect directly to issues of power and contrasts new models against more established counterparts. New chapters reflect sweeping changes in how readers and writers communicate in a digital era. Slimmer volume is complemented by some chapters from previous editions available online.

Future Offline and Online Reader Reading Habit Research Johnny Ch Lok, 2018-09-02 Chapter Six How to change future e-reader study habit to feel better Nowadays, publishers, internet bookstores manufacturer e-readers have high expectations for digital future of book industry. If they expected e-book publishing industry success, they need to considerate how to assist to future e-readers to let them to feel whose reading habit to be better in order to persuade or attract them to choose to read e-books more easily, due to doctors indicated that long time e-books reading will cause eye poor health and tired and poor nervous reason in possible and paper book price competition and more topic choice reason. It is one value consideration question that e-book publishers need to considerate. For example, in the US Amazon publish has improved the reading market by producing e Reader that is easy to use and making it easy for clients to purchase a wide variety of books at competitive prices. It will bring digital reader technology as an opportunity to open new target markets and create new e-readers. The question is how Amazon publish, such as e-book publishers change future e-reader reading habit to feel to choose e-books reading method is better than paper books reading method. The successful factors may include as below: E-book reading market is similar to e-music listening market. They need every e-book reader and/or digital music listen listener to discover why to apply this kind of new digital technology reading or listening method which is better to enjoy to read every e-book content and/or listen every digital music song in order to adopt new listening and/or reading digital technological learning habits or experiences. So, this new digital technological reading or/and digital music listening process, every e-book reader or digital music listener needs to learn how to adopt this kind new digital reading or/and listening products to change from his/her traditional paper book reading or/and CD/DVD music song listening method to this new technological digital reading or listening methods from computer tool channel. In this changing habit process, every e-book reader or/and e-music listener needs to spend some time to learn how to apply internet technological tool to help whose to read digital book or listen digital music from computer channel. So, he/she must attempt to change whose habit from traditional paper book reading habit and/or CD/DVD listening music

habit to e-book reading habit and/or e-music listening habit. Furthermore, e-book publishers also need to know whether which kind of book topics are be favorable popular to be chose to read for either student reader target to read or mature age reader target to read or old age reader target to read. Who will purchase the topic to read to be e-Reader? Will they be designed to appeal to be a group of e-reader customers or only to those who have a high degree of comfort with technology to enjoy e-reading method? Will people who read once in a time be purchased by the small group of e-reading clients who buy and read a high volume of e-books? What reasons, readers will choose to read the topics of e-books more than paper books? Will publishers be able to use e-books and e-readers to extend the many different age e-reading clients, e.g. young, mature, retirement, old, student age e-readers? Will publishers ever more to all readers are only choose digital e-reading model habit or who are a half digital e-reader and a half paper book reading habit clients to them?

School Libraries in a Time of Change Kathleen W. Craver,2019-08-01 By becoming practical futurists, school librarians can help their libraries not only to survive sweeping changes in education but to thrive. This book shows how to spot technological trends and use them to your library's advantage. During this time of rapid modernization of technology and educational reform, this book is a must-read for school librarians tasked with ensuring their libraries meet evolving standards. This title provides the research and organizational techniques and skills they need to gain seats at the table of the three power committees: technology, curricula, and strategic planning. School librarians need to collect and publicize national and local school-based evidence that shows the positive correlations between school librarians and student achievement. Craver notes correlative sources and provides ideas to employ them to ensure that school librarians remain indispensable. In addition, acquiring technological skills and becoming expert at their application are paramount for librarians. Even more important is the need for librarians to assume sole responsibility for designing and integrating information literacy and critical thinking skills throughout the curriculum. Craver analyzes studies that show students' inability to discern fact from fiction, ads from news, and information bias in electronic information sources and recommends six actions that school librarians take to ensure that they become active participants in their future rather than its victims.

Dimensions of Literacy Stephen B. Kucer,2014-02-03 This popular text, now in its fourth edition, “unpacks” the various dimensions of literacy—linguistic and other sign systems; cognitive; sociocultural; and developmental—and at the same time accounts for the interrelationships among them. Distinguished by its examination of literacy from a multidimensional and interdisciplinary perspective, it provides a strong conceptual foundation upon which literacy curriculum and instruction in school settings can be grounded. Linking theory and research to practice in an understandable, user-friendly manner, the text provides in-depth coverage of the dimensions of literacy, includes demonstrations and “hands-on” activities, examines authentic reading and writing events that reflect key concepts, and summarizes the concepts in tables and figures. Changes in the Fourth Edition • Addresses academic language, new literacies/multiliteracies, and their relationship to literacy learning • More fully develops the developmental dimension of literacy in separate chapters on adult mediation and learner construction • Expands the discussion of multimodal literacies • Extends and integrates the discussion of bilingualism and biliteracy throughout the text • Integrates instructional implications more fully throughout

Security Technology Convergence Insights Ray Bernard,2015-04-02 Security technology convergence, which refers to the incorporation of computing, networking, and communications technologies into electronic physical security systems, was first introduced in the 1970s with the advent of computer-based access control and alarm systems. As the pace of information technology (IT) advances continued to accelerate, the physical security industry continued to lag behind IT advances by at least two to three years. Security Technology Convergence Insights explores this sometimes problematic convergence of physical security technology and information technology and its impact on security departments, IT

departments, vendors, and management. Includes material culled directly from author's column in Security Technology Executive Easy-to-read question and answer format Includes real-world examples to enhance key lessons learned

Text Relevance and Learning from Text Gregory Schraw,Matthew T. McCrudden,Joseph P. Magliano,2011-08-01 Why do people from similar backgrounds who read the same text construct different meanings? Is there a question behind every reading goal, such that reading is an interactive process of asking and answering of questions? Do people who believe that knowledge is dynamic construct meaning differently than those who believe that knowledge is certain? This volume addresses questions such as these and presents cutting edge research and theory that explores how readers determine text relevance (i.e., the different values they assign to information as they read), how relevance affects understanding, and the implications of these studies for theories of text comprehension. This volume documents in a compelling manner the ongoing international effort to understand how text relevance affects reading and comprehension. Contributing authors represent major academic institutions on three continents and nine countries, demonstrating the multinational interest in text relevance. Why is there so much interest in text relevance? Learners are inundated with unprecedented amounts of information, and increased research regarding how readers process non-traditional texts (e.g., documents on the web) and multiple documents, for example, underscores the importance of understanding how readers determine the relevance of text information for personal, academic, or professional goals, which can enable educators to design learning situations that help learners get the most out of reading.

Bringing Reading Research to Life Margaret G. McKeown,Linda Kucan,2009-11-30 This book brings together some of the world's foremost literacy scholars to discuss how research influences what teachers actually do in the classroom. Chapters describe the current state of knowledge about such key topics as decoding, vocabulary, comprehension, digital literacies, reading disabilities, and reading reform. At the same time, the authors offer a unique "inside view" of their own research careers: key personal and professional influences, how their research agendas took shape, and what they see as the most important questions currently facing the field. The book honors the contributions of Isabel Beck, who has achieved tremendous success in translating research into widely used instructional practices.

Reading at a Crossroads? Rand J. Spiro,Michael DeSchryver,Michelle Schira Hagerman,Paul M. Morsink,Penny Thompson,2015-03-05 The Internet is transforming the experience of reading and learning-through-reading. Is this transformation effecting a radical change in reading processes as readers synthesize understandings from fragments across multiple texts? Or, conversely, is the Internet merely a new place to use the same reading skills and processes developed through experience with traditional print-based media? Are the changes in reading processes a matter of degree, or are they fundamentally new? And if so, how must reading theory, research, and instruction adjust? This volume brings together distinguished experts from the fields of reading research, teacher education, educational psychology, cognitive science, rhetoric and composition, digital humanities, and educational technology to address these questions. Every question is not answered in every chapter. How could they be? But every contributor has many thoughtful things to say about a subset of these important questions. Together, they add up to a comprehensive response to the issues the field faces as it approaches what may well be—or not —a crossroads. A website devoted to extending discussion around the book in creative (and disjunctive) ways [readingatacrossroads.net] moves it beyond the printed page.

Offline Donna Cooner,2020-09-01 In this e-book original, acclaimed author Donna Cooner spins a timely and gripping story of how we live our lives on -- and off -- social media. Annie Webb is constantly online. She loves following influencer accounts, DM'ing with her two best friends, Luna and Caitlin, and posting selfies with her adorable boyfriend, Jameson. Then Jameson breaks up with Annie -- online. The public humiliation is immediate and intense, and Annie is overwhelmed by the cruel comments that pour in. To help Annie cope, Luna and Caitlin make a plan: the three of

them will stay off social media for a month. No posting. No scrolling. No cheating. But unplugging is much harder than they thought. And when the rest of their school finds out about their offline challenge, can the three girls keep their vow -- and their friendship?

Internet Newspapers Xigen Li, 2013-09-13 *Internet Newspapers: The Making of a Mainstream Medium* examines newspapers on the Internet, and addresses the emergence of online newspapers and the delivery of news through this outlet. Utilizing empirical research, chapters explore the theoretical and practical issues associated with Internet newspapers and examine the process through which online newspapers have grown into a mainstream medium. Contributions to this work emphasize three key areas: the structure and presentation of newspapers on the Internet; the medium as an interactive process; and the ways in which the public interacts with Internet newspapers. This collection makes a substantial contribution to the understanding of newspapers on the Internet, covering their development and changes as well as the impact that news delivery through this medium has had on other media, audiences, and society. It also sheds light on improving operation and performance of Internet newspapers to better serve the public and gain competitive knowledge. The volume encourages additional scholarship in this area, and also shows how researchers can benefit from an empirical approach to their examination of Internet newspapers. *Internet Newspapers* will appeal to scholars, researchers, and students of journalism and mass communications, and can be used as a supplementary text in advanced courses covering journalism, communication technology, and mass media and society.

Innovative Security Solutions for Information Technology and Communications Diana Maimut, Andrei-George Oprina, Damien Sauveron, 2021-02-03 This book constitutes the thoroughly refereed post-conference proceedings of the 13th International Conference on Security for Information Technology and Communications, SecITC 2020, held in Bucharest, Romania, in November 2020. The 17 revised full papers presented together with 2 invited talks were carefully reviewed and selected from 41 submissions. The conference covers topics from cryptographic algorithms, to digital forensics and cyber security and much more.

Cells and Culture Thomas Noll, 2010-07-17 Regeneration of tissue to replace damaged or injured tissue is the goal of tissue engineering. Biomaterials like polyglycolic acid, collagen and small-intestinal submucosa provide a temporary scaffold to guide new tissue growth and organization. Typically, they need to be biodegradable, showing good cell attachment and proliferation and they should possess appropriate mechanical properties (Kim et al. , 2000). Synthetic polymers fulfill most of these requirements but lack cell-adhesion peptides on their surface to enhance cell attachment. Cell-adhesion peptides are present in ECM proteins like collagen and elastin. Thus a synthetic polymer coated with ECM proteins would result in a scaffold that mimics the natural cellular environment with enhanced cell attachment and proliferation. The new bioactive scaffold will be made by combining a synthetic polymer coated with a layer of recombinant ECM proteins produced by CHO cells. The first step consists of identifying polymers that give best results in terms of CHO cell attachment and growth. Classical techniques to determine biomass are inappropriate to evaluate 3-D structures. Thus a screening system based on stable GFP expressing CHO cells was used to compare the different scaffolds. Simple fluorescent measurement after cell lysis allows determining cell attachment and proliferation on synthetic polymers. Finally CHO cells producing human recombinant collagen I and elastin were generated. We showed that both proteins are expressed and secreted by CHO DG44 cells. 2 Materials and Methods 2.

Demystifying Academic Reading Zhihui Fang, 2023-09-29 Foundational and accessible, this book equips pre-service and practicing teachers with the knowledge, understanding, tools, and resources they need to help students in grades 4–12 develop reading proficiencies in four core academic subjects—literature, history, science, and mathematics. Applying a disciplinary literacy approach, Fang describes the verbal and visual resources, expert strategies, inquiry skills, and habits of mind that students must learn in order to read carefully, critically, purposefully, and with an informed skepticism across genres and content areas. He also shows how teachers can promote language learning and reading/literacy development at the same time that they engage students in content area learning. With informative synthesis and research-based recommendations in every chapter, this text prepares teachers to help students develop discipline-specific, as well as discipline-relevant, discursive insights, literacy strategies, and ways of thinking, reasoning, and inquiring that are essential to productive learning across academic subjects. It also provides teacher educators with approaches and strategies for helping teacher candidates develop expertise in academic reading instruction. In so doing, the book demystifies academic reading, revealing what it takes for students to read increasingly complex academic texts with confidence and understanding and for teachers to develop expertise that promotes disciplinary literacy. This state-of-the-art text is ideal for courses on reading/literacy methods and academic literacy and eminently relevant to all educators who want their students to become thoughtful readers and powerful learners.

The New Literacies Elizabeth A. Baker, 2010-04-13 With contributions from leading scholars, this compelling volume offers fresh insights into literacy teaching and learning—and the changing nature of literacy itself—in today's K–12 classrooms. The focus is on varied technologies and literacies such as social networking sites, text messaging, and online communities. Cutting-edge approaches to integrating technology into traditional, print-centered reading and writing instruction are described. Also discussed are ways to teach the new skills and strategies that students need to engage effectively with digital texts. The book is unique in examining new literacies through multiple theoretical lenses, including behavioral, semiotic, cognitive, sociocultural, critical, and feminist perspectives.

Google Apps Hacks Philipp Lenssen, 2008 Google is challenging the venerable Microsoft Office suite with its own Web-based office applications. This book offers scores of clever hacks and workarounds that enable power users to get more out of various applications.
