reflect current trends and topics, in the most complete reorganization since the second edition. Further changes include: all public policy topics have been placed in the last section, making it simpler to use for courses that emphasize theory or public policy; an entirely new chapter on international trade and industrial organization; a new chapter on mergers; a separate section on antitrust; a companion website with PowerPoint slides and other supplements. European Union Competition Policy versus Industrial Competitiveness Hikaru Yoshizawa,2021-11-10 The book examines whether EU competition policy is applied fairly and consistently to EU and non-EU firms despite persistent political pressure from member states for a relaxation of the rules and deals with the dilemma of regional organisations in the global political economy. Focussing on the EU's desire to achieve balance between the promotion of market competition and the enhancement of international competitiveness, the book explores the validity of its attempts successfully to ensure a 'stringent competition policy' which is nationality-blind and comparatively strict. Finally, it shows that the

competition-competitiveness dilemma remains unresolved because the EU's capability to set global regulatory standards is constrained by competition and the need to engage in multilateral forums, such as the WTO and the International Competition Network. This book will be of key interest to scholars and students of European Union studies, EU competition law and policy, EU external action and more broadly to global governance, international political economy and international relations.
