**Play and Creativity in Art Teaching** George Szekely, 2015-03-02 In Play and Creativity in Art Teaching, esteemed art educator George Szekely draws on his

two classic volumes, *Encouraging Creativity in Art Lessons* and *From Play to Art*, to create a new book for new times. The central premise is that art teachers are not only a source of knowledge about art but also a catalyst for creating conditions that encourage students to use their own ideas for making art. By observing children at play and using props and situations familiar to them, teachers can build on children's energy and self-initiated discoveries to inspire school art that comes from the child's imagination. The foundation of this teaching approach is the belief that the essential goal of art teaching is to inspire children to behave like artists, that art comes from within themselves and not from the art teacher. *Play and Creativity in Art Teaching* offers plans for the study of children's play and for discovering creative art teaching as a way to bring play into the art room. While it does not offer a teaching formula or a single set of techniques to be followed, it demystifies art and shows how teachers can help children find art in familiar and ordinary places, accessible to everyone. This book also speaks to parents and the important roles they can play in supporting school art programs and nourishing the creativity of their children.

**Measurement Methodologies to Assess the Effectiveness of Global Online Learning** Isaias, Pedro, Issa, Tomayess, Kommers, Piet, 2022-02-18 While online learning was an existing practice, the COVID-19 pandemic greatly accelerated its capabilities and forced educational organizations to swiftly introduce online learning for all units. Though schools will not always be faced with forced online learning, it is apparent that there are clear advantages and disadvantages to this teaching method, with its usage in the future cemented.

As such, it is imperative that methods for measuring and assessing the effectiveness of online and blended learning are examined in order to improve outcomes and future practices. Measurement Methodologies to Assess the Effectiveness of Global Online Learning aims to assess the effectiveness of online teaching and learning in normal and pandemic situations by addressing challenges and opportunities of adoption of online platforms as well as effective learning strategies, investigating the best pedagogical practices in digital learning, questioning how to improve student motivation and performance, and managing and measuring academic workloads online. Covering a wide range of topics such as the future of education and digital literacy, it is ideal for teachers, instructional designers, curriculum developers, educational software developers, academics, researchers, and students.

**Computer Games and Technical Communication** Jennifer deWinter, Ryan M. Moeller, 2016-05-23 Taking as its point of departure the fundamental observation that games are both technical and symbolic, this collection investigates the multiple intersections between the study of computer games and the discipline of technical and professional writing. Divided into five parts, Computer Games and Technical Communication engages with questions related to workplace communities and gamic simulations; industry documentation; manuals, gameplay, and ethics; training, testing, and number crunching; and the work of games and gamifying work. In that computer games rely on a complex combination of written, verbal, visual, algorithmic, audio, and kinesthetic means to convey information, technical and professional writing scholars are uniquely poised to investigate the intersection between the technical and symbolic aspects of the computer game complex. The contributors to this volume bring to bear the analytic tools of the field to interpret the roles of communication, production, and consumption in this increasingly ubiquitous technical and symbolic medium.
