Leonhard Euler Robert E. Bradley, Ed Sandifer, 2007-03-20 The year 2007 marks the 300th anniversary of the birth of one of the Enlightenment's most important mathematicians and scientists, Leonhard Euler. This volume is a collection of 24 essays by some of the world's best Eulerian scholars from seven different countries about Euler, his life and his work. Some of the essays are historical, including much previously unknown information about Euler's life, his activities in the St. Petersburg Academy, the influence of the Russian Princess Dashkova, and Euler's philosophy. Others describe his influence on the subsequent growth of European mathematics and physics in the 19th century. Still others give technical details of Euler's innovations in probability, number theory, geometry, analysis, astronomy, mechanics and other fields of mathematics and science. – Over 20 essays by some of the best historians of mathematics and science, including Ronald Calinger, Peter Hoffmann, Curtis Wilson, Kim Plofker, Victor Katz, Ruediger Thiele, David Richeson, Robin Wilson, Ivor Grattan-Guinness and Karin Reich – New details of Euler's life in two essays, one by Ronald Calinger and one he co-authored with Elena Polyakhova – New information on Euler's work in differential geometry, series, mechanics, and other important topics including his influence in the early 19th century

Delineating a Horoscope Raj Kumar, Astrology is a great science based on sound principles and theory of karma through cycles of rebirth. A horoscope is basically a map of zodiac indicating position of planets in various signs/ Nakshatra at the time and place of birth. The delineation of a chart is the science and art of deciphering it as per the knowledge, intuition of the astrologer and divine help available to him. Therefore the first requisite is to have sound knowledge of nature and characteristics of houses, signs, Nakshatra and planets and their inter-relation. Next comes the basic tools like dasha, transit, yoga and divisional chart and their application in delineating a horoscope. Lagna is the single most important factor in delineating a horoscope. It is the very being of the native, his élan vital & basic potential. Unless the seed of a specific quality or event is contained in this basic potential, other planetary indications will not find suitable opportunities for manifestation. Lagna also determines the numbering of houses with lagna being the first. With the change in lagna, the significations of any planet will change drastically, as his house & lordship changes, although the sign & constellation of the planet remain unchanged.

Deep Subsurface Microbiology Andreas Teske,Jennifer F. Biddle, Virginia P. Edgcomb, Axel Schippers,2015-07-01 Deep subsurface microbiology is a highly active and rapidly advancing research field at the interface of microbiology and the geosciences; it focuses on the detection, identification, quantification, cultivation and activity measurements of bacteria, archaea and eukaryotes that permeate the subsurface biosphere of deep marine sediments and the basaltic ocean and continental crust. The deep subsurface biosphere abounds with uncultured, only recently discovered and - at best - incompletely understood microbial populations. In spatial extent and volume, Earth's subsurface biosphere is only rivaled by the deep sea water column. So far, no deep subsurface sediment has been found that is entirely devoid of microbial life; microbial cells and DNA remain detectable at sediment depths of more than 1 km; microbial life permeates deeply buried hydrocarbon reservoirs, and is also found several kilometers down in continental crust aquifers. Severe energy limitation, either as electron acceptor or donor shortage, and scarcity of microbially degradable organic carbon sources are among the evolutionary pressures that have shaped the genomic and physiological repertoire of the deep subsurface biosphere. Its

biogeochemical role as long-term organic carbon repository, inorganic electron and energy source, and subduction recycling engine continues to be explored by current research at the interface of microbiology, geochemistry and biosphere/geosphere evolution. This Research Topic addresses some of the central research questions about deep subsurface microbiology and biogeochemistry: phylogenetic and physiological microbial diversity in the deep subsurface; microbial activity and survival strategies in severely energy-limited subsurface habitats; microbial activity as reflected in process rates and gene expression patterns; biogeographic isolation and connectivity in deep subsurface microbial communities; the ecological standing of subsurface biospheres in comparison to the surface biosphere – an independently flourishing biosphere, or mere survivors that tolerate burial (along with organic carbon compounds), or a combination of both? Advancing these questions on Earth's deep subsurface biosphere redefines the habitat range, environmental tolerance, activity and diversity of microbial life.

Bad Twin Gary Troup, 2006-05-02 Sometimes evil has a familiar face . . . Paul Artisan, P.I. is a new version of an old breed -- a righter of wrongs, someone driven to get to the bottom of things. Too bad his usual cases are of the boring malpractice and fraud variety. Until now. His new gig turns on the disappearance of one of a pair of twins, adult scions of a rich but tragedy-prone family. The missing twin -- a charismatic poster-boy for irresponsibility -- has spent his life daring people to hate him, punishing himself endlessly for his screw-ups and misdeeds. The other twin -- Artisan's client -- is dutiful and resentful in equal measure, bewildered that his other half could have turned out so badly, and wracked by guilt at his inability to reform him. He has a more practical reason, as well, for wanting his brother found: their crazy father, in failing health and with guilty secrets of his own, will not divide the family fortune until both siblings are accounted for. But it isn't just a fortune that's at stake here. Truth itself is up for grabs, as the detective's discoveries seem to challenge everything we think we know about identity, and human nature, and family. As Artisan journeys across the globe to track down the bad twin, he seems to have moved into a mirror-world where friends and enemies have a way of looking very much alike. The P.I. may have his long-awaited chance to put his courage and ideals to the test, but if he doesn't get to the bottom of this case soon, it could very well cost him his life. Troup's long-awaited *Bad Twin* is a suspenseful novel that touches on many powerful themes, including the consequence of vengeance, the power of redemption, and where to turn when all seems lost. *Bad Twin* is a work of fiction and all names, characters and incidents are used fictitiously; the author himself is a fictional character.
