We Love You, Mr. Panda Steve Antony, 2020-09-01 Everyone needs love -- even the bestselling Mr. Panda! Mr. Panda is waiting with eager and open arms to give free hugs -- but nobody seems to want any of his cuddles. After his friends Skunk, Croc, Elephant, Mouse, Sloth, and Ostrich hug each other, Mr. Panda is left wanting some love. If only he knew what his friends have in store... Steve Antony tells a heartwarming story with adorable art and good humor.

A Chance for Lasting Survival Pan Wenshi, 2014-03-04 From 1984 through 1995 a small band of ecologists led by Pan Wenshi from Peking University conducted a study of wild giant pandas in the Qinling Mountains of Shaanxi Province. This project was the first Chinese-led conservation project in China and was conducted during a significant transition period in Chinese history, as the country opened its society and science to the world. The project focused on behavioral observation of wild giant pandas, but evolved to include physiology, nutrition, ecology, land-use policy, and population biology as the staff became more aware that the issues with captive pandas (assisted reproduction, unusual diet, and genetic inbreeding) were not the most critical to survival of wild populations. It is evident in this work that, as the scientists gained knowledge, they came to see giant panda conservation as wrapped in landscape ecology and human/wildlife interactions. The group was seminal in the Chinese government's enactment of a logging ban to their study area by advocating for pandas at the national level. The project was summarized in a 2001 volume, but its publication in Mandarin limited its influence on the greater conservation community. This English version of the original work translates, condenses, and refines the original volume, with added contextual chapters on the importance of this volume and how our understanding of giant panda conservation is shaped by this pioneering field work.

The Panda Poems O. Panda, 2013-03-13 This is the original collection of my feelings about everything that I have lived to experience. My name is Osman Panda, a Sierra Leonean by birth. I was born on September 24th 1952, in Wilberforce Freetown and married with 5 children. Attending the Wilberforce Primary school saw me going to the Prince of Wales secondary school in 1965. Dropping out of school in the 3rd form which is the equivalent of the 10th grade in 1968, I had another opportunity to go back to school working for a judge. In 1969, not able to satisfy his wife's draconian rules, I had to step down again until 1976 when a philanthropist came to my aid Mr. Sahr Martin Ngombu Gbolie of blessed memory founder and proprietor of Kono Model Academy, may his soul rest in peace. He offered me board and lodging and free tuition for two years, thereby helping me to graduate from high school in 1978. After graduating he offered me a teaching job. As a sports teacher and assistant teacher in government and religious knowledge, I served the school for two years and eventually went to the Milton Margais Teachers college in 1980. I majored in Physical Education graduating as the student of the year with a Higher Teachers Certificate in 1983. I taught for two more years in my former school, K M A. Through the grace of the almighty God I received a letter from the principal of the Bo Teachers College inviting me to join the Physical Education Department in 1985. That journey lasted until 1991 when I received another letter from the principal of the only boarding school in The Gambia at that time, the Armitage High School. The most exciting and fruitful moments of my work experience was realized in that country. Through the efforts of my dear wife Comfort I eventually had the privilege to come to the US, where the idea of the PANDA POEMS WAS BORN.

Cybercrime and Digital Forensics Thomas J. Holt,Adam M. Bossler,Kathryn C. Seigfried-Spellar,2017-10-16 This book offers a comprehensive and integrative introduction to cybercrime. It provides an authoritative synthesis of the disparate literature on the various types of cybercrime, the global investigation and detection of cybercrime and the role of digital information, and the wider role of technology as a facilitator for social relationships between deviants and criminals. It includes coverage of: key theoretical and methodological perspectives; computer hacking and malicious software; digital piracy and intellectual theft; economic crime and online fraud; pornography and online sex crime; cyber-bullying and cyber-stalking; cyber-terrorism and extremism; digital forensic investigation and its legal context around the world; the law enforcement response to cybercrime transnationally; cybercrime policy and legislation across the globe. The new edition features two new chapters, the first looking at the law enforcement response to cybercrime and the second offering an extended discussion of online child pornography and sexual exploitation. This book includes lively and engaging features, such as discussion questions, boxed examples of unique events and key figures in offending, quotes from interviews with active offenders, and a full glossary of terms. This new edition includes QR codes throughout to connect directly with relevant websites. It is supplemented by a companion website that includes further exercises for students and instructor resources. This text is essential reading for courses on cybercrime, cyber-deviancy, digital forensics, cybercrime investigation, and the sociology of technology.

Automated Software Engineering: A Deep Learning-Based Approach Suresh Chandra Satapathy,Ajay Kumar Jena,Jagannath Singh,Saurabh Bilgaiyan,2020-01-07 This book discusses various open issues in software engineering, such as the efficiency of automated testing techniques, predictions for cost estimation, data processing, and automatic code generation. Many traditional techniques are available for addressing these problems. But, with the rapid changes in software development, they often prove to be outdated or incapable of handling the software's complexity. Hence, many previously used methods are proving insufficient to solve the problems now arising in software development. The book highlights a number of unique problems and effective solutions that reflect the state-of-the-art in software engineering. Deep learning is the latest computing technique, and is now gaining popularity in various fields of software engineering. This book explores new trends and experiments that have yielded promising solutions to current challenges in software engineering. As such, it offers a valuable reference guide for a broad audience including systems analysts, software engineers, researchers, graduate students and professors engaged in teaching software engineering.

New Casino Slots Victor H. Royer,2010-06-09 The Future is Now! Twenty-first century casinos are nothing like the classic dens of the Rat Pack era—the days of Elvis and Liberace and the “Mob” in the movie “Casino.” Today’s world of slots, and all casino gaming, is as up-to-date as everything else in Las Vegas. The new slots are sophisticated and computerized machines that offer excitement, entertainment, and frequent pays—if you know what to look for and how to

play these new machines when you arrive at the casino....and before you start spending your money. In This Book You Will Find • More than 100 photos of the newest and best slots. • How to find the best games and machines. • How to play the newest slots—before using your own money.

Ringin' the Bell of Freedom Victor Halstrøm,2022-05-25 From the book: Okay, let's do it she said and tried to sound brave although I could tell by her shaking voice that she was scared by the thought. She somehow found resources inside her to be brave. It happened so quickly in her heart and mind that I got the idea that she had done this several times before. Panic was washed away from her face and her eyes glowed soothingly, so I hardly could imagine the fear that had been torturing her soul just seconds earlier. An airplane crashes into the jungle carrying two people, the American man, Shen Mi Ren, and the Chinese woman, Nian Ye. They both survive the accident and find themselves among snakes, bats, crocodiles, and other enemies of the environment. They share the same goal as they both want to get back to civiliza-tion. And they both suffer from amnesia. But that is all they have in common. They must work together, but can they trust each other when only the jungle law rules? The story origins from a book which my friend Captain Fleet has found in the desert. He claims that the book itself has written the story. Is that even possible?
