The Walls Around Us Nova Ren Suma, 2014-12-12 SPECIAL PREVIEW! "Ori's dead because of what happened out behind the theater, in the tunnel made out of trees. She's dead because she got sent to that place upstate, locked up with those monsters. And she got sent there because of me." The Walls Around Us is a ghostly story of suspense told in two voices--one still living and one long dead. On the outside, there's Violet, an eighteen-year-old dancer days away from the life of her dreams when something threatens to expose the shocking truth of her achievement. On the inside, within the walls of a girls' juvenile detention center, there's Amber, locked up for so long she can't imagine freedom. Tying these two worlds together is Orianna, who holds the key to unlocking all the girls' darkest mysteries. We hear Amber's story and Violet's, and through them Orianna's, first from one angle, then from another, until gradually we begin to get the whole picture--which is not necessarily the one that either Amber or Violet wants us to see. Nova Ren Suma tells a supernatural tale of guilt and innocence, and what happens when one is mistaken for the other. Praise for Imaginary Girls: "A surreal and dreamy world where magical thinking is carried to a chilling extreme." --Publishers Weekly, starred review Praise for 17 & Gone: "Suma's exquisite sentence-level writing and fine eye for creepy detail are in abundant evidence." --Kirkus Reviews

A Reader in Edo Period Travel Herbert Plutschow, 2022-03-07 Largely ignored hitherto by Western scholars, Plutschow's *Edo Period Travel* provides the first in-depth study of the subject which is centred on fifteen of the period's most notable travellers, some of whom are well known in other fields – as intellectuals, artists, poets, folklorists and natural scientists, for example – but rarely, if at all, as travellers. The first traveller put in the spotlight is the celebrated intellectual and botanist Kaibara Ekiken (1630-1714) and the last is the explorer of Ezo (now Hokkaido) and government official Matsuura Takeshiro (1818-88). Such was the thirst for knowledge in the Edo period that some travel accounts (estimated to number over 2000) became best-sellers in their day, not least for their voyeuristic appeal, including those of Kaibara Ekiken and Tachibana Nankei, which are included in this volume. This important research on how the Japanese discovered their own country and cultural identity has considerable interdisciplinary appeal. Of particular interest also is the author's discussion on the nature of this new travel writing and the self-centred observation and 'seeing' that developed in the eighteenth and early nineteenth centuries, he calls the 'Japanese Enlightenment'.

A Room Away From the Wolves Nova Ren Suma, 2018-09-04 "Shiver-inducingly delicious."—The New York Times Book Review "[Suma's] narratives are subtle, quicksilver creatures, her language is elegant, and her characters keep more secrets than they reveal. If this book was a dessert, it wouldn't be a chocolate chip cookie or a vanilla birthday cake – it would be an earl grey lavender macaroon, or maybe balsamic fig ice cream." – NPR.com "This beautiful story is full of magical-realism and luscious, lyrical writing." – BuzzFeed "Terrific . . . Arnold, author of National Book Award finalist *What Girls Are Made Of* Bina has never forgotten the time she and her mother ran away from home. Her mother promised they would hitchhike to the city to escape Bina's cruel father and start over. But before they could even leave town, Bina had a new stepfather and two new stepsisters, and a humming sense of betrayal pulling apart the bond with her mother—a bond Bina thought was unbreakable. Eight years later, after too many lies and with trouble on her

heels, Bina finds herself on the side of the road again, the city of her dreams calling for her. She has an old suitcase, a fresh black eye, and a room waiting for her at Catherine House, a young women's residence in Greenwich Village with a tragic history, a vow of confidentiality, and dark, magical secrets. There, Bina is drawn to her enigmatic downstairs neighbor Monet, a girl who is equal parts intriguing and dangerous. As Bina's lease begins to run out, and nightmare and memory get tangled, she will be forced to face the terrible truth of why she's come to Catherine House and what it will cost for her to leave . . . In *A Room Away from the Wolves*, critically acclaimed and New York Times bestselling author Nova Ren Suma weaves a spellbinding ghost story about who deserves a second chance, how we lie to those around us and ourselves, and what lengths girls will go to in order to save each other.

Reading The Tale of Genji Thomas Harper, Haruo Shirane, 2015-12-01 *The Tale of Genji*, written one thousand years ago, is a masterpiece of Japanese literature, is often regarded as the best prose fiction in the language. Read, commented on, and reimagined by poets, scholars, dramatists, artists, and novelists, the tale has left a legacy as rich and reflective as the work itself. This sourcebook is the most comprehensive record of the reception of *The Tale of Genji* to date. It presents a range of landmark texts relating to the work during its first millennium, almost all of which are translated into English for the first time. An introduction prefaces each set of documents, situating them within the tradition of Japanese literature and cultural history. These texts provide a fascinating glimpse into Japanese views of literature, poetry, imperial politics, and the place of art and women in society. Selections include an imagined conversation among court ladies gossiping about their favorite characters and scenes in *Genji*; learned exegetical commentary; a vigorous debate over the morality of *Genji*; and an

impassioned defense of Genji's ability to enhance Japan's standing among the twentieth century's community of nations. Taken together, these documents reflect Japan's fraught history with vernacular texts, particularly those written by women.

Handbook of Membrane Reactors Angelo Basile, 2013-02-08 Membrane reactors are increasingly replacing conventional separation, process and conversion technologies across a wide range of applications. Exploiting advanced membrane materials, they offer enhanced efficiency, are very adaptable and have great economic potential. There has therefore been increasing interest in membrane reactors from both the scientific and industrial communities, stimulating research and development. The two volumes of the Handbook of membrane reactors draw on this research to provide an authoritative review of this important field. Volume 1 explores fundamental materials science, design and optimisation, beginning with a review of polymeric, dense metallic and composite membranes for membrane reactors in part one. Polymeric and nanocomposite membranes for membrane reactors, inorganic membrane reactors for hydrogen production, palladium-based composite membranes and alternatives to palladium-based membranes for hydrogen separation in membrane reactors are all discussed. Part two goes on to investigate zeolite, ceramic and carbon membranes and catalysts for membrane reactors in more depth. Finally, part three explores membrane reactor modelling, simulation and optimisation, including the use of mathematical modelling, computational fluid dynamics, artificial neural networks and non-equilibrium thermodynamics to analyse varied aspects of membrane reactor design and production enhancement. With its distinguished editor and international team of expert contributors, the two volumes of the Handbook of membrane reactors provide an authoritative guide for membrane reactor researchers and materials scientists, chemical and biochemical manufacturers, industrial separations and process engineers, and academics in this field. Considers polymeric, dense metallic and composite membranes for membrane reactors Discusses ceramic and carbon for membrane reactors in detail Reactor modelling, simulation and optimisation is also discussed

The Fracture of Meaning David Pollack, 2017-03-14 From the beginning of its recorded history until the opening to the West in the last century, Japan was caught between a love for and a rejection of Chinese civilization. David Pollack argues that the dialectical relationship between the two countries figured more importantly in the Japanese sense of identity and signification than any particular borrowed Chinese cultural materials. Reading Inca History Catherine Julien, 2009-05 At the heart of this book is the controversy over whether Inca history can and should be read as history. Did the Incas narrate a true reflection of their past, and did the Spaniards capture these narratives in a way that can be meaningfully reconstructed? In *Reading Inca History*, Catherine Julien finds that the Incas did indeed create detectable life histories. The two historical genres that contributed most to sixteenth- and seventeenth-century Spanish narratives about the Incas were an official account of Inca dynastic genealogy and a series of life histories of Inca rulers. Rather than take for granted that there was an Inca historical consciousness, Julien begins by establishing an Inca purpose for keeping this dynastic genealogy. She then compares Spanish narratives of the Inca past to identify the structure of underlying Inca genres and establish the dependency on oral sources. Once the genealogical genre can be identified, the life histories can also be detected. By carefully studying the composition of

Spanish narratives and their underlying sources, Julien provides an informed and convincing reading of these complex texts. By disentangling the sources of their meaning, she reaches across time, language, and cultural barriers to achieve a rewarding understanding of the dynamics of Inca and colonial political history.
