Managing in the Media William Houseley,Tom Nicholls,Ron Southwell,2013-04-26 *Managing in the Media* has been devised for a broad audience. It is based upon the perceived need for a text that amalgamates cultural theories, film and television analysis, management theories and media production practice into one volume. There are many books on film and cultural studies. Similarly, there are copious numbers of texts written on management. To date little has been written that analyses the management of the audiovisual industry set against the backdrop of the cultural and economic environment within which the media manager operates. *Managing in the Media* is divided into three sections that take the reader from the global to the specific, from the strategic to the tactical. Each chapter discusses specific topics that can be read in isolation yet contribute to the theme within each part. Taken as a whole, the book provides the potential professional media manager and current practising media manager with a framework of issues that will give them an awareness of the range of knowledge needed by the successful media manager. This book does not try to be a manual to success. The media industry is awash with successful individuals none of whom needed textbooks to set them on their chosen career paths. Yet these exceptional people prove the rule; that in the main, most media practitioners would benefit from some additional support and guidance. The aim of this book is to present to them some of the management issues that have, or will have, an impact upon their working careers. The accompanying website www.mediaops.net (which can also be accessed via www.focalpress.com) features: - Tutor notes and reader activities - Updated list of further reading - Additional support material such as production templates - Interviews with the authors - A discussion forum - Industry and education links - Media News

Media Management Andrej Vizjak,Max Josef Ringlstetter,2012-11-02 As the media converges with the telecommunication industry leveraging content becomes key for both formerly separate industries. As new channels are offered and used to distribute various contents - from music to games, from text to videos - companies have to think about innovative ways to even more profit from providing the channels or from providing the content or from providing both. New business models are emerging that are made for leveraging content and finding their way to the customers. This book explains why and how more content leverage becomes reality.

Media Management Bernd W. Wirtz,2021-09-13 “Digitalization significantly changes the media. To cope with this change and to exploit new market opportunities is a major challenge for media corporations. Bernd Wirtz provides a valuable guideline for this new world, combining theory, facts, and practice.” Dr. Hubert Burda, German publisher and Managing Corporate Partner of Hubert Burda Media Holding KG “The media business is subject to substantial change while differences between distinctive media areas are fading away. This is due to technical innovation in areas like transmittance of content, bearer of content and recording devices but also due to new formats, trends and constant change of consumer behavior.” The textbook “Media and Internet Management” stays abreast of changes and covers this topic on a well-founded and comprehensive basis. It makes a valuable contribution to theory and practice in media management and is highly recommendable to media managers.” Christoph Mohn, Chairman of the Supervisory Board, Bertelsmann

AG “The world of media is full of challenges and dynamic conditions for its field. The dynamic of this market is accelerated even more by new digital technologies and ongoing globalization. This book is an absolute “must have” for everyone who wants to know more about the basics, conditions and requirements of modern media management. The analytical clearness and structure make this publication highly relevant for students, but also for managers.” Urs Rohner, Chairman of the Board of Directors, Credit Suisse Group AG “Media Management is a textbook, but a very welcome newcomer for students and teachers as it fills a market gap for good educational material in this rapidly evolving field. It is concise, simple (but not simplistic), and contains a contemporary overview of concepts and tools for media managers. ” Prof. Dr. Bozena I. Mierzejewska, Editor of The International Journal on Media Management, Fordham University, New York “Summed up, with his second edition Wirtz managed to strengthen the outstanding position of his publication “Media Management”. His textbook shines because of its content, analytical clearness and the high relevance for business practice without losing its academic background. With the second edition this book has established its position in the field of media business as the leading standard reference book in Germany. It is suitable for business students, lectures as well as managers who can gain magnificent information from it.” Prof. Dr. Wolfgang Fritz, Director of the Institute of Marketing, Braunschweig University of Technology, Germany; Honorary Professor at the Institute of Business Administration, University of Vienna, Austria.

Media Relations Measurement Ralf Leinemann,Elena Baikaltseva,2017-05-15 Nowadays most managers seek a complete picture when it comes to return on investment and this applies to PR too. Despite this, and the developments in measurement tools for marketing and advertising, PR has lagged behind and different professionals have favoured different models. Ralf Leinemann and Elena Baikaltseva's book brings together the range of models for evaluating PR effectiveness and develops them into a series of appropriate tools for business use. Basic concepts such as balanced scorecards, business fundamentals and planning processes are all covered. The authors also introduce their own theory of PR evaluation and apply it to five different types of activity: interviews, press conferences, generic campaigns, crisis PR and long-term projects. In addition, the book contains many valuable tips and real-life examples throughout. Written for corporate PR practitioners and marketing/communications specialists, this book brings together business objectives and the evaluation of company impact in terms of media, reputation, visibility of the company and its competitors. In total, more than 60 different methods of evaluation are discussed, providing readers with an indispensable toolkit for mapping each PR task or project by selecting the appropriate method from the menu provided.
