**Hilhaven Lodge** , 2003 Red-hot Hollywood director Brett Ratner (Rush Hour I and II, Red Dragon and the forthcoming Superman), lives in Ingrid Bergram's old Hillhaven Lodge, where he houses his old-fashioned b/w photo booth. Into this booth Ratner has enticed a cornucopia of white-hot celebrities, personalities and legends, all of whom voluntarily vlogged, posed and made silly faces without the help of stylists and makeup artist. The result is a hilarious and revealing look at such people as Michael Jackson, Britney Spears, Liv Tyler, Colin Farrell, Mariah Carey, Edward Norton and Salmay Hayek and more.

Photos For OS X: A Beginner's Guide Steve Markelo, 2015-07-16 Over the last few years, our photos and devices have advanced. Digital cameras and other devices alike allow us to capture thousands upon thousands of high-quality images; images that we have been cramming into external hard drives and SD cards. In the phone world, the iPhone is quite possibly the best camera most of us have with us most of the time. The iPhone can help you capture some of the most precious moments you'll ever have given the iSight camera optics, an amazing image signal processor, and the full power of the App Store behind it,. And let's be honest, the power to edit and recreate your pictures has become a necessity, even to the average person. However, the task of storing and managing photos is quite burdensome. If you are an "I" fan, then you probably have heard about the OS X Yosemite operating system which features the Photos for OS X software.

**Take Control of Your Digital Photos on a Mac** Jeff Carlson, 2013 Build a digital workflow to import, tag, rate, and organize your photos! Why bother taking photos if you can't find them later? If you want to be able to lay your hands on any given photo in your ever-expanding library, digital photography expert Jeff Carlson has developed a simple system you can use to make your photo collection browsable, searchable, and generally navigable! Jeff leads off by helping you understand the strengths and weaknesses of the four most popular photo-management applications: iPhoto and Aperture from Apple, and Lightroom and Photoshop Elements from Adobe. Once you've picked the app that's right for you (and there's a chapter on migrating photos), you'll learn how to create a custom workflow for importing, evaluating, keywording, and tagging your photos so they are quickly sorted into logical groups. For each of these essential aspects of your workflow, Jeff provides step-by-step instructions for each of the four covered applications. And since it's all too easy to lose everything if you don't have backups, Jeff discusses the best way to back up and archive your photos to protect your irreplaceable photographic memories. In the process of creating your custom digital photo workflow, you'll find expert advice about each of these photo-management topics: Shooting smarter: Make sure your camera is set to the correct time (and time zone), choose a file format, and think about capturing geolocation data while you're out taking photos. Choosing the right app: Learn about the pros and cons of the most popular photo-management applications--iPhoto, Aperture, Lightroom, and Photoshop Elements--and find directions for how to migrate your photos from iPhoto to Aperture or Lightroom, or from Aperture to Lightroom. Importing photos: Make your Mac apply keywords and other tags in a batch during import, and make sure you're storing files in a place that makes sense going forward. Judging photos: Get time-tested tips for rating individual photos and learn how to deal with bad photos, whether you want to delete them, hide them, or leave them be. Assigning metadata: Once your camera and your computer have assigned as much metadata as possible automatically, you'll need to do the final bits yourself. Jeff describes how to think about this process, and he gives you specific steps for how to proceed efficiently. Putting photos in albums: With your metadata successfully applied, it's time to enjoy the fruits of your labor! Learn how to set u...
