Markets in Fashion Patrik Aspers, 2012-10-02
Interest in contemporary cultural industries has grown in the past decade, as they take on a greater significance in our increasingly consumer-led society. Focusing on the world of fashion photography, this book presents an interdisciplinary approach in which this and other aesthetic markets, such as advertising, modelling, art, music and more, can be viewed. The main thrust of this groundbreaking book, is in developing a theory for these cultural markets, characterized by insecurity, and where status and aesthetic diversity generate order and price differentiation. In these industries, services and products are offered that are a mix of the aesthetic and the economic, and for fashion photographers such as those studied here, it is necessary to carefully position themselves in the market by developing unique photographic styles and separating themselves from competitors. Yet the markets in which these industries operate differ from the type of exchange markets depicted by neoclassical economists, and therefore cannot be considered using such modes of analysis. Instead Aspers conducts his study using empirical phenomenology, an original approach presented here for the first time, which can be easily used in other empirical studies. He draws on original empirical material; participant observation and interviews generated in New York and Stockholm;

which bring a depth of analysis and a relevance to this book which academics, researchers and those with a vested interest in such industries will value. Written by one of the world's brightest young economic sociologists, this fascinating book (previously published in Sweden and enthusiastically received) is endorsed by recognized industry authorities. A noteworthy book, it provides a foothold in the burgeoning sub discipline of economic sociology, and a significant analysis of the economics of the fashion photography industry.

Dress, Fashion and Technology Phyllis G. Tortora, 2015-02-26 Technology has been an essential factor in the production of dress and the cultures of fashion throughout human history. Structured chronologically from prehistory to the present day, this is the first broad study of the complex relationship between dress and technology. Over the course of human history, dress-making and fashion technology has changed beyond recognition: from needles and human hands in the ancient world to complex 20th-century textile production machines, it has now come to include the technologies that influence dress styles and the fashion industry, while fashion itself may drive aspects of technology. In the last century, new technologies such as the electronic media and high-tech manufacturing have helped not just to produce but to define fashion: the creation of automobiles prompted a decline in long skirts for women while the beginnings of space travel caused people to radically rethink the function of dress. In many ways, technology has itself created avant garde and contemporary fashions. Through an impressive range of international case studies, the book challenges the perception that fashion is unique to western dress and outlines the many ways in which dress and technology intersect. Dress, Fashion and Technology is ideal reading for

students and scholars of fashion studies, textile history, anthropology and cultural studies.

Introduction to Journalism and Mass Communication Finlay Webb,2018-11-20 Mass communication is an inter-disciplined domain. It can't understand as stand alone subject, because it deals with society and culture at one hand and technology at the other. Thus this book was needed

that could give a comprehensive explanation of terms, concepts, theories and principles at one place. In recent times mass media has grown as a widespread industry which is working all over the world. Here in this book it is the sincere effort of the author to put the matter and facts, myths and realities all in a lucid manner. This book is designed keeping in view the average reader and beginners as well. This book will quench the thirst of knowledge in this field and it is the sincere hope of the author. If it proves to be of little value to the readers, all efforts and hardships of the author will amply be awarded. This book is created for the needs of students relating to the area of journalism and mass communication. As social contexts and milieus undergo changes and get increasingly complex, journalism too undergoes transformations, and gets ever more crucial to the running of a society. In such a scenario, it becomes imperative that one considers the import journalism carries, and how the issues and problems in it are central to how we perceive the world.

Islam, Faith, and Fashion Magdalena Craciun, 2017-09-07 The subject of religion and dress in Turkey has been debated at great length

both in academia and the media. Through in-depth ethnographic research into the Turkish fashion market and the work of a category of new comers, namely headscarf-wearing fashion professionals, *Islam, Faith, and Fashion* examines entrepreneurship in this market and the aesthetic desirability, religious suitability, and ethical credibility of fashionable Islamic dress. What makes a fashionable outfit Islamically appropriate? What makes an Islamically appropriate outfit fashionable? What are the conditions, challenges and constraints an entrepreneur faces in this market, and how do they market their products? Is the presumed oxymoronic nature of Islamic fashion a challenge or a burden? Through case studies and ethnographic portraits, Craciun questions the commercialization of Islamic dress and tackles the delicate and often incompatible relationship between clothing worn in recognition of religious belief and clothing worn purely because it is fashionable. This timely analysis of fashion, religion, ethics, and aesthetics presents dress as a disputed and a contested locus of modernity. *Islam, Faith, and Fashion* will be essential reading for students of fashion, anthropology, and material and visual culture.

Picture Perfect Posing Roberto Valenzuela, 2014
Photographer, author, and educator Roberto Valenzuela has a proven track record for teaching and explaining difficult concepts to photographers of all skill levels. His remarkable ability to break down complicated ideas into understandable, approachable elements that photographers can truly grasp--and then use their new found knowledge to improve their photography--made his first book, *Picture Perfect Practice*, a breakout success. In *Picture Perfect Posing*, Roberto takes on the art of posing. For many photographers, after learning to compose an image and even light it properly, a portrait can still easily be a failure if the pose is not natural, elegant, and serving the needs of both the subject and the photographer. Instead of just showing page after page of poses--like most posing books on the market--Roberto actually breaks down the concept of posing by examining the anatomy, starting with the core foundation: the spinal chord and neck. Building from there, Roberto discusses every component of what makes poses work, as well as fail. How should the model hold her hands? Bend her elbows? Position her fingers? Should the model look toward or away from the camera, and why? It all depends on what the photographer wants for the shot, and Roberto

discusses the entire process, from the intent of the photographer through the execution of the pose. For those who have been discouraged by an inability to pose their subjects, or who have simply not known where to start in order to figure it out, *Picture Perfect Posing* is the essential resource they need to learn how posing truly works, and how they can learn to direct the exact pose they need for the shot they want.

Love Troubles Wanning Sun, 2023-05-18 Four decades of economic reform have made China one of the most unequal countries in the world - but the impact of this inequality is not just socioeconomic. *Love Troubles* is the first book to examine the emotional cost of this inequality to the intimate and emotional lives of China's people. Drawing on first-hand ethnographic research among rural migrant factory workers in the Pearl River Delta in southern China, Wanning Sun critically analyzes narratives about love, romance, and intimacy in contemporary Chinese public discourses. Examining the impact of economic and cultural inequality on private life, this book both embodies and facilitates an intimate turn in the study of China's social change, and presents a significant intellectual intervention into worldwide debates on inequality.
