--Experiencing a photograph is a uniquely personal experience that draws upon the viewer's experiences, biases and knowledge in relation to the captured content. Similarly, creating a photograph is shaped by the personality, experiences and moods of the model and photographer, their relationship and interactions and the environment they are working, as well as, any other individuals in the room. These are two distinct and individual moments, and what I have observed at my shows in the past is reliance on the title for direction or inquiries about intent and meaning. It was in this vein that the concept of including my poetry with the images may assist in bringing the viewer into the creation moment of the producers. The words accompanying these images come from many different places: a conversation we had during the shoot, a thought I have had about the plight of a people or person, a feeling or impression that I gathered from the image, or from the recesses of my own experiences. Regardless of where they sprouted from they are paired with the image to provide a more rounded experience in viewing and appreciating the work that these wonderful individuals and I have created. So I welcome you to this adventure and journey and invite you to stay a minute. Experience and digest the material in the manner that is most comfortable for you. Lose yourself for a moment and connect once more with the humanity and experiences presented. Beautiful, raw, disturbed, sensual, distressed or elated, every story here has its own beauty!

Captivate Deluxe Vanessa Van Edwards,2017-04-25 The deluxe eBook edition of CAPTIVATE includes twelve exclusive videos from author Vanessa Van Edwards, where she gives tips on storytelling, using hand gestures to build rapport, recognizing non-verbal cues, decoding micro-expressions, and more. Readers will learn how to set up mini-experiments and read cues, making them more adept communicators. Vanessa also interviews Paige Hendrix Buckner, CEO of ClientJoy. Do you feel awkward at networking events? Do you wonder what your date really thinks of you? Do you wish you could decode people? You need to learn the science of people. As a human behavior hacker, Vanessa Van Edwards created a research lab to study the hidden forces that drive us. And she's cracked the code. In Captivate, she shares shortcuts, systems, and secrets for taking charge of your interactions at work, at home, and in any social situation. These aren't the people skills you learned in school. This is the first comprehensive, science backed, real life manual on how to captivate anyone—and a completely new approach to building connections. Just like knowing the formulas to use in a chemistry lab, or the right programming language to build an app, Captivate provides simple ways to solve people problems. You'll learn, for example... · How to work a room: Every party, networking event, and social situation has a predictable map. Discover the sweet spot for making the most connections. · How to read faces: It's easier than you think to speed-read facial expressions and use them to predict people's emotions. · How to talk to anyone: Every conversation can be memorable—once you learn how certain words generate the pleasure hormone dopamine in listeners. When you understand the laws of human behavior, your influence, impact, and income will increase significantly. What's more, you will improve your interpersonal intelligence, make a killer first impression, and build rapport quickly and authentically in any situation—negotiations, interviews, parties, and pitches. You'll never interact the same way again.
