**Formal Aspects in Security and Trust** Theo Dimitrakos, Fabio Martinelli, 2005-01-19 Second International Workshop on Formal Aspects in Security and Trust is an essential reference for both academic and professional researchers in the field of security and trust. Because of the complexity and scale of deployment of emerging ICT systems based on web service and grid computing concepts, we also need to develop new, scalable, and more flexible foundational models of pervasive security enforcement across organizational borders and in situations where there is high uncertainty about the identity and trustworthiness of the participating networked entities. On the other hand, the increasingly complex set of building activities sharing different resources but managed with different policies calls for new and business-enabling models of trust between members of virtual organizations and communities that span the boundaries of physical enterprises and loosely structured groups of individuals. The papers presented in this volume address the challenges posed by ambient intelligence space as a future paradigm and the need for a set of concepts, tools and methodologies to enable the user's trust and confidence in the underlying computing infrastructure. This state-of-the-art volume presents selected papers from the 2nd International Workshop on Formal Aspects in Security and Trust, held in conjunction with the 18th IFIP World Computer Congress, August 2004, in Toulouse, France. The collection will be important not only for computer security experts and researchers but also for teachers and administrators interested in security methodologies and research.

**Security and Privacy in the Age of Uncertainty** Sabrina de Capitani di Vimercati, Pierangela Samarati, Sokratis Katsikas, 2003-04-30 Security and Privacy in the Age of Uncertainty covers issues related to security and privacy of information in a wide range of applications including: \*Secure Networks and Distributed Systems; \*Secure Multicast Communication and Secure Mobile Networks; \*Intrusion Prevention and Detection; \*Access Control Policies and Models; \*Security Protocols; \*Security and Control of IT in Society. This volume contains the papers selected for presentation at the 18th International Conference on Information Security (SEC2003) and at the associated workshops. The conference and workshops were sponsored by the International Federation for Information Processing (IFIP) and held in Athens, Greece in May 2003.

**Financial Identity Theft** Nicole S. van der Meulen, 2011-10-01 The existence of financial identity theft in the United States, and its (gradual) spread to other areas of the world, increases the need to understand how identity theft occurs and how perpetrators of the crime manage to take advantage of

developments within contemporary society. This book aims to provide such an understanding through an in-depth comparative analysis which illustrates how states, financial service providers, consumers, and others facilitate the occurrence of financial identity theft in the United States and the Netherlands.

Making Policies Work Giliberto Capano, Michael Howlett, M Ramesh, Altaf Virani, 2019 Policy design efforts are hampered by inadequate understanding of how policy tools and actions promote effective policies. The objective of this book is to address this gap in understanding by proposing a causal theory of the linkages between policy actions and policy effects. Adopting a mechanistic perspective, the book identifies the causal processes that activate effects and help achieve goals. It thus offers a powerful analytical tool to both scholars and practitioners of public policy seeking to design effective policies.

*Electronic Payment Systems* James Essinger, 1992 This book explains how Electronic Payment Systems (EPS) can help retail banks and other financial and retail institutions win new customers and keep them. It argues that the prime motivation for deploying EPS should not be to make the

organization's job easier, or to reduce the volume of paperwork, but to make the retail institution's products and services more attractive to customers, and to construct systems through which these more attractive products and services can be delivered. It is only by making the attraction of new customers the primary aim that effective and workable systems can be designed and deployed. Chapter one covers the development of Electronic Payment Systems. Chapters two to five are devoted to Automated Teller Machines (ATMs), Electronic Funds Transfer at Point of Sale (EFTPoS), telephone banking and smart cards, respectively. In each case the chapter concludes with summary guidelines for winning customers. Chapter six provides detailed instructions on how to bring an electronic payment system to the market. The reader is guided through the preparatory planning stage, establishing a strategy, defining the system's requirements, gathering the tools of implementation, launching the service and monitoring its effectiveness. There is also a handy checklist of questions to address. Chapter seven is a survey of the extent of implementation of each of the major types of electronic payment systems in the United Kingdom, United States and continental Europe. Chapter eight explains the principal consumer advantages of using electronic payment systems, suggests ways of overcoming the traditional institutional barriers to accepting the primacy of the customer, and lists the most commonly voiced complaints from the general public about EPS. The final chapter identifies five major trends in the area which will help the reader plan to meet the demands of the future. With his practical down-to-earth approach, and his succinct and engaging style, James Essinger has ensured that this book will be essential reading for anyone needing to understand the strategic marketing implications of electronic payment systems.

**Strategies of Competition in the Bank Card Business** Jarunee Wonglimpiyarat, 2004 This is the first book to describe the history of the innovation of

the bank card, from development to commercialization. It describes the strategies employed by innovators in order to achieve competitive advantage, and the use of technology to manage implementation. Interviews and questionnaire surveys are conducted with all the major players in the bank card industry - Barclays, Citibank, American Express, Diners Club, Visa International, Mondex International and Europay. The result is a clear and penetrating insight into all aspects of the bank card market. Innovations in bank cards - ATM/cash cards, credit cards, EFTPOS/debit cards and smart cards - are analyzed; as are the collaborative strategies employed by the banks to realize the benefits of bank card technology. Strategies of Competition has been written for bankers and those who work in the financial service industry, students undertaking courses in technology/strategic management, and MBA students. It provides a detailed and up-to-date analysis of the logic that banks and bankers adopt in setting bank card strategies under a complex socio-economic environment and competitive conditions. The book is essential reading for all who need to understand the strategic integration and management of banking products and innovations as they relate to the bank card business. Specific topics addressed include: the use of technology in providing banking products/services; strategies in securing the benefits of innovations; and banking sector capability in the innovation and launch of smart cards.

Le dinamiche della conoscenza nel Green Deal Monica Maglio, 2021-12-21 Si definisce “conoscenza” l’insieme del patrimonio di saperi – acquisiti mediante istruzione e formazione, ricerca e innovazione – intriso di valori comuni e condivisi da una comunità. I soggetti che gestiscono le attività afferenti alla conoscenza (creazione, accrescimento, trasferimento, diffusione, conservazione, innovazione) formano un sistema complesso, composto da una varietà di strutture e di attori che devono funzionare con modalità coordinate e sinergiche, creando reti e connessioni: quanto più la conoscenza è omogenea e diffusa tra territori e popolazioni, tanto più sarà possibile incrementare la qualità della vita. La creazione, l’acquisizione e la gestione della conoscenza vengono riconosciute, quindi, come condizioni strategiche per uno sviluppo equo e inclusivo. Non potrà esservi il progressivo abbandono di un paradigma di crescita basato sullo sfruttamento di enormi quantità di risorse naturali, mediante la cosiddetta transizione ecologica, fino a quando la conoscenza non apparterrà a tutti, con il rischio (già evidente) che la disattenzione alla problematica possa rafforzare il fenomeno del green knowledge divide. La prima parte del volume focalizza l’attenzione su alcuni argomenti (strettamente connessi in un percorso lineare ed essenziale, sempre attingendo alla letteratura interdisciplinare) utili a inquadrare il rapporto economia green e conoscenza. La seconda parte ospita approfondimenti

tematici, casi di studio e buone pratiche che mostrano come la conoscenza, gli attori coinvolti nel processo e gli strumenti per applicarla o diffonderla (ad esempio piattaforme, reti di attori, politiche) hanno già prodotto dei risultati in diversi territori e settori.

*Organised Plastic Counterfeiting* John Newton,1995 It is extremely difficult to establish the nature and extent of organized crime. However this report proves counterfeiting of plastic payment cards is an organized criminal enterprise which crosses national boundaries and affects Canada, Europe, the Far East and the United States. Organized criminals systematically manipulate any commodity which enables them to make significant profits. In this instance, the commodity is plastic and the report gives a valuable and extensive insight into the organization and methodology used by particular criminals to attack the card payment system.

**Card, Internet and Mobile Payments in Finland** Hanna Jyrkonen,2014 Retail payment methods are in a stage of rapid development. New service providers and technological developments enable new payment services through a variety of channels. Payment solutions are being developed based eg on the Internet and on mobile phones. Presumably, the use of paper-based payment instruments will decrease further in the future thanks to electronification in the retail payment area. In this paper we focus on card payments in Finland and certain other countries. We also look at Internet- and mobile-based payments and discuss some of the challenges related to the new solutions. The paper ends with a brief discussion of recent changes in Finnish legislation in connection with retail payments.

Later word ik rijk Annelou van Noort,Joëlla Opraus,2024-03-06 Praten over geld doe je pas wanneer je kind oud genoeg is om het zelf te verdienen, toch? En ben jij wel de geschikte persoon om je kind over geld te leren wanneer je zelf nog met zoveel vragen zit? Besef dat kinderen als sponzen zijn:

ze absorberen alles wat ze zien. Hoe jij omgaat met geld - angstig, laks, kwistig of zuinig - bepaalt hoe jouw kind dat zal doen. Uit onderzoek weten we dat geldgewoontes al grotendeels vastliggen bij een kind van zeven, en dat zelfs een peuter de basis van geld begrijpt. Hoog tijd dus om aan die financiële opvoeding te beginnen. Wees gerust: je hoeft heus geen financieel expert te zijn om je kind de juiste principes mee te geven. In Later word ik rijk tonen twee gedragsdeskundigen hoe het moet, met nadenknachtjes, checklists en hersenweetjes. Je leert waarom zakgeld geven geen must is, waarom je je kind die dure sneakers soms gewoon moet laten kopen en wat de juiste leeftijd is om hen een bankpas te geven. Je leert alles over een rijke mindset, en hoe die meer te maken heeft met vrijheid en sociaal kapitaal dan met je bankrekening. Dit boek toont waarom jij de beste persoon bent om je kind over geld te leren (ook als je er zelf geen held mee bent). En het enige wat je daarvoor nodig hebt is een plan.
