*Pinpoint: How GPS is Changing Technology, Culture, and Our Minds* Greg Milner, 2016-05-03 One of the most mesmerizing and exhilarating, yet alarming modern technology books...an extraordinary tale. —Gillian Tett, Financial Times *Pinpoint* tells the fascinating story of a hidden system that touches nearly every aspect of modern life. Tracking the development of GPS from its origins as a bomb guidance system to its present ubiquity, Greg Milner examines the technology's double-edged effect on the way we live, work, and travel. Savvy and original, this sweeping scientific history offers startling insight into how humans understand their place in the world.

**Pinpoint** George Brown, 2012-04-17 France 1961. Operation Ponctuelle: the name given to top level assassinations of Gaullist Ministers. Two men lie in wait in a basement garage underneath the Boulevard St. Germain for the Minister of Special Affairs, their aim to kidnap their target and use him as a bargaining chip in the internecine strife that is tearing France apart. All goes to plan until one of the men reveals his true nature. First the four bodyguards die, then the Minister, then his girlfriend, whose tip off made the operation possible. The other man looks on in horror as a monster is born, a killer more ruthless than all the other players in the deadly war. Soon the fragmented security services are on the look out for the assassin, codenamed Diderot. But in the boiler room paranoia all are fair game, as the police, the army and top secret Maurice Bureau rip each other apart in the search for Diderot. Only an Englishman holds the threads which will unravel the enigma that is Diderot. But for Harry Metcalfe, differing motives of love, friendship and revenge mean that the job in hand is a difficult one, and the chances of his survival in the balancing act even slimmer.;

Gripping espionage thriller from the man hailed as the next Frederick Forsyth.

Pinpoint Greg Milner, 2016-05-17 A Financial Times Best Book of 2016 A Sunday Times Best Book of 2016 Pinpoint tells the story of GPS, a scientific marvel that enables almost all modern technology—but is changing us in profound ways. Over the last fifty years, humanity has developed an extraordinary shared utility: the Global Positioning System. Even as it guides us across town, GPS helps land planes, route mobile calls, anticipate earthquakes, predict weather, locate oil deposits, measure neutrinos, grow our food, and regulate global finance. It is as ubiquitous and essential as another Cold War technology, the Internet. In Pinpoint, Greg Milner takes us on a fascinating tour of a hidden system that touches almost every aspect of our modern life. While GPS has brought us breathtakingly accurate information about our planetary environment and physical space, it has also created new forms of human behavior. We have let it saturate the world's systems so completely and so quickly that we are just beginning to confront the possible consequences. A single GPS timing flaw, whether accidental or malicious, could bring down the electrical grid, hijack drones, or halt the world financial system. The use, and potential misuse, of GPS data by government and corporations raise disturbing questions about ethics and privacy. GPS may be altering the nature of human cognition—possibly even rearranging the gray matter in our heads. Pinpoint tells the sweeping story of GPS from its conceptual origins as a bomb guidance system to its presence in almost everything we do. Milner examines the different ways humans have understood physical space, delves into the neuroscience of cognitive maps, and questions GPS's double-edged effect on our culture. A

fascinating and original story of the scientific urge toward precision, Pinpoint offers startling insight into how humans understand their place in the world.

*Pinpoint* Olivia Luck, 2016-07-18 All my life I followed the rules. I lived under the iron rule of my father and did what was expected of me. Until now. I want to live in the big city. Make new friends. Get a great job. Meet a man that makes me swoon. Fall in love. Sounds straightforward enough, but making my way in a city of six million isn't as seamless as I'd hope. And the man is more sour than sweet. Something's got to give. And this time it won't be me.
