Food in the Air and Space Richard Foss,2014-12-11 In the history of cooking, there has been no more challenging environment than those craft in which humans took to the skies. The tale begins with meals aboard balloons and zeppelins, where cooking was accomplished below explosive bags of hydrogen, ending with space station dinners that were cooked thousands of miles below. This book is the first to chart that history worldwide, exploring the intricacies of inflight dining from 1783 to the present day, aboard balloons, zeppelins, land-based aircraft and flying boats, jets, and spacecraft. It charts the ways in which commercial travelers were lured to try flying with the promise of familiar foods, explains the problems of each aerial environment and how chefs, engineers, and flight crew adapted to them, and tells the stories of pioneers in the field. Hygiene and sanitation were often difficult, and cultural norms and religious practices had to be taken into account. The history is surprising and sometimes humorous at times some ridiculous ideas were tried, and airlines offered some strange meals to try to attract passengers. It's an engrossing story with quite a few twists and turns, and this first book on the subject tells it with a light touch.

Food and Aviation in the Twentieth Century Bryce Evans,2020-12-10 Established by New York stockbroker Juan Trippe in 1927, the story of Pan Am is the story of US-led globalisation and imperial expansion in the twentieth century, with the airline achieving the vast majority of 'firsts' in aviation history, pioneering transoceanic travel and new technologies, and all but creating the glitz, style and ambience eulogised in Frank Sinatra's 'Come Fly with Me'. Bryce Evans investigates an aspect of the airline service that was central to the company's success, its food; a gourmet glamour underpinned by both serious science and attention to the detail of fine dining culture. Modelled on the elite dining experience of the great ocean liners, the first transatlantic and transpacific flights featured formal thirteen course dinners served in art deco cabins and served by waiters in white waist-length jackets and garrison hats. As flight times got faster and altitudes higher, Pan Am pioneered the design of hot food galleys and commissioned research into how altitude and pressure affected taste buds, amending menus accordingly. A tale of collaboration with chefs from the best Parisian restaurants and the wining and dining of politicians and film stars, the book also documents what food service was like for flight attendants, exploring how the golden age of airline dining was underpinned by a racist and sexist culture. Written accessibly and with an eye for the glamour and razzamatazz of public aviation history, Bryce Evans' research into Pan Am airways will be valuable for scholars of food studies and aviation, consumer, tourism, transport and 20th century American history.

Plane Insanity Elliott Hester,2010-04-01 You're belted into a middle seat with burly businessmen on either side. It's 92 degrees in the cabin and someone forgot to use deodorant. A baby screams. A kid kicks the back of your seat. After two hours you haven't even left the taxiway. Welcome to modern airline travel! In Plane Insanity, Elliott Hester delivers stories that could only come from someone who rides tin for a living-a flight attendant. Right Away & All at Once Greg Brenneman,2016-02-09 An expert in business turnaround shares his inspiring approach to problem-solving: “A fascinating read” (Mitt Romney). Visionary leader Greg Brenneman believes that true business success and personal fulfillment are two sides of the same coin. The techniques that will grow your business will also help you achieve a rich, purposeful, and integrated life. Here, Brenneman takes what he’s learned

from turning around or tuning up many businesses—including Continental Airlines and Burger King—and distills it into a simple, clear, five-step roadmap that anyone can follow. He teaches you how to: *prepare a succinct Go Forward plan *build a fortress balance sheet *grow your sales and profits *choose all-star servant leaders *empower your team For more than thirty years, Brenneman has seen these steps foster dramatic results in a variety of business environments. But he also came to realize that he could apply these same principles to improve his life and build a lasting moral legacy. He found he could make better decisions by carefully taking the most important facets of his life—faith, family, friendship, fitness, and finance—into consideration. Brenneman’s inspiring examples, from both his business and his life, demonstrate the astounding effects these steps can have when you apply them—right away and all at once.

Pilots On Food Stamps Ben Mandell,2014 Incredible! you might say, Pilots qualifying for food stamps. Surely you must be joking!We see airline pilots in their pressed suits and crisp shirts as they walk through the airport terminals, hear their calm, friendly voices informing passengers of flight time and weather conditions on the plane and assume they are making six figure salaries, or somewhere close to that.Wrong, wrong, wrong!This book is a true to life account of the current pilot crisis facing the nation; its origin, the current status and what needs to be done to fix this problem.If your Physician put in six to eight years of medical education, training and internship in order to provide you with the best, up to date medical care, would you expect him or her to be paid less than that of a fast food worker with much less training?Would it be fair if the physician's salary was calculated only on the actual time he or she was in the office or in surgery with the patient, without taking into consideration the doctor's time spent on patient telephone calls, availability for the times on standby when the doctor was on call, travel to and from the clinic, hospital or office as well as supervisory and administrative duties?Why should a pilot only get paid for his or her actual flight time?Is it fair for airline passengers to have their flights canceled and planes grounded because there are not enough qualified pilots?As we read this book we must ask ourselves if we will garner the political will to demand better wages for our pilots and if we will hold our elected officials accountable for ensuring adequate airline and passenger safety. And then we must act to make sure the job gets done.A Must Read!

Corked Kathryn Borel,2010-02-16 Meet Kathryn Borel, bon vivant and undutiful daughter. Now meet her father, Philippe, former chef, eccentric genius, and wine aficionado extraordinaire. Kathryn is like her father in every way but one: she's totally ignorant when it comes to wine. And although Philippe has devoted untold parenting hours to delivering impassioned oenological orations, she has managed to remain unenlightened. But after an accident and a death, Kathryn realizes that by shutting herself off to her father's greatest passion, she will never really know him. Accordingly, she proposes a drunken father-daughter road trip. Corked is the uncensored account of their tour through the great wine regions of France. Uproarious, poignant, painfully introspective, and filled with cunning little details about wine, this is a book for any reader who has sought a connection with a complex family member or wanted to overcome the paralyzing terror of being faced with a restaurant wine list.
