Food in the Air and Space Richard Foss, 2014-12-11 In the history of cooking, there has been no more challenging environment than those craft in which humans took to the skies. The tale begins with meals aboard balloons and zeppelins, where cooking was accomplished below explosive bags of hydrogen, ending with space station dinners that were cooked thousands of miles below. This book is the first to chart that history worldwide, exploring the intricacies of inflight dining from 1783 to the present day, aboard balloons, zeppelins, land-based aircraft and flying boats, jets, and spacecraft. It charts the ways in which commercial travelers were lured to try flying with the promise of familiar foods, explains the problems of each aerial environment and how chefs, engineers, and flight crew adapted to them, and tells the stories of pioneers in the field. Hygiene and sanitation were often difficult, and cultural norms and religious practices had to be taken into account. The history is surprising and sometimes humorous at times some ridiculous ideas were tried, and airlines offered some strange meals to try to attract passengers. It's an engrossing story with quite a few twists and turns, and this first book on the subject tells it with a light touch.

Food and Aviation in the Twentieth Century Bryce Evans, 2020-12-10 Established by New York stockbroker Juan Trippe in 1927, the story of Pan Am is the story of US-led globalisation and imperial expansion in the twentieth century, with the airline achieving the vast majority of 'firsts' in aviation history, pioneering transoceanic travel and new technologies, and all but creating the glitz, style and ambience eulogised in Frank Sinatra's 'Come Fly with Me'. Bryce Evans investigates an aspect of the airline service that was

central to the company's success, its food; a gourmet glamour underpinned by both serious science and attention to the detail of fine dining culture. Modelled on the elite dining experience of the great ocean liners, the first transatlantic and transpacific flights featured formal thirteen course dinners served in art deco cabins and served by waiters in white waist-length jackets and garrison hats. As flight times got faster and altitudes higher, Pan Am pioneered the design of hot food galleys and commissioned research into how altitude and pressure affected taste buds, amending menus accordingly. A tale of collaboration with chefs from the best Parisian restaurants and the wining and dining of politicians and film stars, the book also documents what food service was like for flight attendants, exploring how the golden age of airline dining was underpinned by a racist and sexist culture. Written accessibly and with an eye for the glamour and razzamatazz of public aviation history, Bryce Evans' research into Pan Am airways will be valuable for scholars of food studies and aviation, consumer, tourism, transport and 20th century American history.

Corked Kathryn Borel, 2010-02-16 Meet Kathryn Borel, bon vivant and undutiful daughter. Now meet her father, Philippe, former chef, eccentric genius, and wine aficionado extraordinaire. Kathryn is like her father in every way but one: she's totally ignorant when it comes to wine. And although Philippe has devoted untold parenting hours to delivering impassioned oenological orations, she has managed to remain unenlightened. But after an accident and a death, Kathryn realizes that by shutting herself off to her father's greatest passion, she will never really know him. Accordingly, she proposes a drunken father-daughter road trip. **Corked** is the uncensored account of their tour through the great wine

regions of France. Uproarious, poignant, painfully introspective, and filled with cunning little details about wine, this is a book for any reader who has sought a connection with a complex family member or wanted to overcome the paralyzing terror of being faced with a restaurant wine list.

The Revelation (New Revised Edition) Bodo Balsys,2022-09-06 This book presents basic postulates concerning many esoteric concepts. These include the concept of 'God', what constitutes evil, the nature and function of karma, the manifestation of energy from the subtle planes of perception, the nature of manifest Divinity, as veiled by the concept of the Christ in the Bible, and the mysteries of Being. The analysis moves from my earlier Buddhist writings to focus upon the information in the Bible, especially in relation to the nature of the reappearance of the Christ, which here is equated with the externalisation process of the Hierarchy of Enlightened Being. This doctrine concerns the mode of the evolution of transcendent perception by humanity. The awakening of higher spiritual perceptions via the enlightenment path, and the understanding of the psychic constitution of the nāḍīs and chakras are also explained. A syncretic approach is therefore espoused through the comparison between Eastern doctrines and the presented esoteric Christianity. In doing so many of the veiled, hidden mysteries in the Gospel story and the book of Genesis are revealed. The text shows how these religions are but aspects of one fundamental religious evolution, of the historical development of what is known in the East

as the dharma, and in the Western tradition as the 'Law of God'.

The Art of Routine Angel Iscovich, 2021-06-01 This is not a How to. There is no "one

size fits all” when it comes to routine. Dr. Iscovich shares his original study of routine—learn through his observations how routine can improve longevity, performance, and adaptability. You will be better equipped to construct a routine that works best for you! Conventional wisdom suggests that the best way to navigate our noisy new world is to accept change. Open up to novelty. Go with the flow. Live in the moment. Embrace the relentless pelting of content minute by minute. But routine experts Angel Iscovich, MD, Joe Garner, and Michael Ashley are here to say that’s a bad idea. Humans don’t just benefit from structure; they require it. Years of observation and practice led to their breakthrough concept of routineology, the key to optimize your life and the cure for crisis. Routineology’s fundamental prescriptive is to look inside and live your life in a “time bubble” to find purpose, meaning, and joy. Offering insights from top performers and stories of triumph over adversity, this book demonstrates that routine isn’t just a good idea—it’s imperative for surviving and thriving today. Live a life of deeper meaning and navigate toward a better world with *The Art of Routine*.

Gastrophysics Charles Spence, 2018-07-03 The science behind a good meal: all the sounds, sights, and tastes that make us like what we're eating—and want to eat more. Why do we consume 35 percent more food when eating with one other person, and 75 percent more when dining with three? How do we explain the fact that people who like strong coffee drink more of it under bright lighting? And why does green ketchup just not work? The answer is gastrophysics, the new area of sensory science pioneered by Oxford professor Charles Spence. Now he's stepping out of his lab to lift the lid on the entire eating experience—how the taste, the aroma, and our overall enjoyment of food are influenced by all of our senses, as well as by our mood and expectations. The pleasures of food lie mostly in the mind, not in the mouth. Get that straight and you can start to understand what really makes food enjoyable, stimulating, and, most important, memorable. Spence reveals in amusing detail the importance of all the “off the plate” elements of a meal: the weight of cutlery, the color of the plate, the background music, and much more. Whether we're dining alone or at a dinner party, on a plane or in front of the TV, he reveals how to

understand what we're tasting and influence what others experience. This is accessible science at its best, fascinating to anyone in possession of an appetite. Crammed with discoveries about our everyday sensory lives, Gastrophysics is a book guaranteed to make you look at your plate in a whole new way.
