Planet Earth Is Blue Nicole Panteleakos, 2020-05-05 Tender and illuminating. A beautiful debut. --Rebecca Stead, Newbery Medal-winning author of *When You Reach Me* A heartrending and hopeful story about a nonverbal girl and her passion for space exploration, for fans of *See You in the Cosmos*, *Mockingbird*, and *The Thing About Jellyfish*. Twelve-year-old Nova is eagerly awaiting the launch of the space shuttle Challenger--it's the first time a teacher is going into space, and kids across America will watch the event on live TV in their classrooms. Nova and her big sister, Bridget, share a love of astronomy and the space program. They planned to watch the launch together. But Bridget has disappeared, and Nova is in a new foster home. While foster families and teachers dismiss Nova as severely autistic and nonverbal, Bridget understands how intelligent and special Nova is, and all that she can't express. As the liftoff draws closer, Nova's new foster family and teachers begin to see her potential, and for the first time, she is making friends without Bridget. But every day, she's counting down to the launch, and to the moment when she'll see Bridget again. Because as Bridget said, No matter what, I'll be there. I promise.

Song of Planet Earth Leighton K. Chong, 2013-06 Alvin, a lawyer who writes on arms control issues, takes an around-the-world tour visiting historical places of importance in human history. For the first time he can experience the planet as a whole seeing the continents unfold below while flying west on daytime flights, bringing him to a higher consciousness of the oneness of humanity. The tour group starts in Japan visiting the Yasukuni Shrine and the A-Bomb Peace Park in Hiroshima and becomes aware of the devastating destruction caused by mankind in wars, and similarly in China, Mongolia, and the Middle East. While visiting in Istanbul, Alvin witnesses another tour guest who works for a U.S. nuclear weapons contractor turn over a gold-seal folder for classified material to shadowy Islamic figures. He suspects that the classified material may enable a terrorist group to attack a NATO airbase in Turkey where hundreds of operational nuclear weapons are stored. Will mankind take the actions needed to head off this nightmare scenario of nuclear weapons diversion? Join Alvin in this entertaining travel adventure to find out if humans have the wherewithal to survive on Planet Earth. Can humans overcome the threat of nuclear weapons proliferation and other global threats to our survival? Narrated from an 'alien' viewpoint, this book takes a hard look at the scientific and historical facts through a story that is both entertaining and hopeful. You too will 'try to see the whole as one!' - Pat Takahashi, author of *Simple Solutions for Planet Earth* and *Simple Solutions for Humanity*.

U Only Get 1 Penelope de la Haya, 2018-01-31 This book is the first in a trilogy in the form of fictional novels. The main character travels through time on an adventure called life. Volume 1 is told from the perspective of a baby's experience with birth and arrival on planet Earth. The details are not as important as is the central theme. As you read this story, keep in mind a basic truth. These are real places for all of us! No matter how good a story is presented, we still must use our imagination. So be imaginative! Enjoy it! Act out with the children. Have fun. Make it come to life in their lives. It's an educational tool to open discussion. I believe God will use this story to open the door of understanding for children worldwide.

Greetings from Planet Earth Barbara Kerley, 2007 If you had one minute to describe life on Earth, what would you say? It's 1977, and Theo and his class are creating a golden record inspired by the one Voyager 2 will carry into space as a greeting from Earth. But as Theo searches for an original answer to his teacher's question, other questions begin to

surface: What happened to his father in Vietnam? And why has his mother been keeping secrets all these years? Two-time Sibert Award Honoree, Barbara Kerley is well-known for her masterful narrative nonfiction picture books, which are consistently hailed for their incisiveness, eloquence, and meticulous research. *Greetings from Planet Earth*, published in hardcover in 2007, is Kerley's debut novel--a thought-provoking exploration of war (as well as a crippling family secret), and its devastating effect upon a 12-year-old boy whose father never returned from Vietnam. Sadly, the subject matter continues to be timely as the war continues in Iraq and Afghanistan, affecting thousands of American families. The book has an intriguing format with shifting points of view and Kerley's signature lucid, economical prose. It was recently named a finalist for the 2010-2011 California Young Reader Medal.

From the Earth's Core to Outer Space Ilmari Haapala, 2012-06-28 *From the Earth's Core to Outer Space* focuses on four themes: (1) Evolving Earth's crust, (2) Changing Baltic Sea, (3) Climate Change, and (4) Planet Earth, third stone from Sun. The focus on these four topics provides both a state of the art review of earth science topics of particular importance to Scandinavia and the Baltic and also the global context in which a consideration of these topics must be made. It finishes by discussing our use of space born technologies for understanding these topics and places the Earth within the context of our neighbouring planets and their satellites. The first theme includes papers on the structure, origin and evolution of the Earth's crust and in particular the ore deposits in Fennoscandia, plate-tectonic drift of Fennoscandia (Baltica), and postglacial isostatic rebound of the crust. The second theme contains papers dealing with changes in the ice season of the Baltic Sea, inflow and stagnation in deep basins, biology of the Baltic Sea, and carbon dioxide balance in sea water. The third theme deals with origin and evolution of oxygen in atmosphere, postglacial climate change, effects of aerosols and greenhouse gases on climate, interplay between anthropogenic and natural factors in the current climate change, and Earth's water resources. The fourth theme includes articles on Earth's space environment, use of satellites in cartography and geodesy, information obtained by space probes on Mars and other planets and their moons, and possibilities to find life on them.

Mathematical Models and Methods for Planet Earth Alessandra Celletti, Ugo Locatelli, Tommaso Ruggeri, Elisabetta Strickland, 2014-03-05 In 2013 several scientific activities have been devoted to mathematical researches for the study of planet Earth. The current volume presents a selection of the highly topical issues presented at the workshop "Mathematical Models and Methods for Planet Earth", held in Roma (Italy), in May 2013. The fields of interest span from impacts of dangerous asteroids to the safeguard from space debris, from climatic changes to monitoring geological events, from the study of tumor growth to sociological problems. In all these fields the mathematical studies play a relevant role as a tool for the analysis of specific topics and as an ingredient of multidisciplinary problems. To investigate these problems we will see many different mathematical tools at work: just to mention some, stochastic processes, PDE, normal forms, chaos theory.
