Online Gaming in Context Garry Crawford,Victoria K Gosling,Ben Light,2013-03-01 There is little question of the social, cultural and economic importance of video games in the world today, with gaming now rivalling the movie and music sectors as a major leisure industry and pastime. The significance of video games within our everyday lives has certainly been increased and shaped by new technologies and gaming patterns, including the rise of home-based games consoles, advances in mobile telephone technology, the rise in more 'sociable' forms of gaming, and of course the advent of the Internet. This book explores the opportunities, challenges and patterns of gameplay and sociality afforded by the Internet and online gaming. Bringing together a series of original essays from both leading and emerging academics in the field of game studies, many of which employ new empirical work and innovative theoretical approaches to gaming, this book considers key issues crucial to our understanding of online gaming and associated social relations, including: patterns of play, legal and copyright issues, player production, identity construction, gamer communities, communication, patterns of social exclusion and inclusion around religion, gender and disability, and future directions in online gaming.

GOOD INSIDE Becky Kennedy,2023-10-02 Selama beberapa tahun terakhir, Dr. Becky Kennedy—pakar pengasuhan anak yang sangat populer lewat akun @drbeckyatgoodinside—telah memicu revolusi pengasuhan anak. Jutaan orang tua, yang lelah mengikuti berbagai teori pengasuhan lama dan tetap gagal dilakukan, telah menerima pendekatan Dr. Becky yang memberdayakan dan efektif. Sebuah model yang memprioritaskan hubungan dengan anak dibanding terus menerus mengoreksi apa saja yang mereka lakukan. Good Inside akan membantu orang tua beralih dari kebingungan dan perasaan “gagal menjadi orang tua” ke kepercayaan diri dan mampu memimpin keluarga dengan kokoh.

Gamers Garry Crawford,Victoria K Gosling,Ben Light,2013-03 Over only a few decades, digital gaming has become a major global leisure activity that now rivals the movie and music sectors. Due to this increasingly widespread popularity, gaming has in recent years become the focus of increased academic interest and activity, but still little is know about those who play digital games. Online Gaming in Context is the first book to explicitly and comprehensively address how digital games are experienced and engaged with in the everyday lives, social networks, and consumer patterns of those who play them. In doing so, the book provides a key introduction to the study of gamers and the games they play, whilst also reflecting on the current debates and literatures surrounding the virtual world--

*Anatomy of a Rescue* Carlos M. Perez,2004-09 This thesis presents a theory to help military leaders determine the best time to conduct a hostage rescue attempt. The theory is based on the phenomenon of a hostage crisis biorhythm. According to the theory, there are four principles essential for hostage rescue mission success: surprise, intelligence, operator's skill, and deception. These principles are derived from planning models used in special operations, personal experience, and an analysis of six historical case studies. The case studies show that if any one of these four principles was overlooked, the operation was doomed. The principles have been determined to be the most critical factors that change as a hostage crisis develops. The focus of this thesis is an in-depth case study of the hostage rescue operation Chavin de Huantar in Lima, Peru. This case study presents compelling evidence to reinforce the author's hypothesis, and serves as a model for successful rescue operations. Another focus of this thesis is the use of game theory analysis during a hostage crisis. The findings of the thesis will help decision makers plan and organize hostage rescue forces to act at the appropriate time, maximizing their chances of success. In addition, it will provide a useful planning model that can be implemented effectively and accurately, presenting a clear picture of possible outcomes throughout a hostage crisis. It is hoped that this thesis will help the reader become a better strategist during the planning, preparation, and execution of a hostage rescue operation. The other case studies that are analyzed according to the biorhythm theory are Operation Eagle Claw, launched to rescue the Iran hostages in Tehran in April 1980; the De Punt train hijacking in Holland in May-June 1977; the Munich Olympics Massacre in West Germany in Sep 1972; Egypt Air Flight 648 at Malta in Nov 1978; and Operation Fire Magic, Lufthansa Flight 181, Mogadishu, Somalia in Oct 1977. **Paint the Town Red** Brian Meeks,2003 Brian Meeks's novel begins with the release from jail of a young Rastafarian who was involved in the political violence that erupted when forces hostile to the radical socialist currents within the 1972 Manley administration sought to destabilize Jamaican society. As Mikey takes a minibus through Kingston, his story is told as a series of carefully crafted flashbacks. A series of encounters and the memories they provoke reveal that few have escaped unscathed from those years: there are the dead, the imprisoned, the maddened, the turncoats, and those like Mikey who carry the burden of those times. One of the encounters is, we learn in a postscript to the novel, with Rohan who, at the time of Mikey's imprisonment, is a youth in a family with which Mikey is involved, particularly Rohan's sister, who is killed in the shootout. Rohan has suffered this loss deeply, but has survived to move forward, while Mikey, with the stigma of his imprisonment, is trapped in the past. It is Rohan, we discover, who is telling Mikey's story, a revelation that casts a reflexive light not only on the relationship between the actual author and the events he fictionalizes, but the relationship between the novelist who, whatever his origins, writes from a position of relative security in comparison to the lives that form his subject.
