The Impossible Climb Mark Synnott, 2019-03-05 INSTANT NATIONAL BESTSELLER NEW YORK TIMES MONTHLY BESTSELLER One of the 10 Best Books of March, Paste Magazine A deeply reported insider perspective of Alex Honnold's historic achievement and the culture and history of climbing. "One of the most compelling accounts of a climb and the climbing ethos that I've ever read."—Sebastian Junger In Mark Synnott's unique window on the ethos of climbing, his friend Alex Honnold's astonishing free solo ascent of El Capitan's 3,000 feet of sheer granite is the central act. When Honnold topped out at 9:28 A.M. on June 3, 2017, having spent fewer than four hours on his historic ascent, the world gave a collective gasp. The New York Times described it as "one of the great athletic feats of any kind, ever." Synnott's personal history of his own obsession with climbing since he was a teenager—through professional climbing triumphs and defeats, and the dilemmas they render—makes this a deeply reported, enchanting revelation about living life to the fullest. What are

we doing if not an impossible climb? Synnott delves into a raggedy culture that emerged decades earlier during Yosemite's Golden Age, when pioneering climbers like Royal Robbins and Warren Harding invented the sport that Honnold would turn on its ear. Painting an authentic, wry portrait of climbing history and profiling Yosemite heroes and the harlequin tribes of climbers known as the Stonemasters and the Stone Monkeys, Synnott weaves in his own experiences with poignant insight and wit: tensions burst on the mile-high northwest face of Pakistan's Great Trango Tower; fellow climber Jimmy Chin miraculously persuades an official in the Borneo jungle to allow Honnold's first foreign expedition, led by Synnott, to continue; armed bandits accost the same trio at the foot of a tower in the Chad desert . . . The Impossible Climb is an emotional drama driven by people exploring the limits of human potential and seeking a perfect, choreographed dance with nature. Honnold dared far beyond the ordinary, beyond any climber in history. But this story of sublime heights is really about all of us. Who doesn't need to face down fear and make the most of the time we have?

Half Man, Half Bike William Fotheringham, 2013-04-01 Eddy Merckx is to cycling what Muhammad Ali is to boxing or Pele to soccer: simply the best there has ever been. Merckx amassed an astonishing 445 victories. Lance Armstrong, by comparison, managed fewer than 100. Merckx didn't just beat his opponents; he crushed them. But his triumphs only tell half a story that includes horrific injury, a doping controversy, and tragedy. He was nicknamed &"the Cannibal&" for his insatiable appetite for victory, but the moniker did scant justice to a man who was handsome, sensitive, and surprisingly anxious. A number-one bestseller in the United Kingdom, Half Man, Half Bike is the definitive story of a man whose fear of failure drove him to the highest pinnacles before ultimately destroying him.

The Climbing Chronicles John Parker, 2014-12-15 The Climbing Chronicles record the 1940s climbing exploits of Harry Parker. Born in Blackburn on 29 February 1916, Harry started climbing before the war and continued to do so after its conclusion, exploring the Peak District, Wales, the Lake District and Scotland. Each night he noted down his adventures in his 'chronicles', recording the routes he climbed, the walks, bicycle rides and journeys he undertook, and the people he met along the way. Harry's remarkable diaries have now been transcribed by his son John, and the resulting Chronicles offer a first-hand view of climbing and walking in Britain in the 1940s. With an enthusiasm for the outdoors and a sense of fun that springs from every entry, *The Climbing Chronicles* is an entertaining and fascinating - not to mention quirky - read.

Climbing Nate Fitch, Ron Funderburke, 2016-07-15 This handy, pocket-size manual provides easy-to-understand, step-by-step guidance to climbers transitioning from basic rock climbing to sport climbing, which involves scaling larger, more challenging rock walls that have fixed anchors.
