Westbrooks, 2018-12-13 What does successful academic library management look like in the real world? A team of editors, all administrators at large research libraries, here present a selection of case studies which dive deeply into the subject to answer that question. Featuring contributions from a range of practicing academic library managers, this book spotlights case studies equally useful for LIS students and current managers; touches upon such key issues as human resource planning, public relations, financial management, organizational culture, and ethics and confidentiality; examines how to use project management methodology to reorganize technical services, create a new liaison service model, advance a collaborative future, and set up on-the-spot mentoring; discusses digital planning for archives and special collections; rejects one size fits all solutions to common challenges in academic libraries in favor of creative problem solving; and provides guidance on how to use case studies as

effective models for positive change at one's own institution. LIS instructors, students, and academic library practitioners will all find enrichment from this selection of case studies.
