The Spelit Power Matrix June H. Schmieder-Ramirez,June Schmieder-Ramirez Ph. D.,Leo A. Mallette,2007-05-30 The SPELIT POWER MATRIX is a leadership tool for untangling the organizational environment from a social, political, economic, legal, intercultural and technical view. The SPELIT analysis method was developed for adult learners to have a framework for determining and formulating the answer to the question: What is? There is a need to analyze the environment in all organizations, whether you are entering a new organization or to benchmark the existing organization. The purpose of this text is to show how perceptive leaders can analyze environments in preparation for possible future action. We demonstrate how the methodology aligns with previous theories regarding environmental scanning and produces a workable framework for the perceptive leader. The SPELIT POWER MATRIX is intended for practitioners doing a market analysis or diagnosis prior to implementing transitions, benchmarking in anticipation of an intervention, and can be used by undergraduate students and seasoned practitioners.

Agents of Translation John Milton,Paul Bandia,2009-02-12 Agents of Translation contains thirteen case studies by internationally recognized scholars in which translation has been used as a way of influencing the target culture and furthering literary, political and personal interests. The articles describe Francisco Miranda, the “precursor” of Venezuelan independence, who promoted translations of works on the French Revolution and American independence; 19th century Brazilian translations of articles taken from the *Révue Britannique* about England; Ahmed Midhat, a late 19th century Turkish journalist who widely translated from Western languages; Henry Vizetelly, who (unsuccessfully) attempted to introduce the works of Zola to a wider public in Victorian Britain; and Henry Bohn, who, also in Victorian Britain, (successfully) published a series of works from the classics, many of which were expurgated; Yukichi Fukuzawa, whose adaptation of a North American geography textbook in the Meiji period promoted the concept of the superiority of the Japanese over their Asian neighbours; Samuli Suomalainen and Juhani Konkka, whose translations helped establish Finnish as a literary language; Hasan Alî Yücel, the Turkish Minister of Education, who set up the Turkish Translation Bureau in 1939; the Senegalese intellectual, Cheikh Anta Diop, whose work showed that the Ancient Egyptians had African rather than Indo-European roots; the Centro Cultural de Évora theatre group, which introduced Brecht and other contemporary drama into Portugal after the 1974 Carnation Revolution; 20th century Argentine translators of poetry; Haroldo and Augusto de Campos, who have brought translation to the forefront of literary activity in Brazil; and, finally, translators of Bosnian poetry, many of whom work in exile.

The State of World Fisheries and Aquaculture 2020 FAO,2020-06-01 The 2020 edition of The State of World Fisheries and Aquaculture has a particular focus on sustainability. This reflects a number of specific considerations. First, 2020 marks the twenty-fifth anniversary of the Code of Conduct for Responsible Fisheries (the Code). Second, several Sustainable Development Goal indicators mature in 2020. Third, FAO hosted the International Symposium on Fisheries Sustainability in late 2019, and fourth, 2020 sees the finalization of specific FAO guidelines on sustainable aquaculture growth, and on social sustainability along value chains. While Part 1 retains the format of previous editions, the structure of the rest of the publication has been revised. Part 2 opens with a special section marking the twenty fifth anniversary of the Code. It also focuses on issues coming to the fore, in particular, those related to Sustainable Development Goal 14 and its indicators for which FAO is the “custodian” agency. In addition, Part 2 covers various aspects of fisheries and aquaculture sustainability. The topics discussed range widely, from data and information systems to ocean pollution, product legality, user rights and climate change adaptation. Part 3 now forms the final part of the publication, covering projections and emerging issues such as new technologies and aquaculture biosecurity. It concludes by outlining steps towards a new vision for capture fisheries. The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to-date information to a wide audience – policymakers, managers, scientists, stakeholders and indeed everyone interested in the fisheries and aquaculture sector.

Language and Learning in the Digital Age James Paul Gee,Elisabeth R. Hayes,2011-02-01 In Language and Learning in the Digital Age, linguist James Paul Gee and educator Elisabeth Hayes deal with the forces unleashed by today's digital media, forces that are transforming language and learning for good and ill. They argue that the role of oral language is almost always entirely misunderstood in debates about digital media. Like the earlier inventions of writing and print, digital media actually power up or enhance the powers of oral language. Gee and Hayes deal, as well, with current digital transformations of language and literacy in the context of a growing crisis in traditional schooling in developed countries. With the advent of new forms of digital media, children are increasingly drawn towards video games, social media, and alternative ways of learning. Gee and Hayes explore the way in which these alternative methods of learning can be a force for a paradigm change in schooling. This is an engaging, accessible read both for undergraduate and graduate students and for scholars in language, linguistics, education, media and communication studies.

The NNEST Lens Ahmar Mahboob,2010-02-19 The NNEST Lens invites you to imagine how the field of TESOL and applied linguistics can develop if we use the multilingual, multicultural, and multinational perspectives of a NNEST (Non Native English Speakers in TESOL) lens to re-examine our assumptions, practices, and theories in the field. The NNEST lens as described in and developed through this volume is a lens of multilingualism, multinationalism, and multiculturalism through which NNESTs and NESTs—as classroom practitioners, researchers, and teacher educators—take diversity as a starting point in their understanding and practice of their profession. The 16 original contributions to this volume include chapters that question theoretical frameworks and research approaches used in studies in applied linguistics and TESOL, as well as chapters that share strategies and approaches to classroom teaching, teacher education, and education management and policy. As such, this volume will be of interest to a wide range of students, practitioners, researchers, and academics in the fields of education and linguistics.

Communication Across Cultures Basil Hatim,1997 While the literature on either contrastive linguistics or discourse analysis has grown immensely in the last twenty years, very little of it has ventured into fusing the two perspectives. Bearing in mind that doing discourse analysis without a contrastive base is as incomplete as doing contrastive analysis without a discourse base, the specific aim of this book is to argue that translation can add depth and breadth to both contrastive linguistics as well as to discourse analysis. Authentic data from both spoken and written English is used throughout to add clarity to theoretical insights gained from the study of discourse processing. Each aspect of the model proposed for the analysis of texts is related separately to a problem of language processing and in domains as varied as translation, interpreting, language teaching etc. The global objectives pursued in this volume are the training of future linguists and the sensitization of users of language in general to the realities of discourse.

Media and Politics Bettina Mottura,Letizia Osti,Giorgia Riboni,2018-04-18 Media and politics have always been mutually influential. The media plays an important political role of its own in promoting and discussing policies, as well as conveying representations of power and ideology. On the other hand, media outlets are themselves subject to political forces that have an impact on their editorial line. This mutual influence comes to light not only in journalistic practices, but also in how news is constructed and conveyed. This volume explores the relations between politics and various types of media as expressed in different areas of the world, namely Europe, Asia, the Americas, and the Middle East. Such a complex landscape calls for a multiplicity of analytical tools and cannot ignore specific socio-political, geographic, linguistic, and cultural contexts which may be overlooked when approached from a global perspective. In this volume, a combination of senior scholars and young experts from a wide range of disciplines, such as discourse analysis, international relations, and cultural studies, come together in a conversation which recognizes the media as a global phenomenon without neglecting its local specificities.
