Cómo comprender los conceptos básicos de la economía John Charles Pool,2002

Memoirs of a Pet Lamb David Sylvester,2013-02-01 David Sylvester, who died in June 2001, was one of the greatest art critics of our time. He achieved fame with his work on Cezanne but became known especially for his close, perceptive studies of artists who became personal friends: Giacometti, Henry Moore, Francis Bacon. A brilliant interviewer who could make the most reticent artists disclose their secrets, he rarely revealed his own - but in the weeks before his death he wrote this brief, unforgettable account of his childhood in the 1920s. Beginning with his bewildered shuttling between an English nursery school and the turbulent Yiddish-speaking 'parental country', he reaches back for his child's-eye view. We meet Grandma Rosen with her passion for Rudolph Valentino, and Grandpa returning from his fishmonger's shop and reading out next day's runners at Kempton in his thick foreign accent. We learn of the large Sylvester clan, and of his parents' contradictory ambitions for their son: British army officer or 'a career like Noel Coward's'. We hear of friends and nannies, picnics and outings, schools and siblings; of music, politics, rows and disasters; of love and tenderness and death. Dry, comic yet poignantly unforgettable, *Memoirs of a Pet Lamb* brings us a life and a whole world in miniature.

Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo,2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

Liar's Poker Michael Lewis,2010-03-15 The time was the 1980s. The place was Wall Street. The game was called Liar's Poker. Michael Lewis was fresh out of Princeton and the London School of Economics when he landed a job at Salomon Brothers, one of Wall Street's premier investment firms. During the next three years, Lewis rose from callow trainee to bond salesman, raking in millions for the firm and cashing in on a modern-day gold rush. *Liar's Poker* is the culmination of those heady, frenzied years—a behind-the-scenes look at a unique and turbulent time in American business. From the frat-boy camaraderie of the forty-first-floor trading room to the killer instinct that made ambitious young men gamble everything on a high-stakes game of bluffing and deception, here is Michael Lewis's knowing and hilarious insider's account of an unprecedented era of greed, gluttony, and outrageous fortune.

The Ego Tunnel Thomas Metzinger,2010-05-21 We're used to thinking about the self as an independent entity, something that we either have or are. In The Ego Tunnel, philosopher Thomas Metzinger claims otherwise: No such thing as a self exists. The conscious self is the content of a model created by our brain - an internal image, but one we cannot experience as an image. Everything we experience is "a virtual self in a virtual reality." But if the self is not "real," why and how did it evolve? How does the brain construct it? Do we still have souls, free will, personal autonomy, or moral accountability? In a time when the science of cognition is becoming as controversial as evolution, The Ego Tunnel provides a stunningly original take on the mystery of the mind.

Dimensions of Learning Teacher's Manual, 2nd ed. Robert J. Marzano,Debra J. Pickering,2011-05-01 The premise of Dimensions of Learning an instructional framework founded on the best of what researchers and theorists know about learning is that five types, or dimensions, of thinking are essential to successful learning. These are (1) positive attitudes and perceptions about learning, (2) thinking involved in acquiring and integrating knowledge, (3) thinking involved in extending and refining knowledge, (4) thinking involved in using knowledge meaningfully, and (5) productive habits of mind. Dimensions of Learning is a valuable tool for reorganizing curriculum, instruction, and assessment. The authors discuss each of the five dimensions in detail and describe hundreds of teaching strategies that support them for example, how to help students construct meaning for declarative knowledge, internalize procedural knowledge, and see the relevance of what they are expected to learn. The authors provide many examples at the elementary and secondary classroom levels. Teachers of grades K-12 can use this information to improve teaching and learning in any content area.
