Graphics for Learning Ruth C. Clark,Chopeta Lyons,2010-11-02 Are you getting the most learning value from visuals? Thoroughly revised and updated, Graphics for Learning is the second edition of the bestselling book that summarizes the guidelines for the best use of graphics for instructional materials, including multimedia, texts, working aids, and slides. The guidelines are based on the most current empirical scientific research and are illustrated with a wealth of examples from diverse training materials. The authors show how to plan illustrations for various types of content, including facts, concepts, processes, procedures, and principles. The book also discusses technical and environmental factors that will influence how instructional professionals can apply the guidelines to their training projects. Praise for the First Edition For years I've been looking for a book that links cognitive research on learning to graphics and instructional design. Here it is! Ruth Clark and Chopeta Lyons not only explain how to make graphics work—they've created a very interesting read, full of useful guidelines and examples. —Lynn Kearny, CPT, instructional designer and graphic communicator, Graphic Tools for Thinking and Learning Finally! A book that integrates visual design into the larger context of instructional design and development. —Linda Lohr, Ed.D., author, Creating Graphics for Learning and assistant professor, University of Northern Colorado

PPE Made Easy Jeffrey O. Stull,1998-06-01 Using an easy-to-use checklist format, author Jeffrey Stull, an internationally recognized expert in the area of protective clothing, examines the types of industrial and fire hazards that warrant PPE protection. He also covers how to select equipment from the range of products available, which materials are affected by the hazards, and how that influences selection, care, and maintenance of PPE.

Intelligent Computing Methodologies De-Shuang Huang,Kang-Hyun Jo,Junfeng Jing,Prashan Premaratne,Vitoantonio Bevilacqua,Abir Hussain,2022-08-15 This two-volume set of LNCS 13393 and LNCS 13394 constitutes - in conjunction with the volume LNAI 13395 - the refereed proceedings of the 18th International Conference on Intelligent Computing, ICIC 2022, held in Xi'an, China, in August 2022. The 209 full papers of the three proceedings volumes were carefully reviewed and selected from 449 submissions. This year, the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing. Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications. Therefore, the theme for this conference was “Advanced Intelligent Computing Technology and Applications”. Papers focused on this theme were solicited, addressing theories, methodologies, and applications in science and technology.

Construction 4.0 Marco Casini,2021-11-24 Developments in data acquisition technologies, digital information and analysis, automated construction processes, and advanced materials and products have finally started to move the construction industry - traditionally reluctant to innovation and slow in adopting new technologies - toward a new era. Massive changes are occurring because of the possibilities created by Building information modeling, Extended reality, Internet of Things, Artificial intelligence and Machine Learning, Big data, Nanotechnology, 3D printing, and other advanced technologies, which are strongly interconnected and are driving the capabilities for much more efficient construction at scale. Construction 4.0: Advanced Technology, Tools and Materials for the Digital Transformation of the Construction Industry provides readers with a state-of-the-art review of the ongoing digital transformation of the sector within the new 4.0 framework, presenting a thorough investigation of the emerging trends, technologies, and strategies in the fields of smart building design, construction, and operation and providing a comprehensive guideline on how to exploit the new possibilities offered by the digital revolution. It will be an essential reference resource for academic researchers, material scientists and civil engineers, undergraduate and graduate students, and other professionals working in the field of smart ecoefficient construction and cutting-edge technologies applied to construction. Provides an overview of the Construction 4.0 framework to address the global challenges of the buildingsector in the 21st century and an in-depth analysis of the most advanced digital technologies and systems forthe operation and maintenance of infrastructure, real estate, and other built assets Covers major innovations across the value chain, including building design, fabrication, construction, operationand maintenance, and end-of-life Illustrates the most advanced digital tools and methods to support the building design activity, includinggenerative design, virtual reality, and digital fabrication Presents a thorough review of the most advanced construction materials, building methods, and techniquesfor a new connected and automated construction model Explores the digital transformation for smart energy buildings and their integration with emerging smartgrids and smart cities Reflects upon major findings and identifies emerging market opportunities for the whole AECO sector

China and the Internet Song Shi,2023-12-15 Two oversimplified narratives have long dominated news reports and academic studies of China’s Internet: one lauding its potentials to boost commerce, the other bemoaning state control and measures against the forces of political transformations. This bifurcation obscures the complexity of the dynamic forces operating on the Chinese Internet and the diversity of Internet-related phenomena. China and the Internet analyzes how Chinese activists, NGOs, and government offices have used the Internet to fight rural malnutrition, the digital divide, the COVID-19 pandemic, and other urgent problems affecting millions of people. It presents five theoretically informed case studies of how new media have been used in interventions for development and social change, including how activists battled against COVID-19. In addition, this book applies a Communication for Development approach to examine the use and impact of China’s Internet. Although it is widely used internationally in Internet studies, Communication for Development has not been rigorously applied in studies of China’s Internet. This approach offers a new perspective to examine the Internet and related phenomena in Chinese society.

The Mindful Health Care Professional - E-Book Carmelina D'Arro,2023-09-12 Research shows that what makes or breaks the success of a health care professional is more than the ability to provide accurate diagnosis and treatment. An HCP’s success hinges on their ability to satisfy patients’ main concerns about HCPs namely, do they care about me? and will the procedure hurt? The Mindful Health Care Professional teaches HCPs how to train the mind to be calm, focused, and compassionate in ways that enhance their own well-being and their ability to provide patient-centered care. This book offers the core communication skills needed to convey care and build trust with a novel model that helps navigate challenging procedures and consultations. Finally, it contains many simple, evidence-based techniques for managing pain and anxiety during medical and dental procedures, allowing procedures to unfold more easily for all. Written by Dr. Carmelina D’Arro, a seasoned health care professional and qualified mindfulness teacher, this state-of-the-art guide is designed for students in all areas of health care and includes a fully searchable eBook version with each print purchase that provides links to numerous videos. Patient-centered care approach utilizes the ISLEEP (Introduce, Solicit, Listen, Empathize, Explain, and Power) model which encompasses not only consultations but also hands-on procedures. Trauma-sensitive mindfulness practices are tailored to health care professionals and patients, and help in integrating EASE (equanimity, attentiveness, self-awareness, and empathy) into practice. Evidence-based interventions are based on current pain theory, and include mindfulness techniques, non-pain stimuli, and active distraction. Case studies highlight challenging situations faced by health care professionals and patients and how to navigate them with ISLEEP communication skills. Procedure videos provide step-by-step instructions on how to practice mindfulness and other mind-training techniques. Focus on practical application includes opportunities for observation (videos), practice (simulation exercises), and self-evaluation (clinical tools). More than 20 videos demonstrate the ISLEEP method and how to implement it with patients and staff. Over 20 videos demonstrate interventions for procedural pain and anxiety. Tables and Figures highlight key research and concepts throughout the book. eBook version is included with print purchase. The eBook allows you to access all of the text, figures, and references, with the ability to search, customize your content, make notes and highlights, and have content read aloud. It also includes videos of meditation practices, communication skills, and interventions for procedural pain and anxiety.

Nurses Making Policy Rebecca M. Patton, DNP, RN, CNOR, FAAN,Margarete L. Zalon, PhD, RN, ACNS-BC, FAAN,Ruth Ludwick, PhD, RN-BC, APRN-CNS, FAAN,2022-02-01 This completely updated third edition challenges nurses to fulfill their critical role and responsibility to society in advancing health policy by providing them with the tools to achieve their goals. This edition addresses the impact of critical issues including

COVID-19, diversity, social determinants of health, and social justice. Challenges faced by nurses in care delivery including the safety, health, and well-being of nurses (e.g., suicide) are explored. Recently issued seminal documents, including the Future of Nursing 2020-2030 report, the American Association of Colleges of Nurses' "Essentials," and the World Health Organization's report on the Health Workforce are highlighted. Emphasis is placed opportunities for nurses to leading and taking action in health policy. Robust discussion of strategies with the use of evidence and real-world examples and stories provide nurses with the foundation to be policy influencers. This pragmatic text helps nurses acquire an in-depth understanding of the intricacies of policy development and the opportunities to shape policy across the larger healthcare landscape and within their communities. It illuminates the steps, strategies, and competencies needed for health policy advocacy in various settings and also incorporates a Health in All Policies approach. Real world examples of policymaking by frontline nurses are provided. Leadership, ethical, and social justice principles are integrated across chapters, which exemplify policy development from the global scale to the local level. A completely revised chapter describing the trajectories of nurse influencers at different career stages illustrates how nurses can be engaged in policy to address new and perennial challenges faced by nurses. A new chapter, "Transforming Policy Through Innovation," encompasses the most current technologies and opportunities for creative development within healthcare. To promote learning about policy, abundant examples, learning activities, and exercises are provided. New Policy Challenges/Solutions, Policies on the Scene, and case examples reflect recent changes to the healthcare environment. A comprehensive Instructor's Manual also includes strategies for purposeful discourse that facilitate a deeper dive into provocative topics. PowerPoint slides include a faculty version with notes pages to facilitate discussion and a student version. New to the Third Edition: Major revisions and updates to each chapter New chapter: Transforming Policy through Innovation New lead authors that expand the high standard of content for advanced competencies New Policy Challenge/Solution and Policy on the Scene features in step with today's healthcare system The impact of COVID-19 on health policy Policy implications of key reports impacting health outcomes and nursing New illustrations, figures, and exhibits to emphasize key events and concepts Key Features: Features real-world exemplars from distinguished national and international nursing policy leaders Illustrates how nurses are leaders across settings in a variety of policy arenas Discusses policies to address social and economic inequities impacting health Includes Learning Activities and E-resources designed for meaningful engagement Patton-Zalon-Ludwick Policy Framework provides a visual guide for the self-assessment of policy competencies A comprehensive Instructor's Manual and PowerPoint slides are included!

Preparing for an Influenza Pandemic Institute of Medicine,Board on Health Sciences Policy,Committee on Personal Protective Equipment for Healthcare Workers During an Influenza Pandemic,2007-12-28 During an influenza pandemic, healthcare workers will be on the front lines delivering care to patients and preventing further spread of the disease. As the nation prepares for pandemic influenza, multiple avenues for protecting the health of the public are being carefully considered, ranging from rapid development of appropriate vaccines to quarantine plans should the need arise for their implementation. One vital aspect of pandemic influenza planning is the use of personal protective equipment (PPE)-the respirators, gowns, gloves, face shields, eye protection, and other equipment that will be used by healthcare workers and others in their day-to-day patient care responsibilities. However, efforts to appropriately protect healthcare workers from illness or from infecting their families and their patients are greatly hindered by the paucity of data on the transmission of influenza and the challenges associated with training and equipping healthcare workers with effective personal protective equipment. Due to this lack of knowledge on influenza transmission, it is not possible at the present time to definitively inform healthcare workers about what PPE is critical and what level of protection this equipment will provide in a pandemic. The outbreaks of severe acute respiratory syndrome (SARS) in 2003 have underscored the importance of protecting healthcare workers from infectious agents. The surge capacity that will be required to reduce mortality from a pandemic cannot be met if healthcare workers are themselves ill or are absent due to concerns about PPE efficacy. The IOM committee determined that there is an urgent need to address the lack of preparedness regarding effective PPE for use in an influenza pandemic. Preparing for an Influenza Pandemic : Personal Protective Equipment for Healthcare Workers identifies that require expeditious research and policy action: (1) Influenza transmission research should become an immediate and short-term research priority so that effective prevention and control strategies can be developed and refined. The current paucity of knowledge significantly hinders prevention efforts. (2) Employer and employee commitment to worker safety and appropriate use of PPE should be strengthened. Healthcare facilities should establish and promote a culture of safety. (3) An integrated effort is needed to understand the PPE requirements of the worker and to develop and utilize innovative materials and technologies to create the next generation of PPE capable of meeting these needs.

Handbook of Research on Using Global Collective Intelligence and Creativity to Solve Wicked Problems Fields, Ziska,2020-11-27 Today's world is continually facing complex and life-threatening issues that are too difficult or even impossible to solve. These challenges have been titled "wicked" problems due to their radical and multifarious nature. Recently, there has been a focus on global cooperation and gathering creative and diverse methods from around the world to solve these issues. Accumulating research and information on these collective intelligence methods is vital in comprehending current international issues and what possible solutions are being developed through the use of global collaboration. The Handbook of Research on Using Global Collective Intelligence and Creativity to Solve Wicked Problems is a pivotal reference source that provides vital research on the collaboration between global communities in developing creative solutions for radical worldwide issues. While highlighting topics such as collaboration technologies, neuro-leadership, and sustainable global solutions, this publication explores diverse collections of problem-solving methods and applying them on a global scale. This book is ideally designed for scholars, researchers, students, policymakers, strategists, economists, and educators seeking current research on problem-solving methods using collective intelligence and creativity.

Utilizing Visual Representation in Educational Research Harriet J. Bessette,Camille Sutton-Brown,2023-10-01 This edited volume focuses on visual and image-based methodologies that can be used to expand how educators approach, design, and innovate research for the purpose of informing and improving teaching and learning. Exploring how data can be utilized, collected, and rendered useful in the education arena is of utmost importance to those oriented towards utilizing research with the aim of improving educational practice. Innovative methodologies are important for preparing future researchers/scholars and teachers in developing and sustaining professional knowledge. To date, while visual methodologies are explored in various volumes related to general areas of social science, few texts exist where visual methodologies are explained or well-understood in the field of education, specifically. This work centers on the functions, cultures, and outcomes of teaching and learning using visual data (i.e., participant-generated drawings, photo-elicitation, film, etc.) and the methods that frame this approach. It is intended for teachers, researchers, and teacher-researchers - in higher education as well as at PK-12 levels - who are ready to engage with innovative, and often compelling, research methods that make data collection across data sources both accessible and equitable. This volume illustrates how various scholars have conceptualized, generated, and

executed research utilizing visual data in their own schools, classrooms, and/or districts, and what they learned from these investigations. This edited volume is organized according to four main strands: Conducting research as visual endeavor: Assessing the nature of visual methodology, Conducting research as visual endeavor: Pedagogical innovation, What can visual data in educational research reveal: Student engagement, motivation, selfdetermination, metacognition, and mindfulness, and Conducting research as visual endeavor: Critical perspectives-critical exploration of issues in education and visual data's engagement with, and impact on, marginalized and/or disenfranchised participants. The chapters within each section, authored by established scholars in their fields of study, focus on some of today's key educational practices and the ways in which visual methodologies can provide innovation in the design of educational research. Each chapter within the volume reflects the importance of using credible, confirmable, reliable, and triangulated interpretations as a foundation for any claims, findings, or assertions related to pedagogical innovation, student mindfulness, and critical pedagogy. In summary, this edited volume is critically engaged, innovative, and contributes to advances in qualitative inquiry, visual research methodologies, and alternative ways of 'seeing' and 'knowing'.

Laboratory and Diagnostic Testing in Ambulatory Care - E-Book Martha (Marti) Garrels,2014-08-20 Learn the lab testing skills you need to know! Laboratory and Diagnostic Testing in Ambulatory Care: A Guide for Health Care Professionals, 3rd Edition provides in-depth coverage of the most common procedures and techniques of all the new CLIA waived, point-of-care tests along with some moderately complex tests. Clear, step-by-step instructions and full-color photographs make it easy to perform each test and procedure. To reflect the expanding roles of medical assistants and medical lab technicians, this edition adds a new chapter on electrocardiography and spirometry. Written by noted medical assisting educator Marti Garrels, this guide also includes an Evolve companion website with videos, structured lab notes, and activities for extra practice with clinical laboratory skills. Comprehensive coverage of the most common CLIA waived tests prepares healthcare professionals for lab testing in the ambulatory setting. A triad organization gives chapters a consistent, easy-to-follow format, with 1) fundamental concepts, 2) step-by-step instructions for CLIA waived procedures, and 3) advanced concepts that lead to a higher level of critical thinking and decision making. A full-color atlas section shows common laboratory and diagnostic findings, including depictions of cells, casts, and crystals. Learning objectives begin each chapter with goals for what you should accomplish, serve as checkpoints for comprehension and skills mastery, and provide a study tool in preparation for examinations. Procedure boxes provide step-by-step instructions and full-color photos and illustrations for today's commonly requested CLIA waived lab tests. Key terms are listed and defined at the beginning of each chapter, as well as included in the book's glossary. Common abbreviations and acronyms associated with CLIA waived testing are listed and defined at the beginning of each chapter. Review questions at the end of each chapter ask you to recall and assimilate the information you've learned. A workbook matches the chapters in the textbook, offering activities and exercises to reinforce laboratory concepts, terminology, and procedures. Sold separately. Expert author Marti Garrels brings years of on-the-job experience, an advanced MSA degree, dual degrees in medical technology and medical assisting, and classroom experience as an instructor and as a medical assisting program director. References at the end of each chapter cite related websites for further reading and research. An Evolve companion website includes various activities and exercises to enhance learning with problem-solving scenarios. NEW illustrations and photographs showcase new technology and the performance of lab testing tasks. NEW! Electrocardiography and Spirometry chapter focuses on the role of the medical assistant and the lab technician in these diagnostic tests. NEW content updates the text with a focus on new technology and significant advances made in recent years, including the latest CLIA waived test methods.

Life and Research Paris H. Grey,David G. Oppenheimer,2022-10-24 Life in a research lab can be daunting, especially for early-career scientists. Personal and professional hurdles abound in bench research, and this book by two seasoned lab professionals is here to help graduate students, postdocs, and staff scientists recognize stumbling blocks and avoid common pitfalls. Building and maintaining a mentoring network, practicing self-care and having a life outside of the lab, understanding that what works perfectly for a labmate might not work for you—these are just a few of the strategies that lab manager and molecular biologist Paris H. Grey and PI and geneticist David G. Oppenheimer wished they had implemented far sooner in their careers. They also offer practical advice on managing research projects, sharing your work on social media, and attending conferences. Above all, they coach early-career scientists to avoid burnout and make the most of every lab experience to grow and learn.

Communicating COVID-19 Effectively in Malaysia Serina Rahman,2022-01-24 Malaysia was initially lauded for its ability to combat the first few waves of COVID-19 but infection spikes since the Sabah state elections in September 2020 and subsequent exponential increases in both infections and deaths in 2021 left the nation reeling. Nationwide vaccination is seen as the only way out of the pandemic. Malaysia's COVID-19 communication strategy was hampered by political machinations and myriad changes in government. The need to shore up favour among the electorate resulted in inconsistent messaging and regular U-turns whenever there was public outrage at arbitrary restrictions. This resulted in confusion on the ground, preventing successful COVID-19 management and containment. Under the current regime, claims to more accessible data have been disputed and doubts have surfaced over data transparency and accuracy. There is an urgent need to ensure convincingly reliable information, as well as to use more engaging messaging on more suitable media. A holistic and effective COVID-19 communication strategy should adopt principles from several communication approaches, resulting in messages that are clear, simple and accessible as well as consistent and credible. Audiences should be segmented so that messages can be better tailored to their needs, with adequate information on the necessary steps to prevent infection and spread. Fake news, misinformation, and disinformation should be constantly tackled and debunked. The Gerai OA and OA Lindungi Komuniti Facebook pages are outstanding examples of grassroots information dissemination channels that effectively provide fact-checked, coherent and accessible information to local communities in languages and on media best-suited to their audiences.

Practicing Qualitative Methods in Health Geographies Nancy E. Fenton,Jamie Baxter,2016-07-15 Health geographers are increasingly turning to a diverse range of interpretative methodologies to explore the complexities of health, illness, space and place to gain more comprehensive understandings of well-being and broader social models of health and health care. Drawing upon postmodernism, many health geographers are concerned with issues of representation, the body and health care policy. Also related to an emphasis on the body is the growing literature in feminist health geography that investigates the metaphorical, physical and emotional challenges of the body and disease. Reflecting these interests, the chapters in this book set out the host of creative qualitative methods being used to explore the psychosocial experiences of individuals more directly, using such traditional methods as in-depth interviews and group discussions, participant observation, diaries and discourse analysis, but also more novel techniques such as 'go-along interviews', reflexive writing, illustrations, and photographic techniques. There are several areas of qualitative research unique to geographers which figure prominently in this volume including: health and place, comparative case study analysis, and qualitative approaches to the use of geographic information systems (GIS). This collection brings together a wide range of empirical concerns related to questions of health and shines a light on the diversity of qualitative methods in practice. Illustrating how qualitative methodologies are used in diverse health contexts this book fills an important niche for health geographers but will have wide appeal to health and geographic researchers.
