**Exploiting Environment Configurability in Reinforcement Learning** A.M. Metelli, 2022-12-07 In recent decades, Reinforcement Learning (RL) has emerged as an effective approach to address complex control tasks. In a Markov Decision Process (MDP), the framework typically used, the environment is assumed to be a fixed entity that cannot be altered externally. There are, however, several real-world scenarios in which the environment can be modified to a limited extent. This book, *Exploiting Environment Configurability in Reinforcement Learning*, aims to formalize and study diverse aspects of environment configuration. In a traditional MDP, the agent perceives the state of the environment and performs actions. As a consequence, the environment transitions to a new state and generates a reward signal. The goal of the agent consists of learning a policy, i.e., a prescription of actions that maximize the long-term reward. Although environment configuration arises quite often in real applications, the topic is very little explored in the literature. The contributions in the book are theoretical, algorithmic, and experimental and can be broadly subdivided into three parts. The first part introduces the novel formalism of Configurable Markov Decision Processes (Conf-MDPs) to model the configuration opportunities offered by the environment. The second part of the book focuses on the cooperative Conf-MDP setting and investigates the problem of finding an agent policy and an environment configuration that jointly optimize the long-term reward. The third part addresses two specific applications of the Conf-MDP framework: policy space identification and control frequency adaptation. The book will be of interest to all those using RL as part of their work.

**Uncertainty and Vagueness in Knowledge Based Systems** Rudolf Kruse, Erhard Schwecke, Jochen Heinsohn, 2012-12-06 The primary aim of this monograph is to provide a formal framework for the representation and management of uncertainty and vagueness in the field of artificial intelligence. It puts particular emphasis on a thorough analysis of these phenomena and on the development of sound mathematical modeling approaches. Beyond this theoretical basis the scope of the book includes also implementational aspects and a valuation of existing models and systems. The fundamental ambition of this book is to show that vagueness and uncertainty can be handled adequately by using measure-theoretic methods. The presentation of applicable knowledge representation formalisms and reasoning algorithms substantiates the claim that efficiency requirements do not necessarily require renunciation of an uncompromising mathematical modeling. These results are used to evaluate systems based on probabilistic methods as well as on non-standard concepts such as certainty factors, fuzzy sets or belief functions. The book is intended to be self-contained and addresses researchers and practitioners in the field of knowledge based systems. It is in particular suitable as a textbook for graduate-level students in AI, operations research and applied probability. A solid mathematical background is necessary for reading this book. Essential parts of the material have been the subject of courses given by the first author for students of computer science and mathematics held since 1984 at the University in Braunschweig.

**Chinese TV in the Netflix Era** Xu Xiying (Richard Xu), Liu Hui, 2023-04-04 Subscription-video-on-demand (SVOD) services are available on many online video-streaming platforms (VSPs) in China, such as iQiyi, Youku and Tencent Video, backed by Baidu, Alibaba and Tencent groups (BAT), respectively. The video content on these platforms can be the same shows as those broadcasted on national or provincial television stations or originally produced and exclusively streamed on the VSP. Meanwhile, VSPs purchase the distribution rights of foreign films and television series to enrich the content pool. This book aims to provide an account of Chinese television, particularly online drama series, or webisodes, with an awareness of the existence and competition of Netflix, covering topics on business strategies of VSPs, original content production trends, trans-media stories telling cases, audience behaviors and practitioner insight.

WeChat and the Chinese Diaspora Wanning Sun, Haiqing Yu, 2022-03-31 WeChat (the international version of Weixin), launched in 2012, has rapidly become the most favoured Chinese social media. Globally available, equally popular both inside and outside China and widely adopted by Chinese migrants, WeChat has fundamentally changed the ways in which Mandarin-speaking migrants conduct personal messaging, engage in group communication and community business activities, produce and distribute news, and access and share information. This book explores a wide range of issues connected to the ways in which WeChat works and is used, across the world among the newest members of the Chinese diaspora. Arguing that digital/social media afford a great degree of individual agency, as well as a collective capacity for sustaining an 'imagined community', the book shows how WeChat's assemblage of infrastructure and regulatory frameworks, technical capabilities, content and sense of community has led to the construction of a particular kind of diasporic Chinese world, at a time marked both by China's rise, and anxiety about Chinese influence in the West. Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

**Flexible Application-Layer Multicast in Heterogeneous Networks** Christian Hübsch, 2014-05-22 This work develops a set of peer-to-peer-based protocols and extensions in order to provide Internet-wide group communication. The focus is put to the question how different access technologies can be integrated in order to face the growing traffic load problem. Thereby, protocols are developed that allow autonomous adaptation to the current network situation on the one hand and the integration of WiFi domains where applicable on the other hand.

**The Chinese Television Industry** Michael Keane, 2015-07-07 Television is a massive industry in China, yet fewer people are watching television screens. This ground-breaking study explores how television content is changing, how the Chinese government is responding to the challenges presented by digital media, and how businesses are brokering alliances in both traditional and new media sectors.

**Digital Arts and Entertainment: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2014-06-30 In today's interconnected society, media, including news, entertainment, and social networking, has increasingly shifted to an online, ubiquitous format. Artists and audiences will achieve the greatest successes by utilizing these new digital tools. Multimedia Networking and Coding Farrugia, Reuben A., 2012-12-31 Advances in multimedia communication systems have enhanced the need for improved video coding standards. Due to the inherent nature of video content, large bandwidths and reliable communication links are required to ensure a satisfactory level of quality experience; inspiring industry and research communities to concentrate their efforts in this emerging research area. Multimedia Networking and Coding covers widespread knowledge and research as well as innovative applications in multimedia communication systems. This book highlights recent techniques that can evolve into future multimedia communication systems, also showing experimental results from systems and applications.

**Non-Professional Subtitling** Yvonne Lee, David Orrego-Carmona, 2017-08-21 From fansubbing, fan-generated translation, to user-generated translation, from amateur translation to social translation, non-professional subtitling has come a long way since its humble beginning in the 1980s. The prevailing technological affordance enables and mobilises the digital generation to turn subtitling into a method of self-expression and mediation, and their activities have made translation a more social and visible activity than ever before. This volume provides a comprehensive review of the

current state of play of this user-generated subtitling phenomenon. It includes projects and research focusing on various aspects of non-professional subtitling, including the communities at work, the agents at play, the production conditions and the products. The perspectives in the book explore the role played by the agents involved in the emerging subtitling networks worldwide, and their impact on the communities is also discussed, based on empirical data generated from observations on active fansubbing communities. The collection demonstrates, from various viewpoints, the ways in which non-professional subtitling connects languages, cultures and communities in a global setting.

**Media and Communication in the Chinese Diaspora** Wanning Sun,John Sinclair,2015-09-16 The rise of China has brought about a dramatic increase in the rate of migration from mainland China. At the same time, the Chinese government has embarked on a full-scale push for the internationalisation of Chinese media and culture. Media and communication have therefore become crucial factors in shaping the increasingly fraught politics of transnational Chinese communities. This book explores the changing nature of these communities, and reveals their dynamic and complex relationship to the media in a range of countries worldwide. Overall, the book highlights a number of ways in which China's going global policy interacts with other factors in significantly reshaping the content and contours of the diasporic Chinese media landscape. In doing so, this book constitutes a major rethinking of Chinese transnationalism in the twenty-first century.

**Nixon Rebuilds** John David Briley,2021-08-09 Richard Nixon's election to the presidency in 1968 was an improbable vindication for a man branded as a loser after unsuccessful presidential and gubernatorial campaigns. Yet during the 1966 mid-term elections, he emerged as the critical figure who united the fractured Republican Party after the disastrous 1964 presidential election. Along the way, he sensed how large swaths of the American public were moving against the Democrats, and how a candidate could take advantage of this. Filling an important gap in the Nixon literature, this book explores his dynamic reinvention during the dark days of the mid-sixties--a period that mirrored his 1946-1952 rise from obscure congressman to Eisenhower's vice-president. Beginning with his 1962 press conference after losing the California governor's election and ending with his 1968 presidential victory, a far more human Nixon is revealed, unlike the familiar caricature of the shady politician and orchestrator of Watergate who would do anything to win.

**Connected Viewing** Jennifer Holt,Kevin Sanson,2013-12-04 As patterns of media use become more integrated with mobile technologies and multiple screens, a new mode of viewer engagement has emerged in the form of connected viewing, which allows for an array of new relationships between audiences and media texts in the digital space. This exciting new collection brings together twelve original essays that critically engage with the socially-networked, multi-platform, and cloud-based world of today, examining the connected viewing phenomenon across television, film, video games, and social media. The result is a wide-ranging analysis of shifting business models, policy matters, technological infrastructure, new forms of user engagement, and other key trends affecting screen media in the digital era. Connected Viewing contextualizes the dramatic transformations taking place across both media industries and national contexts, and offers students and scholars alike a diverse set of methods and perspectives for studying this critical moment in media culture.
