📖 **Essays on Market Response to Changes in Costs and Price Transparency** ANNA OLGA SMOLNIK, 2017-01-25 The dissertation consists of three empirical studies and takes a closer look at price fluctuations using German gasoline prices as an example for a homogenous good. It analyzes consumers’ reaction to price fluctuations and respectively the pricing behavior of firms. The first paper, which was developed with co-authorship, explores consumers’ online price search effects on the pricing behavior of firms (gasoline price level and price dispersion). As regulators have recently implemented a mechanism for reporting all price changes to a central data base, the core assumption of this price reporting scheme is that the increase in price transparency will lead to a decline in the price level and a reduction in price dispersion. The second study addresses the question whether German gas stations adjust their retail prices asymmetrically in response to crude oil price changes, i.e., whether gas stations react quicker to crude oil price increases than to crude oil price decreases. The third study aims to analyze whether consumers react more strongly to gasoline price increases or to price decreases when considering buying a new vehicle.

📖 **M-Commerce** PAUL SKELDON, 2011-10-19 Mobile commerce is rapidly changing how businesses interact and sell. This book reveals how to master m-commerce, from global markets and trends to selling and marketing through m-commerce. 📖 **Machine-to-Machine Marketing (M3) via Anonymous Advertising Apps Anywhere Anytime (A5)** JESUS MENA, 2016-04-19 In today’s wireless environment, marketing is more frequently occurring at the server-to-device level—with that device being anything from a laptop or phone to a TV or car. In this real-time digital marketplace, human attributes such as income, marital status, and age are not the most reliable attributes for modeling consumer behaviors. A more effe

📖 **Data Mining Mobile Devices** JESUS MENA, 2016-04-19 With today’s consumers spending more time on their mobiles than on their PCs, new methods of empirical stochastic modeling have emerged that can provide marketers with detailed information about the products, content, and services their customers desire. Data Mining Mobile Devices defines the collection of machine-sensed environmental data pertaining to human social behavior. It explains how the integration of data mining and machine learning can enable the modeling of conversation context, proximity sensing, and geospatial location throughout large communities of mobile users. Examines the construction and leveraging of mobile sites Describes how to use mobile apps to gather key data about consumers’ behavior and preferences Discusses mobile mobs, which can be differentiated as distinct marketplaces—including Apple®, Google®, Facebook®, Amazon®, and Twitter® Provides detailed coverage of mobile analytics via clustering, text, and classification AI software and techniques Mobile devices serve as detailed diaries of a person, continuously and intimately broadcasting where, how, when, and what products, services, and content your consumers desire. The future is mobile—data mining starts and stops in consumers’ pockets. Describing how to analyze Wi-Fi and GPS data from websites and apps, the book explains how to model mined data through the use of artificial intelligence software. It also discusses the monetization of mobile devices’ desires and preferences that can lead to the triangulated marketing of content, products, or services to billions of consumers—in a relevant, anonymous, and personal manner.

📖 **Principles of Marketing for a Digital Age** TRACY L. TUTEN, 2019-12-28 Student-led in its design and development, the book incorporates digital marketing as central to what marketers do, and combines quality examples, assessment and online resources to support the teaching and learning of introductory marketing in a digital age. The author integrates digital and social media marketing throughout the chapters and through student involvement in the development of it, the text has been made to be approachable and to appeal to students, with infographics, numerous images, and an engaging writing style. It facilitates the flipped approach to classroom teaching and is supported by a number of features and activities in every chapter, encouraging students to undertake course reading, class participation and revision. It includes case studies from global companies such as Airbnb, Amazon, Apple, Burberry, eBay, Etsy, Google, IKEA, Nespresso, Netflix, Nike and Uber. It also takes a social view of marketing, featuring cases tied to the UN’s PRME initiative to aid students in becoming sustainably-minded individuals. The book is complemented by online instructor resources, including chapter-specific PowerPoint slides, an instructor manual, flipped classroom activities, as well as open access multiple choice questions (with solutions), videos, case studies, web links, a glossary and American Marketing Association (AMA) journal articles for students.

📖 **Electronic Commerce** EFRAIM TURBAN, DAVID KING, JAE KYU LEE, TING-PENG LIANG, DEBORRAH C. TURBAN, 2015-01-29 Throughout the book, theoretical foundations necessary for understanding Electronic Commerce (EC) are presented, ranging from consumer behavior to the economic theory of competition. Furthermore, this book presents the most current topics relating to EC as described by a diversified team of experts in a variety of fields, including a senior vice president of an e-commerce-related company. The authors provide website resources, numerous exercises, and extensive references to supplement the theoretical presentations. At the end of each chapter, a list of online resources with links to the websites is also provided. Additionally, extensive, vivid examples from large corporations, small businesses from different industries, and services, governments, and nonprofit agencies from all over the world make concepts come alive in Electronic Commerce. These examples, which were collected by both academicians and practitioners, show the reader the capabilities of EC, its cost and justification, and the innovative ways corporations are using EC in their operations. In this edition (previous editions published by Pearson/Prentice Hall), the authors bring forth the latest trends in e-commerce, including social businesses, social networking, social collaboration, innovations, and mobility.

📖 **Effective Multi-Unit Leadership** CHRIS EDGER, 2016-04-29 There is a growing recognition of the increasing importance of ‘local leadership’ practice within multi-unit service contexts, given the threat to costly land-based retail infrastructures from smart technologies. Multi-site organizations are economically significant, but currently under-researched and poorly understood. In Effective Multi-Unit Leadership, Chris Edger looks at that key managerial cohort in the retail, hospitality and service sectors operating between the centre and unit – the Multi-Unit Leader (MUL). This district, area or regional manager, is tasked with maximising revenue and profit from a complex and ambiguous positional space, being sandwiched between the centre and unit, facing the MUL paradox: how do they motivate unit managers and team members to provide great service whilst simultaneously fulfilling the Centre’s compliance agenda? Based on extensive case study research across a range of multi-unit service organisations, Edger advances an integrated model of MUL that elucidates how key activities (sales-led service, systems and standards – 3Ss) are driven through behavioural practices (commitment, control and change – 3Cs) underpinned by MUL personal characteristics (expertise, emotional intelligence and energy – 3Es). Central to this model is the notion of ‘portfolio optimisation through social exchange’ (POSE) where MULs apply ‘local leadership’, leveraging their portfolios through the deft application of exchange-based currencies. Replete with case studies, Effective Multi-Unit Leadership will appeal to high potential unit managers; existing multi-unit leaders who want to improve their performance levels; and retail/service directors wishing to train and coach their direct reports; as well as business educators and those with an academic interest in organisational studies.

📖 **The “Dematerialized” Insurance** PIERPAOLO MARANO, IOANNIS ROKAS, PETER KOCHENBURGER, 2016-08-03 This book adopts an international perspective to examine how the online sale of insurance challenges the insurance regulation and the insurance contract, with a focus on insurance sales, consumer protection, cyber risks and privacy, as well as dispute resolution. Today insurers, policyholders, intermediaries and regulators interact in an increasingly online world with profound implications for what has up to now been a traditionally operating industry. While the growing threats to consumer and business data from cyber attacks constitute major sources of risk for insurers, at the same time cyber insurance has become the fastest growing commercial insurance product in many jurisdictions. Scholars and practitioners from Europe, the United States and Asia review these topics from the viewpoints of insurers, policyholders and insurance intermediaries. In some cases, existing insurance regulations appear readily adaptable to the online world, such as prohibitions on deceptive marketing of insurance products and unfair commercial practices, which can be applied to advertising through social media, such as Facebook and Twitter, as well as to traditional written material. In other areas, current regulatory and business practices are proving to be inadequate to the task and new ones are emerging. For example, the insurance industry and insurance supervisors are exploring how to review, utilize, profit from and regulate the explosive growth of data mining and predictive analytics (“big data”), which threaten long-standing privacy protection and insurance risk classification laws. This book’s ambitious international scope matches its topics. The online insurance market is cross-territorial and cross-jurisdictional with insurers often operating internationally and as part of larger

- FINANCIAL-SERVICES HOLDING COMPANIES. THE AUTHORS’ EXPLORATION OF THESE ISSUES FROM THE VANTAGE POINTS OF SOME OF THE WORLD’S LARGEST INSURANCE MARKETS – THE U.S., EUROPE AND JAPAN – PROVIDES A COMPARATIVE FRAMEWORK, WHICH IS NECESSARY FOR THE UNDERSTANDING OF ONLINE INSURANCE.
