As a reflection of soccer's significance, the sport impacts countless aspects of the world's culture, from politics and religion to business and the arts. In *The World through Soccer: The Cultural Impact of a Global Sport*, Tamir Bar-On utilizes soccer to provide insights into worldwide politics, religion, ethics, marketing, business, leadership, philosophy, and the arts. Each chapter features representative players, providing specific examples of how soccer comments on and informs our lives. These players—selected from a wide array of eras, countries, and backgrounds—include Diego Maradona, Pelé, Hugo Sánchez, Cha Bum-Kun, Roger Milla, José Luis Chilavert, Zinedine Zidane, Paolo Maldini, Cristiano Ronaldo, Xavi, Neymar, Clint Dempsey, Mia Hamm, and many others. Consumer Behaviour Isabelle Szmigin,Maria Piacentini,2014-11-06 Presenting a brand new approach to teaching consumer behaviour, Szmigin and Piacentini move beyond traditional psychological learning to acknowledge more holistic perspectives of consumer behaviour and

incorporate new areas of research, such as Consumer Culture Theory, which are enhancing our understanding of this fascinating subject. The latest behavioural, psychological and sociological approaches are presented alongside emerging techniques, such as neuromarketing, with their application to marketing explicitly drawn out. Theory is firmly set in context for students through extensive use of international examples and extended cases on topics such as repertoire shopping in China, lifestyles of Indian consumers, and learning about brands through Havaianas in Brazil. Each chapter includes Consumer Insights covering topics such as social media marketing in the Netherlands, repositioning Lucozade in the UK, and finding the right celebrity endorser. These features bring together the themes discussed and encourage students to engage with the material on a more practical level. Central to the book is the recognition of how businesses and government are likely to use knowledge of these theories and techniques in marketing strategies and business decision making. Each chapter includes a Practitioner Insight from a professional working in marketing, advertising, government or a charity, including Dubit, Thinkbox and Age UK to provide real world views on the topics being discussed and the possible future direction of these areas. The authors acknowledge consumer behaviour as a research discipline. To reflect this, Research Insights features throughout each chapter include links to seminal papers to present students with the opportunity to take their learning further. The accompanying Online Resource Centre provides superior ready-to-use support for both students and lecturers: For students: * Author blog, responding to changes within the subject and supporting the currency of the textbook; * Web links illustrating consumer behaviour in practice including examples from print, video and web; * Multiple choice questions with instant feedback; * Links to seminal articles as highlighted in the Research Insights feature; * Web exercises to encourage students to test their knowledge and apply their learning; * Flashcard glossary to test

understanding of key terms. For lecturers: * Comprehensive customizable PowerPoint slides; * Learning activities (including, more detailed workshop-based activities, shorter lecture-based in-class exercises and suggestions for assessment approaches) * An instructor's manual (containing guidance on how to use the case studies and Practitioner Insights in class, indicative answers, and some additional questions).

Exploring Videogames with Deleuze and Guattari Ciara Cremin, 2015-08-13 Videogames are a unique artistic form, and to analyse and understand them an equally unique language is required. Cremin turns to Deleuze and Guattari's non-representational philosophy to develop a conceptual toolkit for thinking anew about videogames and our relationship to them. Rather than approach videogames through a language suited to other media forms, Cremin invites us to think in terms of a videogame plane and the compositions of developers and players who bring them to life. According to Cremin, we are not simply playing videogames, we are creating them. We exceed our own bodily limitations by assembling forces with the elements they are made up of. The book develops a critical methodology that can explain what every videogame, irrespective of genre or technology, has in common and proceeds on this basis to analyse their differences. Drawing from a wide range of examples spanning the history of the medium, Cremin discerns the qualities inherent to those regarded as classics and what those qualities enable the player to do. *Exploring Videogames with Deleuze and Guattari* analyses different aspects of the medium, including the social and cultural context in which videogames are played, to develop a nuanced perspective on gendered narratives, caricatures and glorifications of war. It considers the processes and relationships that have given rise to industrial giants, the spiralling costs of making videogames and the pressure this places developers under to produce standard variations of winning formulas. The book invites the reader to embark on a

molecular journey through worlds neither 'virtual' nor 'real' exceeding image, analogy and metaphor. With clear explanations and detailed analysis, Cremin demonstrates the value of a Deleuzian approach to the study of videogames, making it an accessible and valuable resource for students, scholars, developers and enthusiasts.
