Winning Every Match in PES 2019 Pro Evolution Soccer

Minh Hoang Pham, 2019-06-23 If you're a fast-paced attacker that is often a little too trigger happy on the sprint button, you're going to be in for quite the surprise in PES 2019. With a newly reworked and balanced stamina system in place, you'll quickly come to find that your players will tire much faster if you are sprinting all the time. You'll also come to notice that when players do begin to tire, there will be visible signs of fatigue - an important new feature that you must keep an eye on! In order to combat this new change though, you are going to want to slow down your gameplay strategies quite significantly and only use your speed when truly necessary, such as making breakaways or simply rushing down your wings. With stamina now ultimately affecting the performance of your players, it is more crucial than ever before that you manage your players throughout the match and sub them out whenever is needed. Make Use Of The All New Quick Sub Feature Gone the days of those clunky substitution systems, Konami has gone to quite the effort to make sure the game is flowing as smoothly as possible after the introduction of a brand new quick substitution feature has been added to PES 2019. Available whenever the ball goes out of play, this less intrusive method of subbing players in and out of the game is a great way to manage those that are struggling with fatigue. With a few clicks of the d-pad, this new system will prioritize players to sub out based upon their position and current stamina levels. Let's

take a look to become master on this game!
