Occupational Therapy and Life Course Development Ruth Wright, Léonie Sugarman, 2009-02-11 Occupational Therapy and Life Course Development is an invaluable work book for professional practice. It provides a tool to help both students and qualified professionals develop and enhance a framework for their practice that supports all individuals and settings in a holistic and inclusive way. Much of the book is organised as a work book based around a single case study. It includes theory related to life span development and managing change, and also exercises for readers to complete in order to apply the theory to practice. Chapters span such key topics as the client in context; life events; transition and loss; the management of stress; and planful decision making. The book emphasises how issues of life course development are as relevant to health and social care professionals as they are to their clients. A number of exercises invite readers to reflect on their own life course, and there chapters both on becoming and belonging as an occupational therapist, and on developing professional practice.

Construction Extension to the PMBOK® Guide Project Management Institute, 2016-10-01 A Guide to the Project Management Body of Knowledge (PMBOK® Guide) provides generalized project management guidance applicable to most projects most of the time. In order to apply this generalized guidance to construction projects, the Project Management Institute has developed the Construction Extension to the PMBOK® Guide. This Construction Extension provides construction-specific guidance for the project management practitioner for each of the PMBOK® Guide Knowledge Areas, as well as guidance in these additional areas not found in the PMBOK® Guide: * All project resources, rather than just human resources * Project health, safety, security, and environmental management * Project financial management, in addition to cost * Management of claims in construction This edition of the Construction Extension also follows a new structure, discussing the principles in each of the Knowledge Areas rather than discussing the individual processes. This approach broadens the applicability of the Construction Extension by increasing the focus on the "what" and "why" of construction project management. This Construction Extension also includes discussion of emerging trends and developments in the construction industry that affect the application of project management to construction projects.
